

THE PACIFIC-ASIAN LOG

7th Edition – January 2005 – by Frequency

Introduction

This is the seventh edition of the Pacific Asian Log. First issued in August 2001, The PAL lists all known medium wave broadcasting stations in southern and eastern Asia and the Pacific. It covers an area extending as far west as Afghanistan and as far east as Alaska, or roughly one half of the earth's surface! It now lists over 4000 stations in 60 countries, with frequencies, call signs, locations, power, networks, schedules, languages, formats, networks and other information. The log also includes longwave broadcasters, as well as medium wave beacons and weather stations in the region.

I continue to receive many positive comments and constructive criticism on the Log. Thanks to everyone who has written. If you find this list useful, then please send me your comments, corrections, updates, changes, and suggestions for improving it.

Countries Listed in this Log

Here are the countries listed in the log. In order to save space in the log, I'm using 1-3 letter abbreviations for country names. These are usually the official ITU designation. In some cases, such as Sri Lanka, I've used a different abbreviation to facilitate sorting. For places without ITU abbreviations, such as US & French territories, I've made up my own. The right-hand column shows each country's time zone relative to UTC.

The following countries have no known MW stations: Bhutan, Niue, Singapore, and some U.S. island territories.

Abbreviations & Comments

Frequency: To facilitate sorting, all stations are listed to the nearest kHz. See the comments column for information on off channel operations. To the right of the frequency, I've noted stations which vary in frequency with a v, those which are currently inactive with a *, and future stations (not yet on the air) with an f. A ? means uncertain status (not clear if it's still operating).

Call: The station's government-assigned call letters

Network/ Slogan: This is generally the Network or Station name as announced on the air (or the English translation of it). Numbers or letters at the end refer to the network (1,2, etc., L or lcl = local program). Slogans for American and Australian commercial stations are informal/unofficial and subject to change. For Philippine stations, I've shown the name of the owner (often used on the air) plus informal slogans (where known).

Days of the week are intended to be UTC, and may not be the same as local dates, i.e. 0100 local time on Monday in Japan is actually 1600 Sunday UTC. KOREA (SOUTH):

KBS1 is a 24-hour network of news, sports, and public affairs programs. There are a number of key regional stations, each of which feeds a number of lower-powered repeaters in neighboring towns.

The regional stations generally have local programs 2335-2357 0210-0240 and 0710-0757. Two of the blocks are produced at the local broadcast station level and are sent to any relay stations which may be subordinate to the broadcast station. One of the time blocks is for provincial level programming and is relayed by all broadcast stations and relay stations within the provincial level network. Sometimes two provinces can be combined into one provincial level network. The balance of the programming originates from Seoul and is carried by all stations in the network.

Local ID's are inserted at the top of the hour, but may or may not be broadcast every hour.

The concept of broadcast station versus relay station is important because it appears that relay stations might not broadcast their own programming. All the KBS1 stations for Seoul and Gyeonggi Province relay HLKA-711 100% of the time. HLKA is also relayed on 3930 kHz.

KBS 1 stations operate on 540, 567, 594, 621, 630, 648, 657, 675, 711, 738, 747, 756, 783, 846, 864, 882, 891, 909, 918, 927945, 963, 1026, 1026, 1035, 1044, 1062, 1089, 1098, 1152, 1206, 1233, 1260, 1269, 1278, 1305, 1323, 1341, 1395, 1449, 1458, 1467, 1485, 1485, 1503, 1539, 1584, and 1602.

KBS2 is an arts and culture network and operates 22 hours per day on 558 and 603 kHz.

KBS3 is also known as the "Voice of Love" and has programming for the disabled 21 hours per day. It operates on 576, 639, 675, 936, 1008, and 1224.

Liberty Network is government-operated with programs intended for listeners in North Korea on 972 and 1134 kHz.

Christian Broadcasting System operates 24 hours from Seoul on 837 kHz. The other outlets operate 20 hours a day on 999, 1251, 1314, and 1404. The website is <http://www.cbs.co.kr/>

Munhwa Broadcasting Corporation is a privately operated commercial network with varied programming. See the station listings for local program breaks as of April 2004 (compiled by Bill Harms). The main station is HLKV-900 in Seoul. Most stations carry local programs and news several times during the day. See individual listings for details.

All MBC stations carry local programs 1305-1400 and 1405-1500 daily, so don't expect parallel programming at those times. All stations broadcast a local sign on announcement daily at 1955-2000. MBC stations operate on 765, 774, 810, 819, 846, 855, 900, 990, 1017, 1080, 1107, 1161, 1215, 1242, 1287, 1332, 1350, and 1386.
