Happy Easter to everyone in the L'Anse Creuse radio club. I hope that everyone had a good Easter.

On April 12, 2014 the Sky Warn class was held. It was a good class. That night was the first weather alert for the season for severe weather. On April 14, 2014 there was wind advisory for that day. Storms can pop up at any time. Keep your eye to the sky for severe weather! If needed you should take shelter.

On May 7, 2014 is the program on Digital radio HF with Brain Johnston (W8TFI). It will be a very good program. I saw the program at the Races meeting.

I hope that I can see everyone at the meeting May 7, 2014 at 7:30 pm.

73's

Rick Vandecar / W8RTV

Rick Vandecar - W8RTV

Next Meeting - 7:30 PM **May 7th, 2014** at the Tucker Senior Center (see [last page](#) for map and address).

Meeting Program - The program for our May meeting will be "Getting on the air with HF Digital modes".

The monthly board meeting will be on Wednesday, May 14th, 2014.

Snow is gone, but not forgotten! As this edition of the *Tuned Circuit* goes to press it is just two months to Field Day. We will probably talk a little about FD at the May meeting, and certainly a lot more at the June meeting. Make your plans now for the fun of this great annual operating event! Thanks go to Henry / N8AT for the 2014 FD graphic.

MAY 7TH MEETING PROGRAM

We have an informative program for you this month. I have scheduled a member of the ARRL Michigan Section "Digital Presentation Team" to put on a demonstration about getting on the air via HF digital. I would like to thank John/N8FYL for suggesting this program.

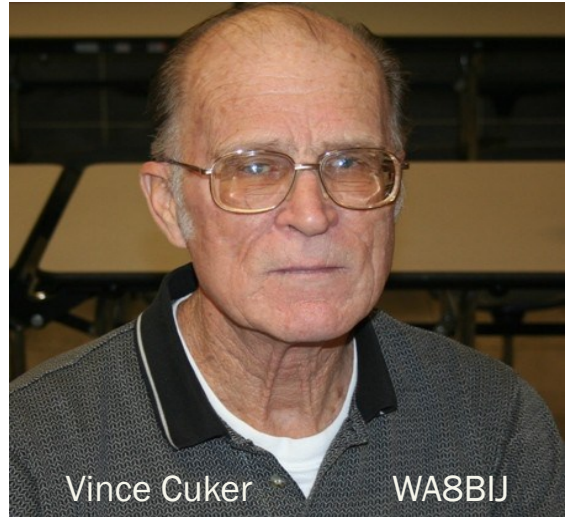

Brian/W8TFI, of Warren MI will present the program at our May 7th meeting, at the Tucker Senior Citizens Center, 26980 Ballard Road. This is our club meeting location. Ballard Road runs west off Jefferson, the first traffic light south of Crocker Blvd.

With the growing use of sound cards, it makes digital communications more available to the average ham.

I hope to see a nice crowd at the meeting to greet Brian, and after the presentation, ask any questions you may have on this subject.

The business portion of our meetings starts at 7:30 PM.

Vince / WA8BIJ
Program Chairman

April meeting program was interesting.

If you missed the April meeting, you missed a very interesting program titled "A Brief History of Military Communications", by Jerry Begel/W9NPI. Jerry has presented several programs for the club in the past, and they have always been informative and interesting.

He covered all methods of original secret communications, from placing a message on the top of a bald head, and then after the hair grew out to where the message could not be seen, that person delivered the message to the recipient, where upon shaving the head, the message could be seen. My thought was, I hope the message was not time sensitive.

Jerry covered the encryption machines of WW1 and WW2. This part was very interesting to me, because I used these types of encryption machines while I was in the Signal Corps in Japan and Korea.

The program went through various early methods of getting the message through, to modern day technologies. The early laying of cables across the ocean floor was probably the most

difficult of all.

The skies are today filled with hundreds of satellites giving communications for private and military uses. GPS has been one of the most common uses we are familiar with.

If you have any ideas for programs you think would be of interest to other club members, please let me know, and I'll work on having it scheduled.

Vince/WA8BIJ
Program Manager

Jerry, getting ready to present the show

Report of the Secretary

L'Anse Creuse ARC April 2, 2014 meeting minutes.

The meeting was called to order by the President, **Rick W8RTV**. We had two visitors. There was one upgrade, **Bob K8RMK** to Extra. (Good job Bob) Last month's meeting minutes were approved.

Membership report **Ted NW8W Reported** that we should abscond with some new members.

Kathy KC8WNL gave the Treasurer's report. \$4718.05 in the general fund, \$140.68 in the Youth forum and \$172.33 in the Repeater fund

Mark Castiglione, N8REZ

Net point report was given by **Vince WA8BIJ** W8VO has 1700, K8VFR with 2000, WU8C -3600 and WG8U with 5100 points. QSL report shows 23 eQSL received. 1 from the Lightship in 2001, Field day 10-2, FD 11-3, FD 12-4, FD 13-1, MiQP12 2, MiQP13-10. There were 6 rejects (We will not name them and add to their embarrassment). 1372 eQSL + 92 direct QSL cards since 9-5-2003. Tonight's program will be (was) "A Brief History of Military Communications" presented by Jerry Begel/W9NPI.

Jim K8LFE gave the report of upcoming ham radio events. (Printed elsewhere in the TC)

Ted said we found 3 new members, but still would like more to join.

Repeater report, **Doug N8PYN** Machine is still repeating. Web site had no changes. "Where Doug " is (was) at the Mi QSO party in Lapeer.

N8GEO Gregg, reported that the Dayton rooms are ok but some experienced a minor confirmation issue. K8EO checked out the hotel and reported that there was no train in the backyard.

Old Biz: Michigan QSO party was discussed, downloading of log issues addressed.

New Biz: N8PYN asked for discussion on providing funds for the Youth Forum. W5WCS said give em the dough, (\$500) and N8GEO seconded it. The vote approved the motion. Then WA8BIJ wanted to spend \$500 on door prizes to be purchased in Dayton. W8VO agreed, another vote approved that expenditure.

John N8NXW Talked about MCCC tech session which will be on the last Thursday of the month at 7 pm. Bring a project to work on.

The meeting was adjourned and the program began.

Respectfully submitted by N8REZ

Membership Report

Our member database now shows 59 members, up (1) from last month because of a late renewal. This includes those (10) who are life members.

As always, be on the lookout for those who are interested in Amateur Radio, especially young persons. Show them what this is all about and stress that this is an activity that can be done at home, and can involve the computers with which they are so familiar.

4/23/14

Ted MacKinnon, NW8W

Peach of a Ride

Submitted by Don / N8KNS

Hi to one and all:

The 2014 Slow Spokes Peach of a Ride will be Sun. Aug. 24, 2014.

It's time to start recruiting radio operators to ride in sag vehicles and rest stop operators for the Slow Spokes Peach of a Ride. I am looking for any Ham Radio operators interested in helping with this years event. Here are the details.

The riders like knowing we are out there keeping an eye on things and are available in case of a problem. There will be 23, 32, 60, 100 mile routes.

A mobile radio with mag mount antenna works best for sags. Sag operators will ride with a driver in their vehicle unless you prefer using your vehicle. If you are stationed at a rest stop a mobile rig and an antenna that can be raised 15 or more feet would be good. We may use a simplex frequency as some of the stops are quit a distance. If you have a preference for sag or rest stop I will try to accommodate if the position is not taken.

Meet at Memphis Jr. High School 34165 Bordman Rd. Memphis Mi. 48041 West of Memphis at 7 am. Riders are to be finished by 4pm. Memphis is North of Richmond on M-19.

We will use 147.300 with 100hz.pl., this usually seems to work the best for this area. Also have 146.58 simplex in your radio just in case. Talk in will be 147.200 with 100 hz. pl.

Any questions or if you can help please email me at windhorstpc@yahoo.com or call my home 586-978-0184. If you get my answering machine please leave your name, call sign and a call back number and I will call back. Your help is appreciated.

Thank You

Don Windhorst/N8KNS

Email: windhorstpc@yahoo.com

MIQP 2014 is in the Log!

By John / N8FYL

N8LC was on the air for the 2014 Michigan QSO party. Led by “Motivator in Chief” Doug / N8PYN, this year’s multi-transmitter multi-operator station was located at Metamora-Hadley State Recreation Area, in Lapeer county. Set up was on Friday, April 18. The weather was sunny and in the high 50’s with a light breeze. Much more pleasant than the 40’s and high winds we experienced last year in Huron county. N8PYN, KD8LLT, and N8FYL started setting up then 40 & 80 meter fan dipole antenna provided by K8HVI. This antenna would be used by the 40/80 phone station set up in N8PYN’s trailer. Following that success, we set up KD8LLT’s G5RV to connect with his TS-480SAT setup in the GMC Envoy of N8FYL. Using KD8LLT’s air powered antenna launcher (built for him by his uncle, David) we were able to get the G5RV up so the feed point was high enough that the end of the ladder line where the coax connects was about 5 feet above the ground. The entire antenna was in the clear.

Saturday the 19th was clear, but cooler. In the morning we got the two stations set up and wirelessly networked the 2 logging computers. At contest start time we were ready to go! Later in the afternoon, K8HVI arrived. Marty set up another 40 meter antenna—a “double bazooka”, and installed his Kenwood TS-480SAT in Doug’s trailer. Now we had three stations! Towards evening, N8GEO (and XYL Robin) stopped by for some visiting and Gregg did some operation on 40M. After the contest ended at midnight, we took down all the antennas and were done by 1 AM. N8FYL, KD8LLT, and K8HVI headed for home while N8PYN and KC8WNK enjoyed another night of “camping” in their trailer.

Bands were okay, but only one QSO one 20M, and none on 15 and 10. Overall contest participation seemed lower this year. Probably the Easter weekend effect. While N8LC didn’t do nearly as well in the scoring as in 2013, we did have a good time operating the contest.

Campfire!

Dayton Hamvention Youth Forum- 2014

Submitted by Ralph / W8ROI

Well, it's that time again. Dayton. In just a few weeks some of us will be heading down I-75 to Dayton to spend a weekend looking at new gear, old 'treasures', and some downright JUNK! But, since one man's trash is another man's treasure, no telling what might come back up I-75 on Saturday, Sunday or perhaps Monday, for those who like to take it easy.

One thing that has been part of many LCARC people's time in Dayton is the Youth Forum. Carole Perry, a retired schoolteacher, has been the Moderator of the Youth Forum since its inception. Carole incorporated an electronics- radio class into her school's curriculum and although a ham license was not one of the requirements, it was certainly possible for a student to end up the school year with a Novice or Tech License. (Yes, I think that it went back far enough for the Novice license.)

No one got through that school without taking that class. It was basically a science class, and students were introduced to the basics of electricity, and learned about related things like their family's monthly electric bill. They learned the subtle distinction between power and energy, and how to look at a rating tag on an appliance and figure out how much it would cost to operate it.

But, I digress!

Carole locates a handful of teen-agers every year who have a bit of stage presence and something to say about ham radio; how they found out about it; or some activity which has interested them for some time. They have ranged in age from eight to eighteen. Not to say that a seven year old could not be one of her presenters. Just a matter of time.

I stumbled onto the Youth Forum many years back when, honestly, I was looking for a place to sit down! I heard someone say, rather loudly, that the Youth Forum was about to start, so I followed the sound and went into the room. Shortly after that, Carole hushed the crowd and introduced herself and started the festivities.

Neither of us are sure which year this was, but the

following year, I took my camcorder and got there early. I got a bit of the Forum on videotape and showed it to a few people. The following year one of our members was going to be down in Dayton visiting some family who lived in that area. I encouraged her and her father and brother to attend the Youth Forum. They did, and a week or so later, she told me that she had already spoken to one of the presenters. Two fellows from Windsor put on their presentation about youth activities in their town.

After Dayton, she bumped into this fellow on the air and complimented him on his Dayton presentation. They started meeting on the air, and it became a game for them to find a private frequency. It was just a matter of time before they had company.

I took her and her brother to a number of area swaps in the 90s and guess what? This guy from Windsor started showing up as well. They would meet each other and wander around the swap together. They were sort of hooked on each other.

To make a long story short, Erin, KD4YLR and Don, VA3DJL have been married for well over 10 years now, and have a five year old son. Ham radio can benefit people in a number of ways!

Anyway, the Youth Forum runs Saturday morning from 9:15 AM, to 12:15 PM, in Room 1. I don't know how many will be interested in sitting in there for three hours, but it would be nice to see some LCARC people there during the last hour or so, to possibly get some recognition for our ongoing contributions to the Forum. And, now, several ham gear distributors are donating prizes for the Adult Raffle. Several great HF rigs have been taken home by some adults in the past few years, and several HTs as well.

Last year one of our member's grandson won one of the youth door prizes. Just no telling what might happen if you are in there.

Hope to see you at the Dayton Youth Forum!

73, Ralph / W8ROI

Help for New Hams

By Dan Romanchik, KB6NU

In a box of stuff recently donated to [WA2HOM](#), our amateur radio station at the [Ann Arbor Hands-On Museum](#), there was a book *W1FB's Help for New Hams* by Doug DeMaw, W1FB. This book hits on just about all the topics that a new ham in the late 1980s would want to know about, and W1FB does a great job of walking the new ham through these topics.

Of course, being 25 years old, some of it, is out-of-date, and it doesn't cover some questions that a new ham today would ask. For example, there's nothing in this book about digital modes or using a computer in the shack.

So, I'm thinking of writing my own *Help for New Hams*. Mine would probably be a little less HF-centric and include advice on joining clubs and how to use a computer in the shack. I am also thinking that maybe I should write two separate versions: an HF version and a VHF version.

At any rate, I've listed the chapters of the W1FB version below. If you have any comments about what I should include in my version, I'd love to hear from you.

- The Newly Licensed Amateur. This chapter talks mainly about how to choose equipment, but also covers some of the modes that amateur radio operators can use.
- Your New Equipment—Getting Acquainted. This chapter discusses how to use the features of modern transceivers, amplifiers, and antenna tuners. It also talks a little bit about antennas and SWR.
- Constructing and Using Antennas. This chapter goes into greater depth on antennas. It discusses the different types of antennas, how to feed them, and how to bring feed lines into the shack.
- Station Layout and Safety. This chapter covers the practical aspects of setting up an amateur radio station, including desk and chair selection and station wiring.
- TVI and RFI—Strange Bedfellows. TVI and RFI are less of a problem these days than back in the 80s, but it's still something new hams need to know about.
- Operating Problems and Fears. This chapter discusses some of the operating problems new hams face, including honesty in signal reporting, how to operate split and how to work DX.
- On-the-Air Conduct and Procedures. This chapter discusses more operating procedures, including calling CQ, how to operate via a repeater, and how to ID.
- Station Accessories—What to Buy? This chapter discusses a variety of station accessories including keys and keyers, microphones, antenna tuners, phone patches (!), and antenna switches.
- DX and Contest Operating. This chapter not only discusses operating procedures, but how certain equipment features will help the new ham work more DX and score better in contests.
- Logging, QSL Cards, and Record Keeping. This chapter discusses why it is important to keep logs and how to QSL.
- Obtaining Accurate Information. This chapter is basically an ad for the ARRL, counseling the new ham to join the ARRL and buy ARRL books.

I am especially interested in hearing from new hams about these topics. What about amateur radio confused you at first? What information would have helped you have more fun with amateur radio? What do you know now that you wish you had known when you got started?

When he's not writing about amateur radio, Dan, KB6NU enjoys Elmering new hams and working CW on the HF bands. For more information about his operating activities and his "No-Nonsense" series of amateur radio license study guides, go to [KB6NU.Com](#) or e-mail cwgeek@kb6nu.com.

Phone: (248) 740-2693

Submissions can be accepted in any of the standard PC formats. Microsoft Office 2010 and earlier, Open Office, plain text, rich text, PDFs, and any type of image format. Unfortunately audio files and movies cannot be accepted, as they cannot be reproduced on paper, but links can be reproduced to these types of media if you'd like to provide a link.

Dayton Bus Trip—2014

Dear Fellow Radio Amateur,

Once again, it is that time of year when lots of hams around the world start thinking of the Dayton Hamvention. After all, with 25,000 attendees from all amateur radio interest areas, what's not to like!

Don't you wish you were going? You're not looking forward to that long drive? Don't drive! Take the Arrow bus! It's inexpensive and easy.

As in years past, The Arrow Communication Association is sponsoring a bus trip from Ann Arbor to Hara Arena and back. The date is Saturday, May 17. We leave the park-and-ride at 4:30 am and get to the show at 8:00 am. We come back comfortably at 5:30 pm. A continental breakfast is included on board. What more could you ask for?

There is more. If you want to sell your stuff in the flea market, we have reserved a space there just for you! Every year, Arrow reserves a swap spot just for the bus trip crowd. You save \$70.00.

The cost is \$65.00 for the round trip. That's \$60.00 if we receive your application before April 1.

Please mail all applications to ARROW Communication Association, 3322 Yellowstone Drive, Ann Arbor, MI 48105. Please note that this does not include the Hamvention ticket. That one you will have to do yourself! You may also use the link below to purchase a seat using Paypal.

We are trying to generate as much publicity as possible. If you can, please share this information as widely as you are able. If you have a web page, please consider adding a paragraph about the trip and a link to

<http://www.w8pgw.org/activities/dayton-bus-trip/> or simply <http://www.w8pgw.org>. Talk it up on the air! If you check into a state wide or regional net, please mention it there, also.

We at Arrow deeply appreciate your help in this matter and we thank you.

73,

John Wasciuk, WA8TON / VO1TON

The [DL2NBY Contest Calendar](#) is another calendar source. It includes the ability to add events to your own Google calendar as well as import to Outlook, Thunderbird, and more.

Interesting Web Sites & Miscellany

This space is set aside for those items that do not fall into any particular category. If you have an interesting Web Site or similar information like a Net or SWL frequency, this is the place to spread the word.

“The Hamband”, a music group, is Andrew (G3WZZ / OZ1XJ / OZ5E), his wife Lisa, and a group of Nashville session musicians.
