NEW WEBSITE!

BRAND NEW LOOK

WB7HAM

Darin

Our website now has a new address & a new look. The address is <http://ciarc.50webs.com>, the old address; <http://www.gsl.net/ciarc> will be our back-up. The move became necessary when we found that gsl.net has become slower & slower. The overall look of the site is now in line with our clubs new direction, proclaiming the Gospel of Jesus Christ via amateur radio. Please take the time to look over our new site & let us know what you think.

SIMPLEX UPDATE

USE of 144, 440 & 220

WB7HAM

Darin

We are in the process of choosing simplex frequencies in the 2 meter, 70 centimeter & 1.25 meter bands to use as our club contact frequencies. As soon as our choices are finalized we will publish the frequencies here. Please stay tuned.

ECHOLINK

WB7HAM

Darin

One thing that hasn't changed is our desire to set up an Echolink node with a fulltime connection to the country of Israel. We would like to do this on the 220 MHz band. We still need to make contact with a station in Israel who would like to join us in this project. Again, stay tuned!
