

My Radio Friend!

There are so many ways we can communicate.
It seems there's a new form created each day!
There's one very special form us Hams can relate.
And it has come a long long way!
Amateur Radio is the form, I think,
is the way that I personally feel is the best!
With the press of a PTT switch comes a radio link.
And I am reminded of that time proven test.
Just to imagine that in the days gone by,
someone sat down and invented this thing called 'Radio.'
But, did it work on his very first try?
I feel that history would say no!
And yet, here we are in the 21st Century.
With this invention still going quite strong!
What great pleasure it still brings to me
to be able to keep sending radio waves along!
And, before the day's over and I sign off,
and then shut my radio station down.
I'm reminded of a very special radio friend.
And I feel as if Mr Marconi is still around!
