

W9AML 2m Tuesday Net Log

Good evening,

This is the regular Tuesday night net of the Central Illinois Radio Club. This is the W9AML repeater on 146.34/94 mhz. This net is primarily for rag chewing but we do try and polish our skill at operating in a net environment.

Before we start with the net, is there anyone with emergency traffic or who needs to contact anyone? If so please call now.....

Do first round of check-ins

Announcements for the week.....

With that are there any stations out there that want to check in? Is so please come back to net control with your call sign and name. Please wait for acknowledgement of the previous check-in before calling to allow me to log the calls correctly.

Are there anymore check-ins, comments or information for the net?

Hearing no more calls, we have this net every Tuesday night at 9pm. We had a total of _____ check-ins tonight. The time is now _____ pm. This is _____ closing the Central Illinois Radio Club Tuesday night net on the W9AML repeater.
