## Notes:

See the PCB symbol document for an explanation of all symbols on this diagram.

Board material is 1/16 inch thick double sided copper clad fibreglass G-10 or FR-4.

Board dimensions are 2.00 inches x 1.50 inches or 51mm x 39mm (rounded up). Check the dimensions of the printed image and change the printing scale if required.

The above view is the solder side and all areas containing points marked as ground connections should be in-filled with ground copper and connected through to the top copper groundplane.

The top copper is a continuous groundplane with small gaps around non-ground component leads.
