

ISLANDS OF THE WORLD

< The Mediterranean >

Diploma

This award is finalized to acknowledge that you have established contact and received QSL card from radio amateurs operating from islands scattered in the Mediterranean Sea. To be valid an island must have an IOTA reference number, that is it must be listed in the IOTA official list. Please refer to Table A) below for a list of valid islands for this specific diploma. Only different IOTA refs will be valid.

If an island is part of a group of islands with the same IOTA reference, only one island will be accepted. Example: EU-054 refers to Egadi Islands IF9 which is a group formed by 10 islands, but you may utilize this reference only once.

Portable operations are accepted (example: EA6/DL1AA, TA0/F2AA, IM0/IS0AA ...)
