intro: tips & tricks for the ipod

I am not sure exactly what ipods this works on i used my ipod classic 80GB so It may or may not on your older ipod.

Image Notes

1. my apple ipod 80GB
2. ipod classic

step 1: FAST MENU

This is the most useful if you are a far way from the menu like watching a video or listening to your music.

what you do is press and hold the menu button and you will instantly go to the main menu of the ipod.

step 2: Enter the diagnostic menu

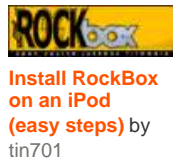

to enter this switch your hold button on then off and hold the center and the menu button until the apple logo appears then press the |<< button and center to enter the diagnostic menu

step 3: The end

The end hope you liked it i will add more check back for updates
