

K2DI-PCI v.II

Sound card interface for the K2's K2DI by EA3BLQ

Circuit for a daughter PC board of the K2DI v.III PCB, designed to interface the K2's DI with a computer.

It features Opto isolation for the RS232 PTT circuit, as well as isolation for the sound card connections.

Another remarkable feature is the possibility to choose the PTT mode between RS232 or VOX, according to user preferences.
