

CEPT/ERC/ RECOMMENDATION 21-13 E (Brussels 1994)**LICENSING REGIME FOR DIGITAL EUROPEAN CORDLESS TELECOMMUNICATIONS (DECT)
EQUIPMENT**

Text of the Recommendation adopted by the "European Radiocommunications Committee" (ERC):

"The European Conference of Postal and Telecommunications Administrations (CEPT),

considering that

- a) TBR 6 has been published and the corresponding CTR 6 has entered into force;
- b) the DECT standard provides for a wide variety of applications, such as cordless telephones, wireless PABXs, public access, local loop replacement and radio local area networks;
- c) the technical specifications stated in the relevant TBRs cover all the requirements necessary to guarantee full compatibility between the various applications offered by the DECT standard;
- d) the frequency band 1880-1900 MHz has been designated for DECT in CEPT Recommendation T/R 22-02 and in Council Directive 91/287/EEC,

recognising that

the issue of telecommunication licenses (e.g. public services) is outside the scope of this Recommendation.

recommends that

- a) CEPT Administrations shall not require an individual licence for DECT equipment conforming to TBR 6 and operating on frequencies specified by ERC."
