- NOTES:**
1. An 's' as the first character in the Memory Display indicates this is the Output Frequency of a Repeater to be used only if the repeater fails.
  2. Not all Frequencies function on all Radios. For Example 220 frequencies are only available on the Kenwood F6A HTs normally kept in the Communications Van.
  3. These channel assignments only apply to the Kenwood radios. The Alinco 220 Radio uses channel 26 for the W6MLP Repeater.
