## 6. Summary of Current Actions

Situation Summary (for the table top):

There has been a computer update for the software used by the power companies in Gainesville. It failed, and power is out (including all the cell towers) until the computers can be fixed. Land lines and HAM radio equipment on auxiliary power work. In the meantime, a tourist bus carrying elderly folks stalled on the interstate, leaving a number of people in danger of heat exposure issues. Some of them were hoping to arrive in Tampa in time to take a cruise ship to Mexico.

The stricken tourists are taken to a local shelter to remain cool. We are assigned to keep the EOC apprised of their needs and provide information to them as it is available.

Current and planned objectives: (Use this scenario to explore the following practice tasks)

1. Make sure Vann can set up and use the shelter WIFI. We need to find out if we need to build another one, or if Gordon's is available.
2. Make sure we have enough digital facility to transmit the bulletin (digital) from the EOC to the shelter. HF 10 m worked for the fire exercise.
3. Go over options to send a picture over the radio.
4. Get a demo of the new repeater and determine how it might be deployed.
5. Find out more about the Trenton repeater and obtain contact with the people who run it.
6. Originate a radiogram taken from an ICS 213 and transmit it for reception between 2 teams at Gordon's house and to the 'EOC' at Leland's

Nominative shelter and message relay at Gordon's house; nominative EOC at Leland's house

## 7. Current Organization

**8. Resources Summary**

Resources Ordered	Resource Identification	ETA	On Scene	Location/Assignment
2 HF radio with digital capabilities and antenna				
VHF radio and antenna ? Digital setup				
Shelter WIFI set up				
3 VHF handi-talkie simplex				
Smart phones				
1 ATT phone
