FCC Proposes to Drop Morse Code Requirement for All License Classes

(Jul 20, 2005) -- The FCC has proposed dropping the 5 WPM Morse code element as a requirement to obtain an Amateur Radio license of any class. The Commission recommended the change to its Part 97 Amateur Service rules in a *Notice of Proposed Rule Making (NPRM)* in WT Docket 05-235. Any rule changes proposed in the *NPRM* would *not* become final until the FCC gathers additional public comments, formally adopts any changes to its rules and concludes the proceeding by issuing a *Report and Order (R&O)* spelling out the changes and specifying an effective date. That's not likely to happen for several months. The FCC declined in its *NPRM* to go forward with any other suggested changes to Amateur Service licensing rules or operating privileges beyond elimination of the Morse requirement.
