

## K6JTH SOTA Key V2

Thank you for purchasing a K6JTH SOTA Key. Each key is hand fit, and adjusted. They are shipped only after I personally test them. When designing this key my goal was to make an affordable high quality key that is durable enough to toss into a back pack and know it will function at the site.

There are two adjustments. The height of the deck and the contact gap. The contact bolt is polished at the end to provide a precise contact point. On the V2 keys the deck is also polished. Proper deck height is parallel to the table. The gap is one of preference.

The construction is stainless parts, screws and nuts. The insulated bolt is Nylon. The bearings are 3x7x2.5mm. The magnets are glued in place. All threads are 6-32. There are additional 6=32 threads for magnet mounts.

This key has a 30 day no questions asked money back guarantee when purchased directly from me. If you are not happy, send it back and I will give you a refund. I can only improve the key with feedback, please feel free to contact me with any questions or concerns.
