15. Special Operation

- Israeli mobile stations may move and change their location during the contest, into 5 different 'Areas', restricted to an operating time of at least one full hour per 'Area'.
- The operation from each 'Area' gives that station the status of a different station with another call, thus giving additional contest points and multipliers.
- To identify its different location / 'Area', those stations will change their callsigns by adding a number after their prefix. For example 4X4JU will use 4X41JU, 4X42JU...4X45JU or 4X6JS will use 4X61JS, 4X62JS etc.

EXPLAINING THE MULTIPLIERS

1) The *square* system:

The country is divided geographically, by the Survey Department of Israel, into a grid system resulting in squares of 10 by 10 Kilometers. North to South coordinates are identified by numbers, while West to East coordinates are identified by letters. The square is defined through the combination of the relevant coordinates i.e. E14.

ת.ד. 17600 ת"א 61176 Tel-Aviv P.O.B 17600

WWW.IARC.ORG

2) The *Administrative* System:

The country is divided into **23** administrative regions and **regions are not multipliers!**

Here is a list of the **Regions** and their respective abbreviations:

Akko	AK	Hagolan	HG	Kinneret	KT	Telaviv	TA
Ashqelon	AS	Haifa	HF	Petah Tiqwa	PT	Tulkarm	TK
Azza	AZ	Hasharon	HS	Ramallah	RA	Yarden	YN
Beer Sheva	BS	Hebron	HB	Ramla	RM	Yizreel	YZ
Bethlehem	BL	Jenin	JN	Rehovot	RH	Zefat	ZF
Hadera	HD	Jerusalem	JS	Shekhem	SM		

3) The 'Areas' (multipliers):

An 'Area' (**multiplier**) is made up from the 10 by 10 km. grid reference square and the **region**. For example: **F15TA, E14TA, H08HF**. The 'Area' is the basis for the "Holyland Award" and the "Holyland DX Contest". For that purpose the 'Area' must contain land and only that land or any waterway in that 'Area' is considered to be the 'Area'.

4) Region Boundaries:

The region boundaries are drawn in an arbitrary manner so that often the 10 km grid reference square does cover more than one single region. For example, the square H08 lies partly in the region of Haifa, partly in the region of Hadera and partly in the region of Yizreel. As a result one may work, in the same square, three different Areas - H08HF, H08HD and H08YZ.

5) Maps:

The Israel Survey Department has printed the following maps:

- 1) Country Road Map with a 1:250.000 scale, comprising 2 sheets.
- 2) Country Road Map with a 1:100.000 scale, comprising 6 sheets.
- 3) Region Map with a 1:250.000 scale, comprising 2 sheets.
- 4) Digital Holyland Squares Map on the Web Site: www.qrz.co.il/holyland

The Electronics files should be named after participant's callsign for example:

4Z4KX.ALL and 4Z4KX.SUM

All logs received by e-mail will be confirmed by e-mail.

ALL FINAL RESULTS can be found on the IARC Web Site: WWW.IARC.ORG/CONTEST
