Additional membership support:

Any individual who wishes to support C.A.R.L.A. in its ongoing operations, maintenance and improvements would be welcome to do so and sincerely appreciated. The above mentioned donations are offered as a guide only and may be modified in any amount as the individual sees fit. Since its inception in the early 80's every dollar donated to C.A.R.L.A. has been generously done so on the part of individual trustees, directors and certain general members with no reimbursement or special privileges expected in return. You may elect to donate funds, equipment, site space and any other resources as you see fit.

Although you may choose a primary machine/system to support, you are in fact helping to support every aspect of C.A.R.L.A. The Directors of C.A.R.L.A. will manage funds and utilize them as deemed necessary throughout the entire system for the primary use of emergency communications.

Thank you for your use and support of our systems.

C.A.R.L.A. Membership/Support Application Form

The following information is requested of you in order to process your application for membership support for the California Amateur Radio Linking Association (C.A.R.L.A.). The items with an asterisk are required information. The other information is not required, but desired if you don't object. It helps us to create a profile of our users. If there is something you would rather not list, simply skip it. Your information will not be given out to anyone, sold or advertised unless approved by you.

All applications are contingent upon approval by the Directors of C.A.R.L.A. A check or money order should accompany your Membership/Support application form. All memberships are renewable on a yearly basis with reminders being sent out prior to their expiration. Most correspondence will be electronic, via e-mail when possible, so to reduce the amount of handling costs, paperwork and hassle. You may receive information as it becomes available via e-mail or postal service and are encouraged to keep your address/contact information up-to-date with us.

Although C.A.R.L.A. has not charged any membership for the past several years and does not require anyone to pay retroactive dues, if you feel so inclined we would certainly appreciate anything you would be willing to donate. Additionally, the recommended donation structure is exactly that. "Recommended". Try to imagine what it takes to put a machine on the air, with various enhancement/support systems and maintain it and then multiply that by numerous systems and you quickly realize it only covers a very small percentage of the entire cost(s) involved. Some users have donated generously with money, equipment, site space, access to various resources, etc... in addition to the regular membership amounts, simply because they believe in what C.A.R.L.A. is trying to do and want to see it carry on. That option is entirely up to you; we appreciate any support you are willing to offer.
