

From N3JPV Randy Columbia County ARES EC and Races Radio Officer

See suggestions followed by many frequencies-not monitored by priority,
source of some info at www.pa-sitrep.com

A updated repeater directory for 2006-2007

reason: many repeaters closer to Hamburg Eastern Region and Harrisburg HQ

always a need to promote more digital modes, preference for our local needs
include regular packet on 145.05, psk-31 14.07 hf- usb and APRS 144.39 FM
and of course Winlink2k, but would like the state to make one mode a statewide
digital format. Voice or phone should always be a priority over digital, unless
transmitting personal or victim, patient info. (HIPPA) Caution to always
remember the public and scanners are listening.

ECHOLINK-VOIP

Columbia and Montour frequency priorities will be different than other areas of
the state or Eastern Region.
