

Price list for T7F and accessories

T7F, 70cm transceiver

Frequency range 430-440MHz, channel spacing 12.5kHz, RX/TX turnaround time 30ms, AF response 10Hz–7kHz, sensitivity 0.22 μ V, output poer 6W, power supply 7.5-14V, size 148x74x24mm.

The kit includes PCB, all electrical and mechanical components inclusively cabinet and heat sink and a 14 pages manual. The module is built up, tuned and ready for use.

Kit	299,00 DM	152,80 EUR
Module	469,00 DM	239,90 EUR

Extension for voice operation

This kit includes an AF power amplifier, a squelch unit, a microphone amplifier and a 1750 Hz tone burst generator. It provides voice operation with the T7F as well as 9k6 packet radio.

Kit	39,00 DM	19,90 EUR
-----	----------	-----------

Filter kit for 19k2 operation

If you want to use the T7F for 19200bps it is necessary to use wide IF filters. They are provided with this kit.

Kit	35,00 DM	17,90 EUR
-----	----------	-----------

LCD user interface

The device consists of a LCD with backlight and a rotary knob to select the frequency.

Kit	89,00 DM	45,50 EUR
Module	129,00 DM	66,00 EUR

40 Watts power amplifier

40W Power amplifier for FM transceivers, input power 0.5–7 Watt, very fast electronic TR switch with pin diodes, power supply 10-14V. The kit includes PCB, all electrical and mechanical components inclusively cabinet and heat sink.

Kit	249,00 DM	127,30 EUR
Module	339,00 DM	173,30 EUR

8% discount on all items by ordering 10 units or more. Payment in advance by bank transfer or by COD. All prices includes 16% German VAT.
