QRSS CW-FSK Beacon by Kanga Products

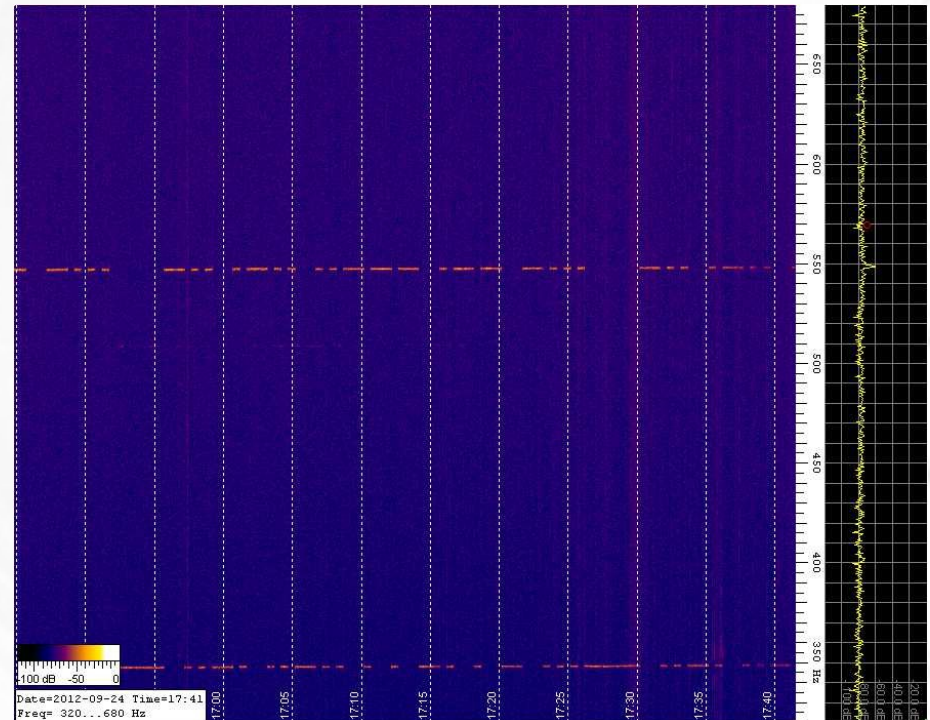

- ☞ ca. 30 mW output; XTAL-controlled, tied by tuning-cap
- 😊 low price, controller for PTT-key already programmed
- ☹ frequency stability not acceptable (10 m version only)
no longer available as 10 m version

Agilent 33250A Function Generator

- ☞ ca. 100 mW stand-alone, up to 10 W with extra linear PA
- ☺ high frequency accuracy; adjustable in sub-Hz range; FSK possible with shift in Hz-range
- ☹ high price, even as surplus;
PC required for keying, running e.g. qrs.exe by ON7YD

Rohde&Schwarz SMIQ Signal Generator

- ☞ ca. 20 mW stand-alone, up to 10 W with extra linear PA
- 😊 high frequency accuracy; adjustable in sub-Hz range; no PC required (R&S „digital modes“ option required)
- ☹ high price, even as surplus; minimum shift of 200 Hz in FSK mode

Marcmart OT204 DDS kit (using AD9851)

- ☞ up to 2 W with vintage CB used as final PA, modified Kanga 10 m kit used as pre-amp and PTT
- ☺ acceptable frequency accuracy; adjustable in Hz range; no PC required
- ☹ moderate price for DDS kit (ca. 45 USD in eBay)

reports received so far in Bavaria (JN57dr)

**ODX of 18.172 km:
DL2WB ⇒ ZL2IK**

**running 4 W from the
R&S SMIQ setup
with external PA into a
vertical quarterwave**
