

HP400 Conversion Kit

The HP400 conversion kit replaces the five amplifier circuit tubes of the HP400 VTVM. Conversion consists of removing the tubes, plugging in the FETRONs, and recalibrating the instrument with step-by-step procedures given in the instruction booklet.

CA Plug-in Conversion Kit

This kit replaces all 15 tubes in the CA plug-in module for Tektronix 500 series oscilloscopes. In addition to replacing the tubes, minor wiring changes are required. An instruction booklet details the conversion steps.
