#### Old Business:

Fred Reported that Shane and he were going to install the new UHF repeater after the meeting. The duplexer has arrived. Reminder that if you do not have C4FM capabilities, you should add a PL tone of 88.5 to incoming signals on your UHF radio. After install the next step in the spring is to get hooked up to broadband, so wires X function can be used. The repeater has a separate receiver that can be used to control it via RF.

Terry Rasmussen reported on Winter field day. All worked well and was an opportunity to learn how to use your radio equipment in a remote environment.

Mark reported on his SDR project. He has been taking photographs of his notes to provide a digital medium. He is also putting together a binder of his data, so others can

follow along on the process.

New Business:

Field day was discussed. Field day for 2021 will be held at Shane's QTH near Evergreen golf course by Battle Creek. He has a large building with plumbing for us to use. More planning to come.
