# 20M DXCC QSL CARDS ON4UN

SMOM is a fully independent entity with an ancient tradition and glorious history. Founded in 1099, recognized in 1113 by Pope Paschal II, from 1310 to 1522 SMOM had the sovereignty on the island of Rhodes, and from 1530 to 1798 on the island of Malta. Then, after temporary Sees, the Order finally established itself in 1834 in Rome, where it holds several extra-territorial areas. Its members are known as the "Knights of Rhodes and Malta". Under the provisions of International Law, the Order maintains diplomatic relations with many countries as well as with the main International Organizations. His Most Eminent Highness the Prince and Grand Master of the Order, rules a world-wide organization dedicated solely, as its ancient tradition dictates, to providing assistance in the hospitaller, charitable and social fields. The station 1A0KM (Knights of Malta) has been activated by the International Committee of Radioamateurs for UNICEF on the occasion of the earthquake occurred in southern Italy in November 1980.

#### EQUIPMENT:

TRANSCEIVERS: FT901DM — Loaned by YASEU.

LINEARS: Clipperton — Loaned by Dentron.

ANTENNAS: Monoband Beams for 10, 15, 20 meters, 18 AVT — Donated by Hygain.

HEADSETS: By Telex.

Travelling in the yacht "Banyandah", the DX-pedition spent 10 days in the South China Sea before finding an unoccupied island in the Spratly Group in Latitude 8°04' N and Longitude 113°12' E. After being turned back twice from other possible operating sites, once by gunfire, the DX-pedition made a landing and operated for 72 hours making 13,226 QSO's on 10, 15 and 20 meters on phone and CW. *Our sincere thanks to NCDXF for their generous support, and to the above companies for their help with equipment and to all those amateurs who in so many ways assisted in making this DX-pedition successful.*

Conway Reef or Ceva-I-Ra to the Fijians – is a treeless, waterless, coral cay 50 by 200 m at high tide, 300 miles SW of Suva, Fiji. Although tiny, it is of major economic importance to Fiji, as it defines the southern limits of its Economic Zone. The primary inhabitants are birds and hermit crabs. The fringing reef, combined with the current and wind, creates a treacherous surf and dangerous landing conditions.

Our team arrived in the ketch »Te Ni« after 3 days' sail from Suva. While bringing equipment ashore, we capsized two dinghies, losing critical equipment and some of our confidence. Abandonment of the DXpedition was considered, but in the end we were determined to get on the air – even if it meant using only one barefoot station. Although we lost two days' operating, no more accidents occurred, and we eventually put three stations on the air.

We made almost 30,000 QSO's on 9 bands and 3 modes in 7 full days of operation. While the SSB stations had a working amplifier, the two CW/RTTY stations experienced amplifier problems and operated barefoot most of the time.

We hope you enjoyed your QSO's with Conway Reef.

We wish to acknowledge the contributions and assistance of those who helped ensure the success of this operation, including:

Republic of Fiji Home affairs, Immigration and Telecommunication authorities. 3D2JO, Mr Villikesa, 3D2ER, NØAFW, KJ6HO, NF6S, NW6P, AB6ZV, W6EL, AB6LJ, AF6S, JA3AFF, Ehime DX Group, DX Family Foundation, HDXG, JF11ST, JH1AJT, Kazamidori ARC, SK7DX, Chiltern DX-Club, RSGB DX-fund, Lake Wettern DX-group, DGØZB, W4ETO, HRO, DuneStar, N6BT, Heil, Timewave Technology, Svetlana Electron Devices, AEA, SM7CMY, OH2MM, OH-DX'ers, YKØA-group, Captain Arnold and Jytte 3D2AJ on S/Y »Te-Ni«

## THE FIRST AMATEUR RADIO OPERATION FROM ROTUMA ISLAND

confirming qso	DATE	UTC	MHz	2-way	RS
1982	Oct 29 30 <b>31</b> 2 3 4	1708	14	SSB	5/3

**Fiji** The „Happy Islands“ as Fiji-Islands are often called, consist of more than 500 volcanic isl. and coral-atolls. About hundred are inhabited. The islands are situated on the date-line in the south-pacific.

**Rotuma** 172° E – 12° S – ca. 643 km north of Suva has a surface of 32 sqm. Population is around 2800, 50% younger than 20 years old. There are 4 missionaries. Electricity exists only by some rare emergency-generators. There is no hotel. So invitation came from the Rotuma Island Council.

**Equipment** IC 730 + TS 130 S + DFC 230 – Antennas 3 elem triband Yagi + 40 m-loop.  
**Operation** 10. 182 qso both together on 4 bands in 6 days/70 hours in all.

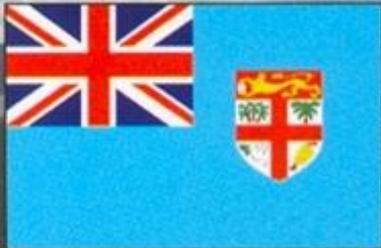

**Thanks** Our special thanks to  
 H. E. Mr. R. Puissant, Ambassador of France in Fiji  
 UTA, which – by error-reduced the flight fares  
 All Plane-pilots bringing us safe back  
 The Rotuma Island Council for their friendly hospitality and help

## BOUVETØYA

The island was discovered January 1, 1739 by Frenchman Jean-Baptiste Lozier Bouvet. It was the first known sighting of land south of 50° South. The first landing was by an American expedition in 1823. The island was more accurately positioned by the German Valdivia expedition in 1898-99.

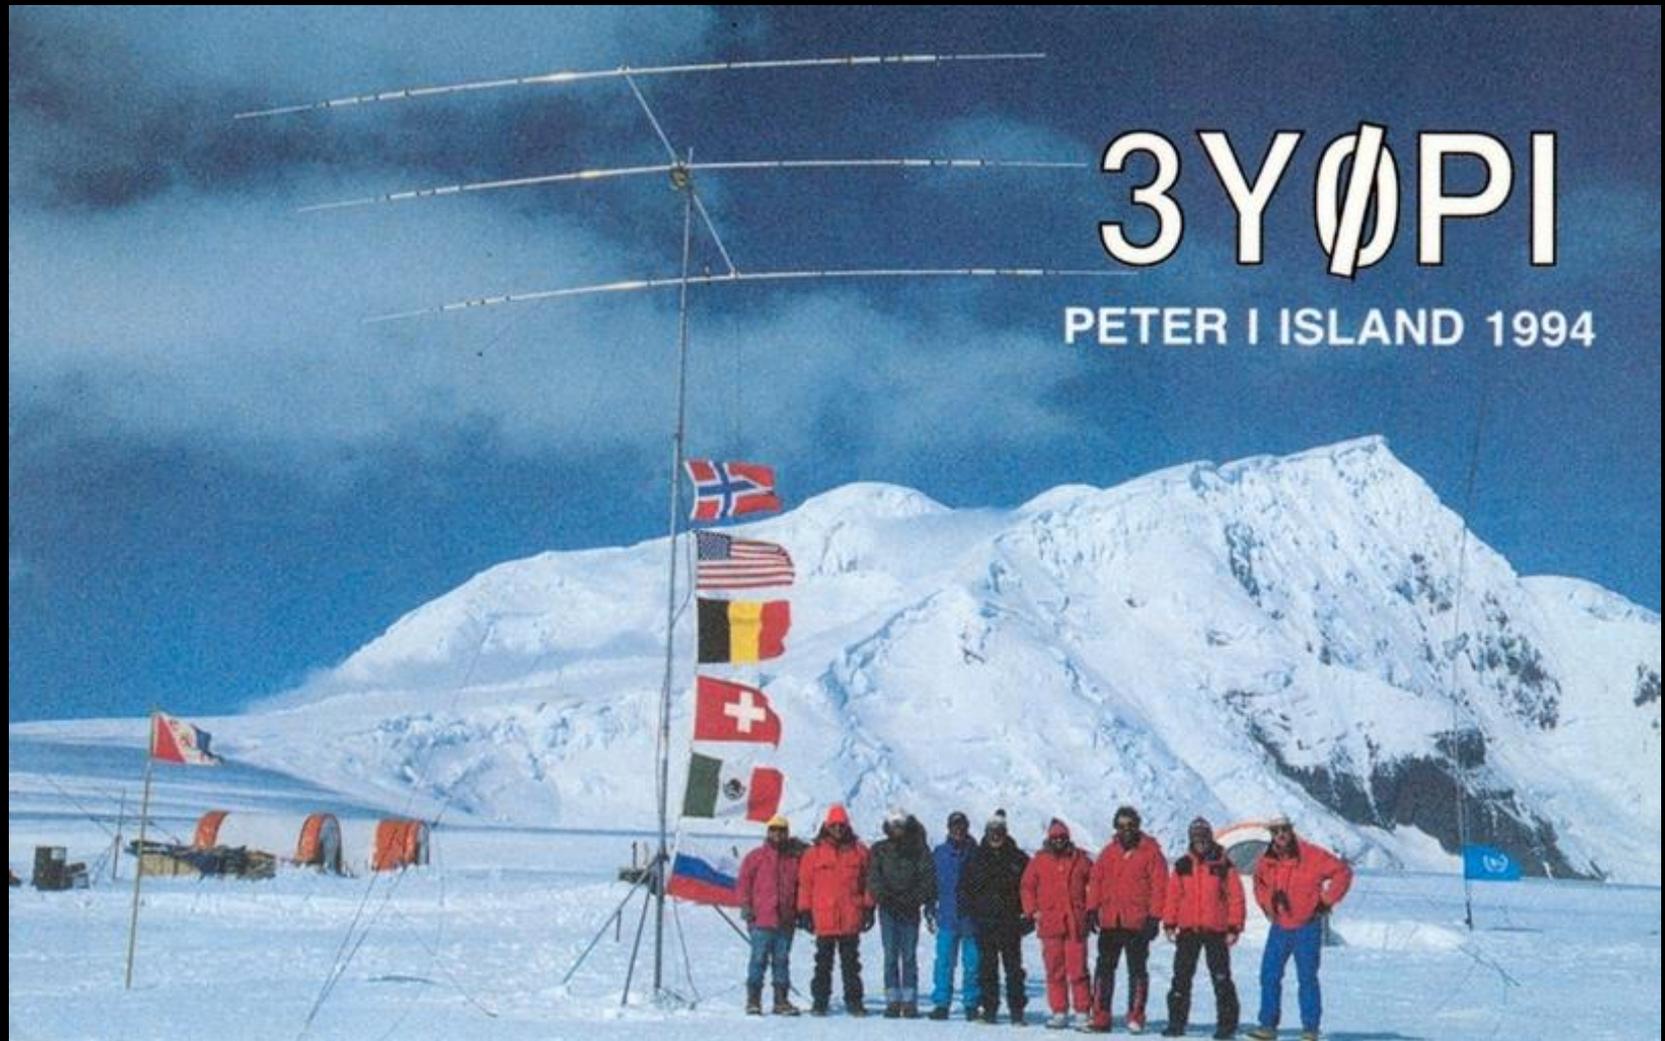

In the 1927-28 southern summer Consul Lars Christensen of Norway equipped the vessel SS Norvegia for scientific research in the South Atlantic, and the expedition landed and claimed the island for Norway on December 1, 1927.

A Norwegian law of 1930 gave the island status as dependency. It abounds with seals, penguins and other sea birds. By a Royal Resolution in 1935 sealing was prohibited on the island, and a Royal Decree of 1971 declares the island as a nature reserve.

The island is located at 54°25' S and 3°21' E, and measures about 6 by 9km. Fully 93% of the island is covered by ice, and steep cliffs almost around the whole coast, together with high seas make landing very difficult. The island is located at the southern end of the Mid-Atlantic ridge, and is an extinct volcano. No volcanic eruptions have been registered by visitors, but fumaroles are frequently observed.

The area Nyrøysa was formed by a large rock-slide between 1955 and 1957. This area on the west coast of the island is the only safe site for expedition camps. It forms a plateau rising to an elevation of about 50m above the sea-level. Past Norwegian expeditions had made an accumulated total of about 2500 QSO's from the island : 3Y1VC and 3Y3CC in 1977, 3Y1VC and 3Y5DQ in 1978-1979.

**PETER I, THE ISLAND AND THE STORY:** Peter I Island (IOTA AN-004), located at 69°S - 90°W, is one of the world's most isolated Antarctic islands and the most wanted DXCC country. Peter I measures 23 by 10 km and consists of a 1670 m high extinct volcano, with steep and inaccessible rock cliffs and tide-water glaciers rising out of icy sea at three sides and a large glacier covering the North part of the isle. Peter I was discovered in 1821 by Von Bellingshausen who named it after the Russian Czar Peter the Great. In 1927, Captain Anderssen was the first to land on the isle, claiming it for Norway. In 1987, two brave radio-amateurs, LA1EE and LA2GV made the first 17,000 QSOs from Peter I as 3Y1EE and 3Y2GV. The 3Y0PI team would be the first to stay on the island without a support ship standing off shore. The 3Y0PI team left for the Falklands in January '94. We made 6000 QSOs as VP8BZL while waiting for the MV Kapitan Khlebnikov, our chartered Russian icebreaker. After a rocky 6 day trip, we arrived at Peter I on Jan 29. The team members and hundreds of crates -total weight over 10 tons- were landed in 4 hours using the ship's two helicopters. The team stayed on the island for 22 days, making over 60,000 QSOs from Feb 1 to 16, doing meteorological observations and taking soil samples. During our stay, we were plagued with major solar storms and auroral conditions. Temperatures varied between + 11°C and -15°C. The regular blizzards with speeds up to 120 km/h and nil visibility dropped the chill factor down to -60°C, and caused snow drifts up to 3 m high, making it a continuous battle to keep the antennas up, and to dig crates and generators out of the snow.

After a dense fog delayed our helicopter departure from Peter I for four days, we sailed on the RV Akademik Federov to King George island (South Shetlands), landing there on Feb 24. Waiting for another four days until our chartered Hercules plane could fly in, we made 1000 QSOs from the Russian Von Bellingshausen station. After a 7 week adventure, crossing 5 continents and 9 countries, travelling well over 50,000 km, using 15 different types of transportation and ... making 70,000 QSOs, the team members arrived home on March 1-2.

The cost of this expedition exceeded \$ 200,000. The complete 3Y0PI story is described in a book by KK6EK. This book, together with the sale of 3Y0PI souvenir mugs and the expedition video, will help us recover our expenses.

*It was an honour serving you, the international DX community. We hope you enjoyed the expedition as much as we did!*

## A NEW COUNTRY BY POPULAR VOTE

### THE STORY OF THOSE 117,000 QSOs AT 403T

No doubt the participants and operators of 403T value one experience above everything else. The beauty and cleanliness of this coastal country coupled with the friendliness and hospitality of its people will make Montenegro everyone's favorite. It's simply a new DXCC country worth a visit – a beauty not to be missed.

This "Hidden Pearl of the Mediterranean" boasts 293 kilometers of beautiful Adriatic Sea coastline dotted with three 403T stations. Huge beams radiated RF power to faraway lands to salute this new Republic on its birth. People from 16 countries participated in the DX Festival at various times during a period of three weeks.

But along with the Montenegro experience, people who had never met before proved that one common denominator – DX – would bring them together in a friendly manner to witness an event of their lifetime with team building and group dynamics as well as with enough operating hours under their belts to sense the lifeline of DXpeditioning – running pileups day in and day out on all bands.

We owe a great debt of gratitude to Ranko, YT6A and Dragan, YT6Y along with the Organizing Committee for their efforts in providing those present and others out in the world with one more DXperience and another mega DXpedition as those with more than 100K QSOs are often classified.

We thank Telecom Authority (AGENTEL), NCDXF, EUDXF, Vertex Standard (Yaesu), SteppiR, Acom, Intrograf and SKY Contest Club for their valuable support.

 ANTENNAS: R7, A3S, dipoles

Our DX-pedition was organized by the Radio Club of Youth Organizations Committee and the Bureau of Communications of the Revolutionary Committee of Libya. We were active from July, 11, 1995 to July, 25, 1995 on all bands CW and SSB. During this time we made over 35,000 contacts. We had organized the first Libyan Youth Radio Club on the base of International ASSAKR club. We express our hearty gratitude to everyone, who made the 5A1A operation possible: the Bureau of Communications of the Revolutionary Committee of the Great Socialist People's Libyan Arab Jamahiriya, the Government of Libya, the Government of Ukraine.

We would like also personally thank to: Mr. Seid Shenfir, Mr. Sharaf Mohammed Al-Haiali, Mr. Nick Tsymbal, Mr. Alex Chizh, Mr. Valery Eshchenko, Mr. Rafaa Elmadani, Mr. Ali Abdullah Ahlab, Mr. Mohamed Khlaf, Mr. Ali Joida, Mr. Usaama Ismail, Mr. Saddyk, W4BRE, K2ENT, JA1BK, JH1AJT, JK1KRS, JR1IOS, K1GW, UU8JJ, LZ2UA, OM3JW, UX0UN, UT5UT, I0ZV, IK0DWN, IK2ILH, I2MQP, HA8XX and many, many amateurs from around the world for making this such a highly successful DX-pedition.

5X1T confirms QSO.

Thanks to ON5NT for QSL service!

I had a wonderful time in Kampala with Peter Casier's family. Thanks to Tine and Peter for a very pleasant and interesting stay in Uganda. During the CQ WW CW contest 1997, I operated with Peter's callsign, 5X1T, in 20m single band, setting a new record for zone 37. Outside the contest I operated as 5X1M.

When putting up the 80m vertical, one of the fiber sections broke. What do you do when you are in a place near the equator and where you don't easily find a do-it-yourself shop? You look for bamboo in your own backyard. So if you hear 5X1T on 80m these days, ask him about his bamboo vertical!

DL2CC is: Frank Grossmann, Schwabstrasse 22, D-70197 Stuttgart, Germany  
E-mail: frank@grossmann.com

CW forever!

73, see you next contest - *Frank*

1990-AUG-19	0919	10	CW	599

From Aug. 12<sup>th</sup> to Aug. 21<sup>st</sup> 1990, I had the opportunity to operate out of Blantyre in Southern Malawi. During a nine day's DX-Pedition, I made about 6.500 CW-QSO's, while using the call sign 7Q7CW. My equipment was an FT 757 GX and a FL 2100 Z linear, which came to a total weight of 53 Kg. Wire antennas like Slopers, Windoms and beams, with a total length of 250 m, were used for the nine different shortwave bands.

See you from a next spot !!					TTY

As telecom consultant for the United Nations' High Commissioner for Refugees in Goma, Zaire, I was responsible for the VHF & HF networks and satellite communications. I also supervised a group of operators manning the radio room around the clock. This radio room was the centre of communications and security for the relief organizations working in North-Kivu with Goma as epicentre. And earth shaking activity was abound. One vulcano was in eruption, spitting out smoke during the day and showing a fierce red glow at night. Earth shaking on another level was the influx of the 1,000,000 Rwandese refugees who fled the massacres of last year, living in the four main camps of the area.

A total of 12,000 QSOs were made during my two months mission, incl. 4U0ITU from Geneva and 9Q5TT & 4U9Q during my stay in this hot spot. Equipment used : Yaesu FT900/AT and FL7000 amplifier (thanks Yaesu Europe), a Cushcraft R7 (thanks Oklahoma Comm Center) and a homebrew lowband toploaded vertical (thanks ON4UN). John, ON4UN, also lent me his PK232 for the 700 RTTY contacts and Leon, ON5TW, let me use his tuner. Further thanks go to the expatriates ham gang of Goma (calling themselves 'Antennes Sans Frontières'), the 4U1ITU crew, to Hugo, ON7GB, for sponsoring the QSLs and Ghis, ON5NT, my faithful QSL manager.

I dedicate this operation to Lana, our two months old daughter. May she grow up in a world where humanitarian actions of this scale are not needed anymore.

73, Peter - ON6TT

Burundi is a landlocked country with an equatorial climate. Called "The heart of Africa" it lies on a rolling plateau, with Lake Tanganyika in its south west corner. It is bordered by Rwanda on the north, Tanzania on the south and east, and the Democratic Republic of the Congo on the west. It became his independence in 1962.

We operated simultaneously with up to four stations from 160m to 6m. We logged 33503 QSO's, including 127 on 160m, 1721 on 80m, 2547 on 40m, 3441 on 30m, 3296 on RTTY, 349 on PSK31, 50 on SSTV and 5 on 6m WSJT EME.

Many thanks to all who made this DXpedition possible, especially Floyd, N5FG and Bernd, DF3CB for the pilot and website support.

Botswana is a landlocked country in Southern Africa. It is bordered by South Africa to the south and southeast, Namibia to the west, Zambia to the north, and Zimbabwe to the northeast. It is dominated by the Kalahari Desert, which covers up to 70% of the land surface of the country. The Okavango Delta, the world's largest inland delta, is in the northwest. The Makgadikgadi Pan, a large salt pan lies in the north.

We operated simultaneously with up to four stations from 160m to 10m. 27372 QSOs were logged, including 140 on 160m, 1560 on 80m, 3477 on 40m, 2890 on 30m, 1158 on RTTY, 724 on PSK31 and 22 on SSTV.

Many thanks to all who made this DXpedition possible, especially Floyd, N5FG and Bernd, DF3CB for the pilot and website support.

Tonga - unique among Pacific nations - never completely lost its indigenous governance. The archipelagos of "The Friendly Islands" were united into a Polynesian kingdom in 1845. Tonga became a constitutional monarchy in 1875 and a British protectorate in 1900; it withdrew from the protectorate and joined the Commonwealth of Nations in 1970. Tonga remains the only monarchy in the Pacific.

Tonga has a small, open, South Pacific island economy. It has a narrow export base in agricultural goods. Squash, vanilla beans and yams are the main crops. Agricultural exports, including fish, make up two-thirds of total exports. The country must import a high proportion of its food, mainly from New Zealand.

Location during our stay in Tonga was the Heilala Holiday Lodge. We operated simultaneously with up to five stations from 160m to 10m. We logged 41175 QSO's, including 4 on 160m, 1607 on 80m, 4871 on 30m, 7223 on 30m, 7057 on 20m, 4816 on 17m, 5090 on 15m, 5468 on 12m, 5039 on 10m, 2732 on RTTY and 1160 on PSK31.

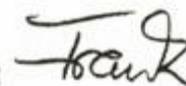

Many thanks to all who made this DXpedition possible, to Bernd, DF3CB for the pilot and website support. Special thanks to the staff of the Heilala Holiday Lodge.

Please visit our website at: <http://www.dl7df.com/a35yz/index.php>

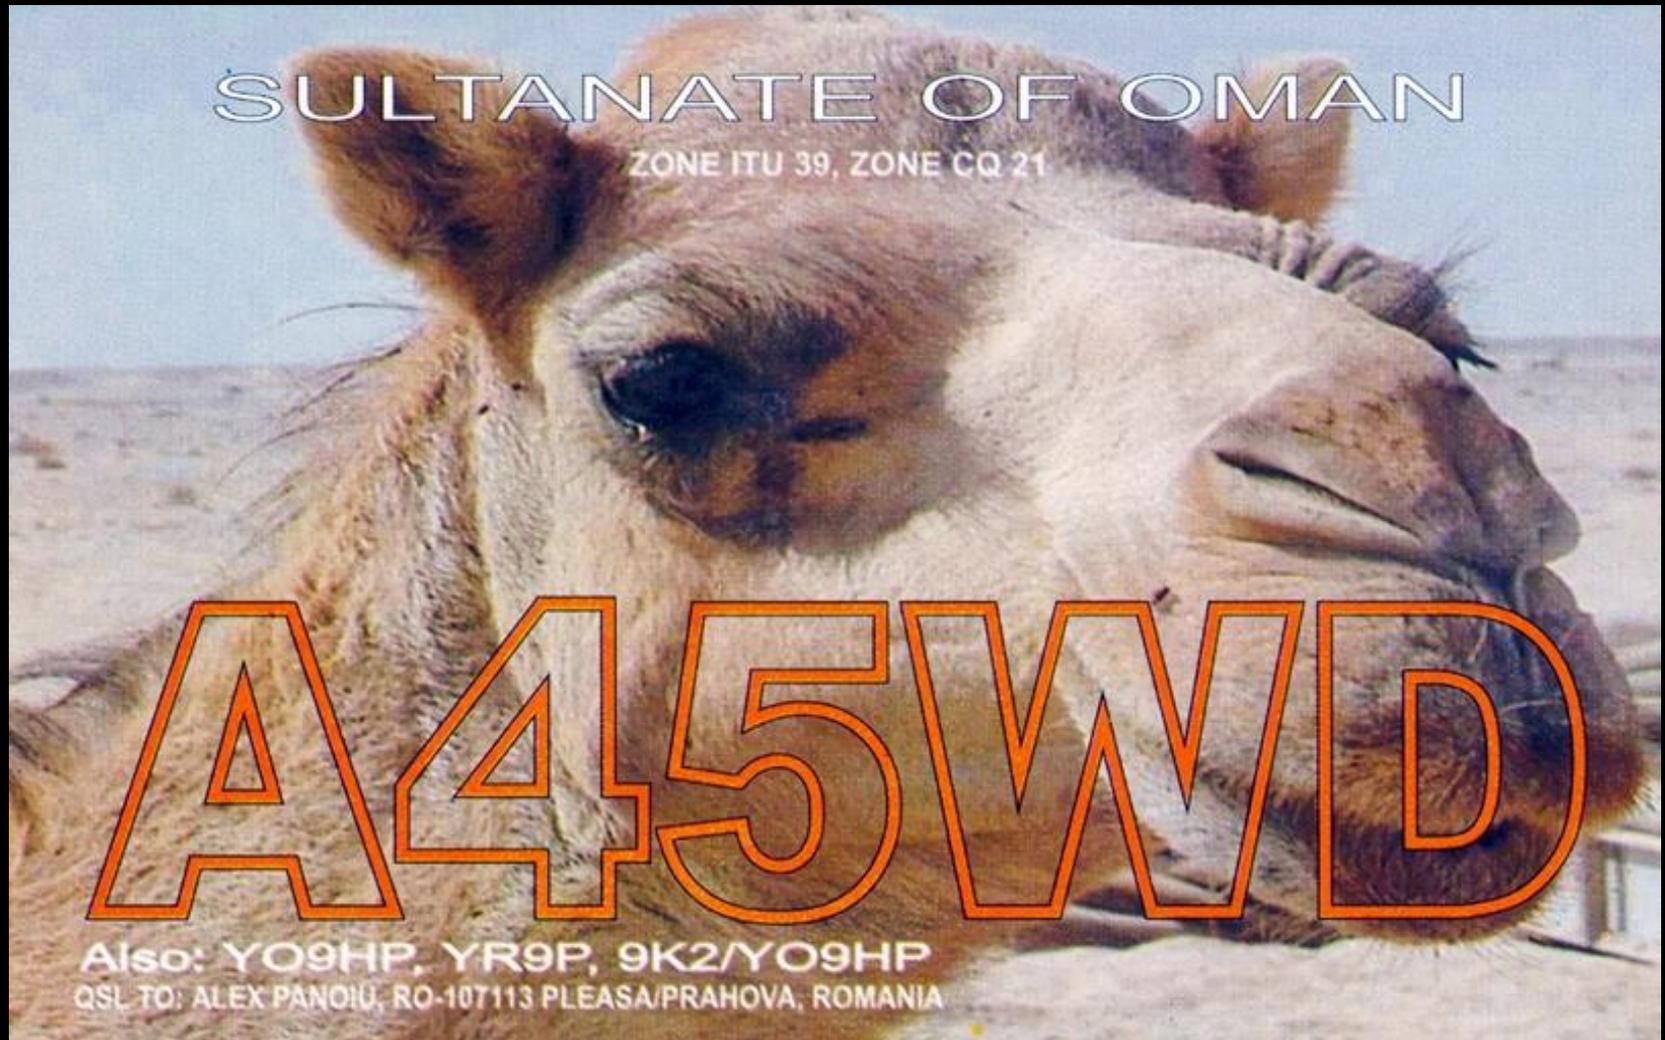

Front: View to Tongan Faleas of the Heilala Holiday Lodge; Tonga's national flower, the Heilala, is the eponym of the Lodge.

# BV100

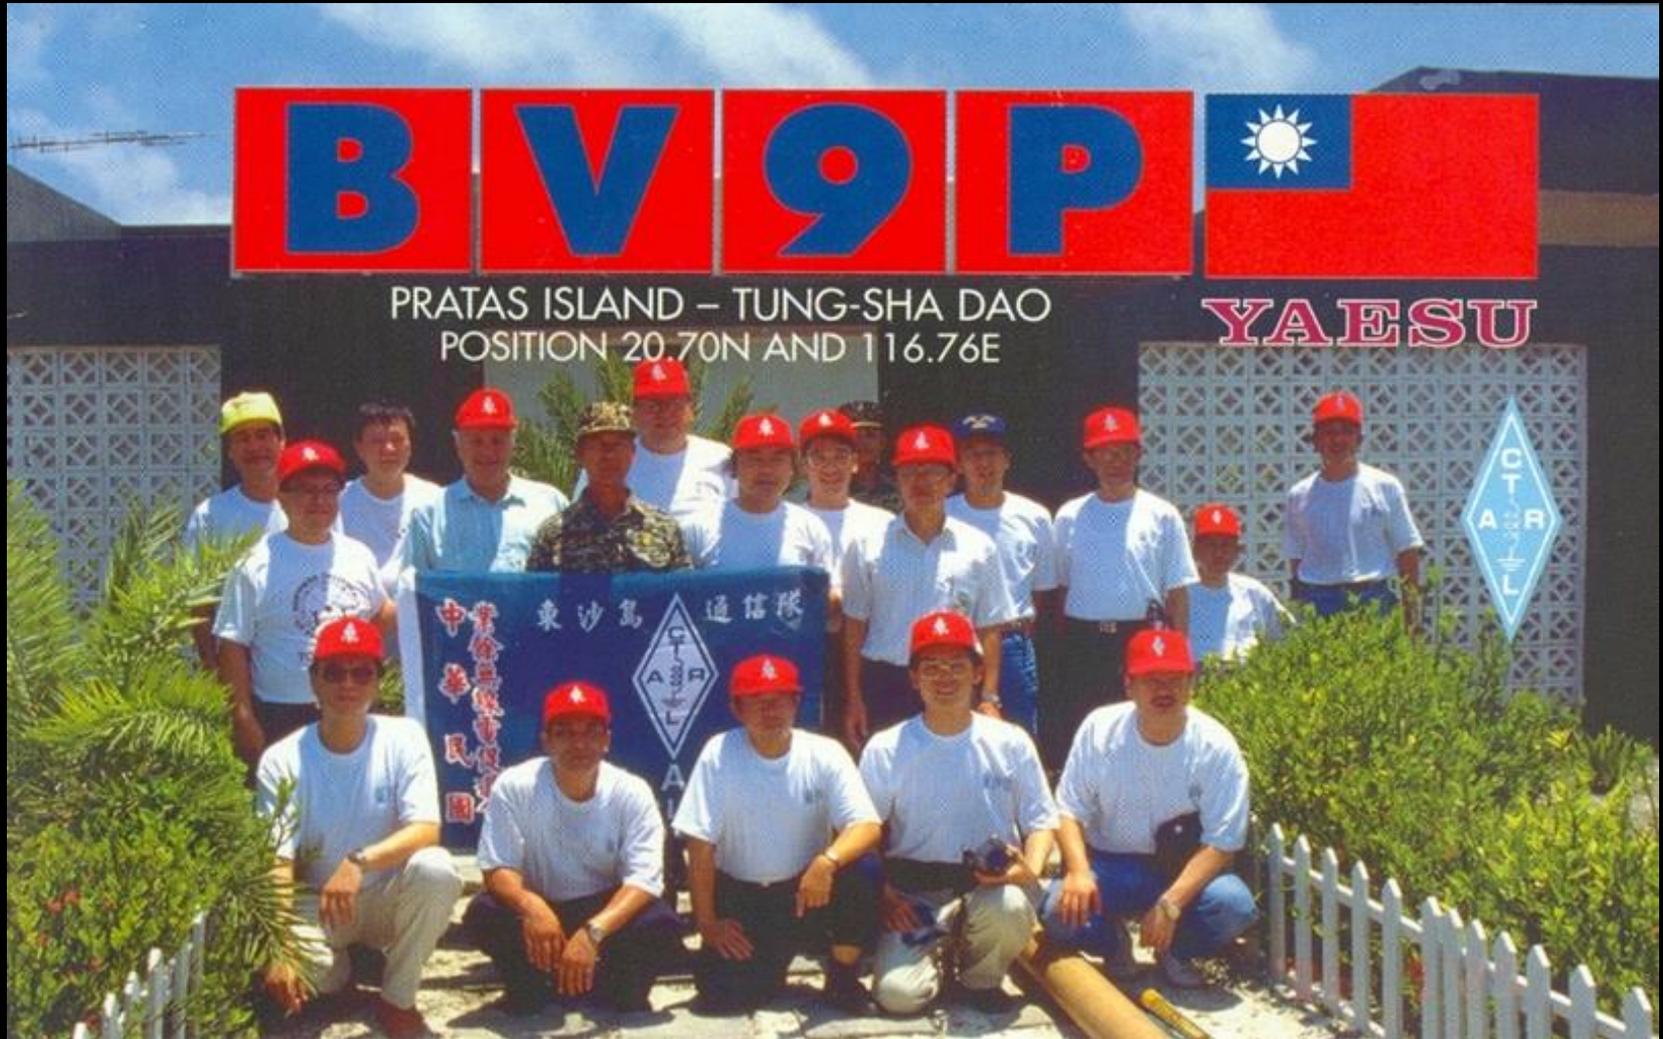

A special event station for celebration of the Republic of China (Taiwan) Centennial

One hundred years ago, the Republic of China was formally established on 1 January 1912 following the revolution of Wuchang Uprising on 10 October 1911, replacing the Qing Dynasty and ending over two thousands years of imperial rule in China. It is the oldest surviving republic in East Asia. After 1948 the R. O. C. government resettled to Taiwan. During the later half of the twenty century, the Republic Of China on Taiwan has experienced rapid economic growth, industrialization, and democratization. To celebrate the centennial of the Republic Of China(Taiwan), a special call sign station BV100 will QRV from 2010/10/10 to 2011/12/31. During this period, BV100 work on all Amateur bands and all modes. TNX for the QSO and Best 73 !

In tradition of the DXpeditions in the last three years we went this year to The Gambia especially to work on the low bands, in RTTY and via satellite. The Senegambia Beach Hotel, our QTH, lies at the Atlantic coast. We operated with two stations simultaneously on the short wave and how often it was possible with the third station via the satellites OSCAR-10 and OSCAR-13. From March, 5th to March, 18th we made 29.313 contacts totaly, 1.655 on 160m, 2.435 on 80m, 877 QSOs in RTTY and 117 QSOs via the satellites included. Thanks so much to the staff of the hotel, all the friendly people from The Gambia, our guest operator Alan, GØSAH, and last but not least to QSL-ROUTES Berlin.

**1984 DX-PEDITION**

# 20M DXCC QSL CARDS ON4UN

Confirming QSO with: ON4UN  
Date: 03/09/84. GMT: 20:44  
FREQ. : 14 MHz. Mode: 2 x SSB  
Your sigs.: 59 QSL Thanks.

#09189

In 1984, during september and october, and after many years of being inactive, "Radio Club de Chile" was able to organize and run a DXpedition to San Félix Island, wich is under the sovereignty of the Chilean Republic. The official Callsign to use was CE Ø AA.

San Félix Island lies East-West on parallel 80, at about 500 miles west of the Chilean shore, in the Pacific Ocean. Stretching over 1 1/2 mile, with an average width of 1/2 mile, the Island is volcanic in its origin, presenting a grayish lava formation. On its surface, may be seen rotten scoria fragment, showing different grades of porosity, and as if they were recently ejected from an active volcano.

Two chilean amateurs, Max: CE9 DVN, and Fernando: CE2 GXY, went to the Island, where they reached an amount of more than 31.000 QSO's. They could also count with the support of many stations helping from the mainland.

The operation took place in the following bands: 160, 80, 40, 20, 15, 10, and also a few contacts could be done on 6 meters; they used SSB, and CW modes.

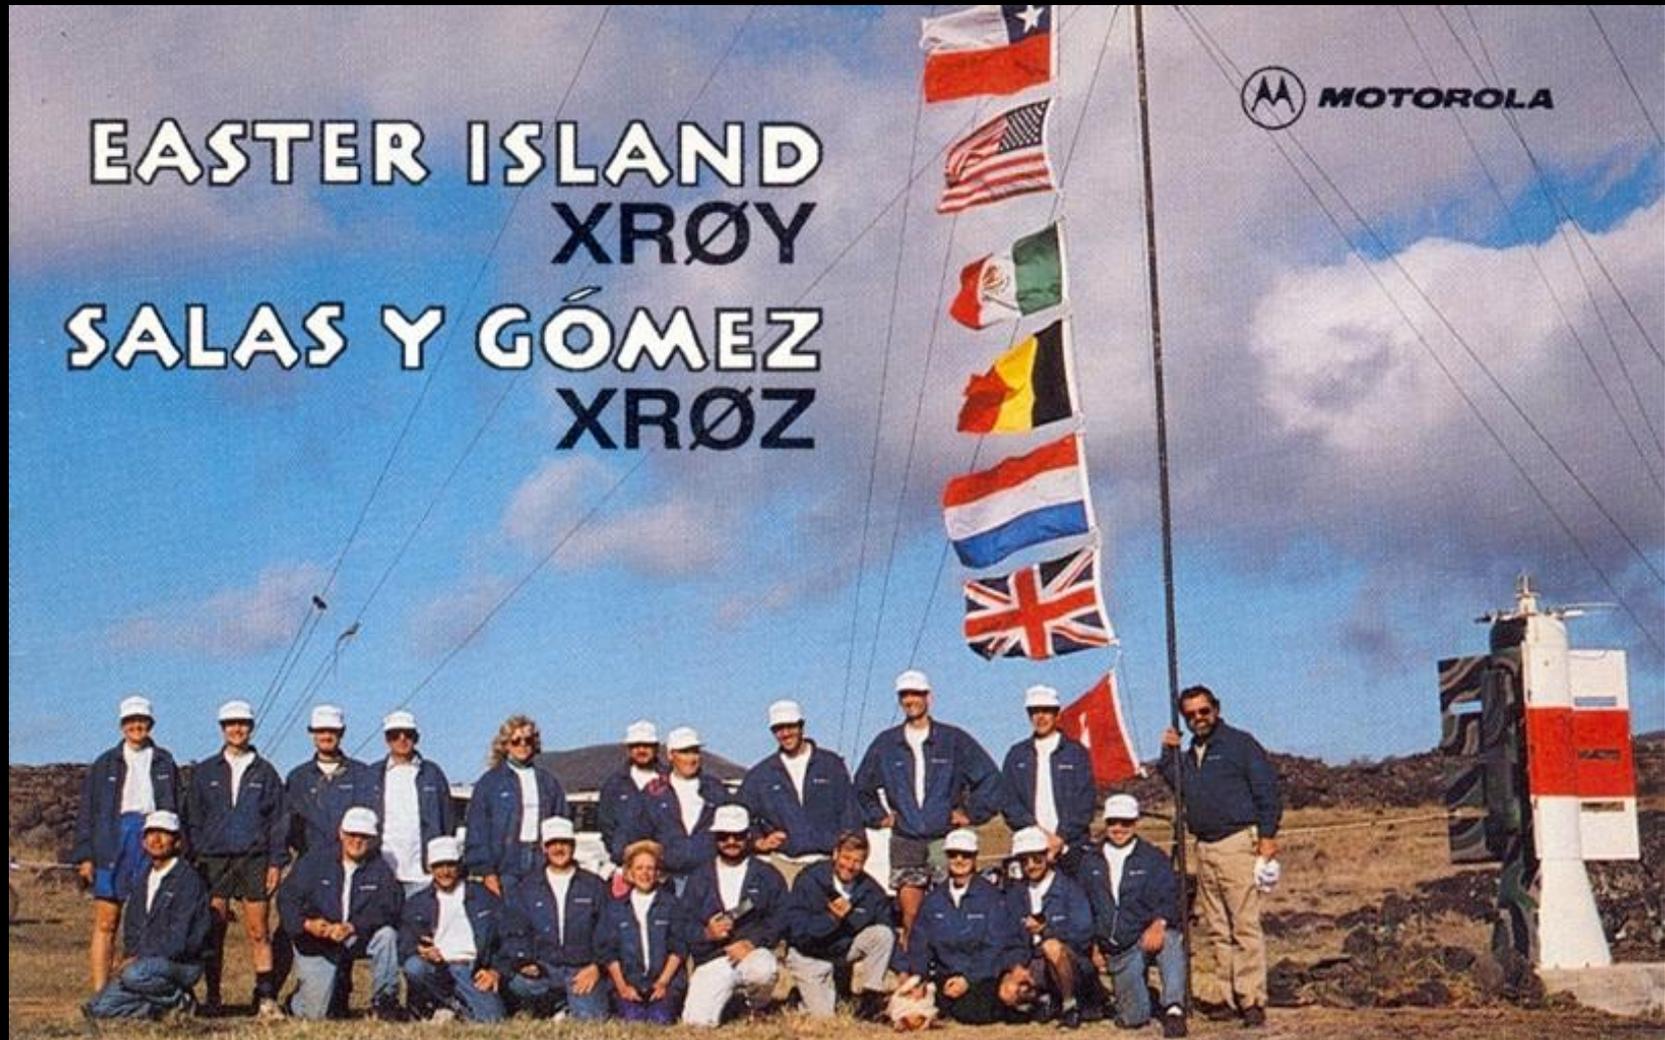

Most of rigs, antennas, and in general accesories, used in this operation, were supplied by "Radio Club de Chile", and its members.

SEPTEMBER 1995  
CORDELL EXPEDITIONS

**THE EXPEDITIONS:** The 1995 Cordell Expeditions to Easter Island and Salas y Gómez were carried out simultaneously during Sept. 1-22, 1995. They were conceived, organized, and led by Bob Schmieder KK6EK and Carlos Nascimento NP4IW. The team included radio amateurs Bob Allphin K4UEE, Max Bachi XE1XA, John Brosnahan WØUN, Craig Boyer AH9B, Luis Chartarifsky XE1L, Paul Daley WT8S, Vincent Denecker GØLMX, Don Dvorak KE6QZZ, Dave Farnsworth WJ2O, Ralph Fedor KØIR, Lee Hallin WB7SND, Bill Hein AA6TT, John Hilbish W3UM, Enno Korma PAØERA, Wes Lamboley W8FMG, Nellie de Lazard XE1CI, Joe Rich N1OCS, Jim Riff K9JSC, and Albert Zaehner HB9BCK. Science divers and technical support persons included Albert Boosman, Marcel Duhart, Ricardo Olsen, Sue Estey, Gunthar Hartwig, Barbara Hilbish, Bill Kruse, Gail Kruse, Harry Sherman, Steve Smith, and Martin Tossey. The radio teams logged almost 40,000 QSOs on all bands during 15 days of operating, including contacts using SSTY, RTTY, and 6-meter EME. The expedition developed a variety of new techniques for remote communications, including an internet connection to the expedition site, e-QSLs (e-mail), next-day QSLs (U.S. mail), WWW pages, publically posted logs, FTP downloadable logs, callsign server access to the logs, an expedition internet reflector, barcode printed on QSL card, real signal reports, dupes requested, and an automatic beacon. The expedition is documented in a book by KK6EK.

*February 2000: on tour again ...*

*After several operations from island in the Pacific and Indian Ocean we found it would be time to visit South America – of course an island again. Because nobody of us speaks Spanish the journey could have become a complete disaster. Fortunately we met very gracefull people in Chile giving us all the necessary support.*

*Robinson Crusoe Island is part of the Juan-Fernandez-Archipel in the Pacific Ocean, located 700 km West of Chile's continental coast. The island was named after the sailor out of Daniel Defoe's famous novel. This novel is based on a true story which happened to Alexander Selkirk. He lived for 4 years on this particular island after his ship was smashed on the cliffs in 1704.*

*Robinson Crusoe Island with his 600 friendly inhabitants appeared us much more hospitable than to this poor sailor centuries ago. We like to express our thanks to all people, who helped us making this trip a successful one. Specially we would like to thank Eliazar CEØZIS, who allowed us to convert his home into a radio station.*

*We hope you had as much fun as we had putting all the 22.000 QSO into our computers – mostly in CW and RTTY.*

*See you again from our next tour ...*

## CONTESTING FROM THE KINGDOM OF MOROCCO

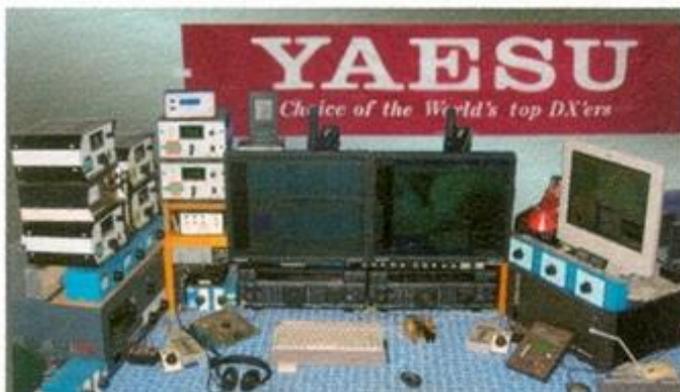

When Jim, W7EJ/CN2R invited me to visit and run his station in Casablanca in the CQWW 2008, I was delighted. Not only was his station one of those few running in the front row of any worldwide radio competition but his is also the third station to break the 20 million score barrier. Besides, we knew each other from the time we were both on the same payroll.

And what a sight it was that greeted us on our arrival in Casablanca. Those three towers no doubt dominated the skyline of that interesting city. I also had the privilege to meet Jim's host, Ali, CN8TW plus a friendly local bunch, such as Mohamed, CN8KD and Youssef, CN8YZ, and taste some local delicacies.

The contest weekend was unique since 20M closed earlier than usual and only provided 33 hours of operating time - and only 1200 U.S. QSOs - but gladly no bedsores.

It was a worthwhile trip in my never-ending search for an optimum radio location, meeting the cast of characters plus seeing the planet - our devoted playing field. I flew home with 4000 QSOs and a suitcase full of Moroccan cookies and many fond memories.

*On the Footsteps of Hickock's Casablanca!*

**Martti Laine, OH2BH & CN2B**

**EQUIPMENT:** Yaesu FT1000MP MkV & Acom 2000A

**ANTENNAS:** OWD Yagis; 5-L, 4-L and 4-L

Kingdom of Morocco in a nutshell: Population 34 million, 99% Arabic, constitutional monarchy, capital city Rabat, largest city Casablanca.

Left: Would you like to try out the CN2R cockpit? You are comfortably seated in the middle of a lot of equipment in a horseshoe formation. The station is based on three sets of huge antennas which you can run independently or in any desired configuration. Did you notice the small accessories and blue boxes - some twenty controls?

That's where the serious contesting starts from - having many options to nail down each and every caller on a variety of bands. And those weak ones may be multipliers - their signals need special attention. But lying at the core of everything are the contest-grade radios - Yaesu FT1000MP MkV - wired for simultaneous operating on two bands (SO2R) at any given time. Just close your eyes - sit there for 48 hours like a pancake and come out as a winner!

ST. PAUL IS. (47°12'N 60°09'W) - CQ Zone 05 - ITU ZONE 9 - IOTA NA10

St. Paul Island was declared a DXCC Country in 1975. Since the first operation by VY0A, six more groups operated before the Breton DX Group (VE1s AL, AWG, BHR, XT and W5KNE/VE1) mounted their 1988 DXpedition. Between 1359 UTC August 12, 1988 and 1835 UTC August 19, 1988, over 13,000 QSOs were made under very poor radio and weather conditions. There was a major solar flare just before the operation and after a few warm, sunny days on St. Paul, heavy winds and salt spray deteriorated our antennas. The stormy weather also delayed our departure and leaving was a lot more difficult than landing. Despite it all, we had a good time giving a new country to thousands of stations around the world. Thanks to Communications Canada for our unique callsign, to the Canadian Coast Guard for permission to land, to Capt. Freeman Morrison and his son Michael for getting us there (in calm seas) and back (in 12-15 foot waves), to George VE1XS and Ivan VE1CCB for VHF/LF relays and to St. Paul lightkeepers Terry Blackstone, Craig Blackman, Lloyd MacDonald and John Fairservice. Also thanks to VE1s ARS, AVO, BVA, LL and K5BDX for lending gear to us. The BDXG is also grateful to ICOM America Inc. and Atlantic Ham Radio for providing two IC-761s. Because of poor propagation, many of our QSOs would not have been possible without the incredible front-end of the 761.

## WE PROVIDE THE BASIC CONNECTIONS WITH THE LATEST TECHNOLOGY

Communication technology is advancing at great speed – so fast that it sometimes seems that people get left behind.

We at Nokia are playing our part in quickening the pace of progress by providing those telecom connections – or just simply connecting people. Nokia technology connects people, in words and pictures, voice and data, at work and at home, as well as along the road.

Nokia has provided many public and dedicated networks and is a leader in digital cellular systems as well as a major supplier of cellular mobile phones in the region. With more than 27,000 skilled employees, Nokia's resources and expertise are placed behind every customer in Asia, Middle East and Pacific Rim.

Now, more than ever, Nokia is connecting people and businesses in the region with high quality telecommunication products and services.

The South China Sea DX Team, SCS, is an alliance of off-duty Nokia employees living along the shores of South China Sea. When they are off their professional frequencies, they are still in touch with each other, people back home and around the world.

20M DXCC QSL CARDS ON4UN

E3ØGA

Eritrea

## 20M DXCC QSL CARDS ON4UN

After months of planning, the following operators arrived in Asmara, Eritrea to operate as E3ØGA. They were Franz/DJ9ZB, Elvira/IV3FSG, Max/I8NJH, Joe/KO4RR, Vance/N5VL, Michael/EA8AFJ, Larry/NF6S, Mike/N9NS, and Bruce/WD4NGB.

We used a wire antenna on 4 November 98 as E3ØGA, just after we got our license from the Ministry of Communications. The first few contacts were made while we were very busy getting all the antennas up on the roof of the Hotel at over 100 ft. When done, we had beam antennas on all bands from 20m thru 6m, a rotatable dipole on 30m, and slopers on 40 and 80m, and an inverted V on 160m.

We made a presentation to the students at the University. Some of the subjects covered were licensing, propagation, and radio theory. The students were excited with the idea of being able to have a club station in the future. They have the equipment which was given to them in 1993. We checked the equipment, and it was all ready to be used. They are very knowledgeable in electronics and communications.

The final numbers for the E3ØGA operation: Total QSOs 35,412. First QSO with E3ØGA was with 9K2ZZ on November 4th at 1215Z on 10m SSB • Last QSO with E3ØGA was with S51RB on November 17th @0820Z on 20m RTTY

NORTH COOK ISLANDS (now E5)

# 20M DXCC QSL CARDS ON4UN

19 October - 30 October, 2002

**Manihiki, North Cook Islands**

**IOTA OC - 014 AH99**

1 November - 11 November, 2002

**Rarotonga, South Cook Islands**

**IOTA OC - 013 BG08**

Five members of the **Western Washington DX Club** returned to Manihiki, North Cook Islands for the 2002 CQ WW SSB contest. We are greatly indebted to Jim Ditchburn, **ZK1JD**, and Tuatai Tupou, **ZK1CY/ZK1MA**, for their tremendous assistance in getting things organized prior to our arrival. We also owe a great debt of thanks to the folks of **Tauhunu Village** for assisting with supplies of fuel, food and water since our shipment of supplies did not arrive at Manihiki until the day before we left.

A thank you also goes to Dunestar who loaned us filters which eliminated the interstation interference of the IC-706's and to FluidMotion who loaned us a 3-element SteppIR antenna. The antenna worked exceptionally well and was a great asset on WARC bands. These items greatly helped us to more than double our score of 2001. We also want to acknowledge contributions from KL7IKV and K7SS as well as all those who have enclosed contributions with their QSL requests.

73! Jan

AUSTRALS Tubuai Isl. IOTA: OC - 152 loc: BG56GB

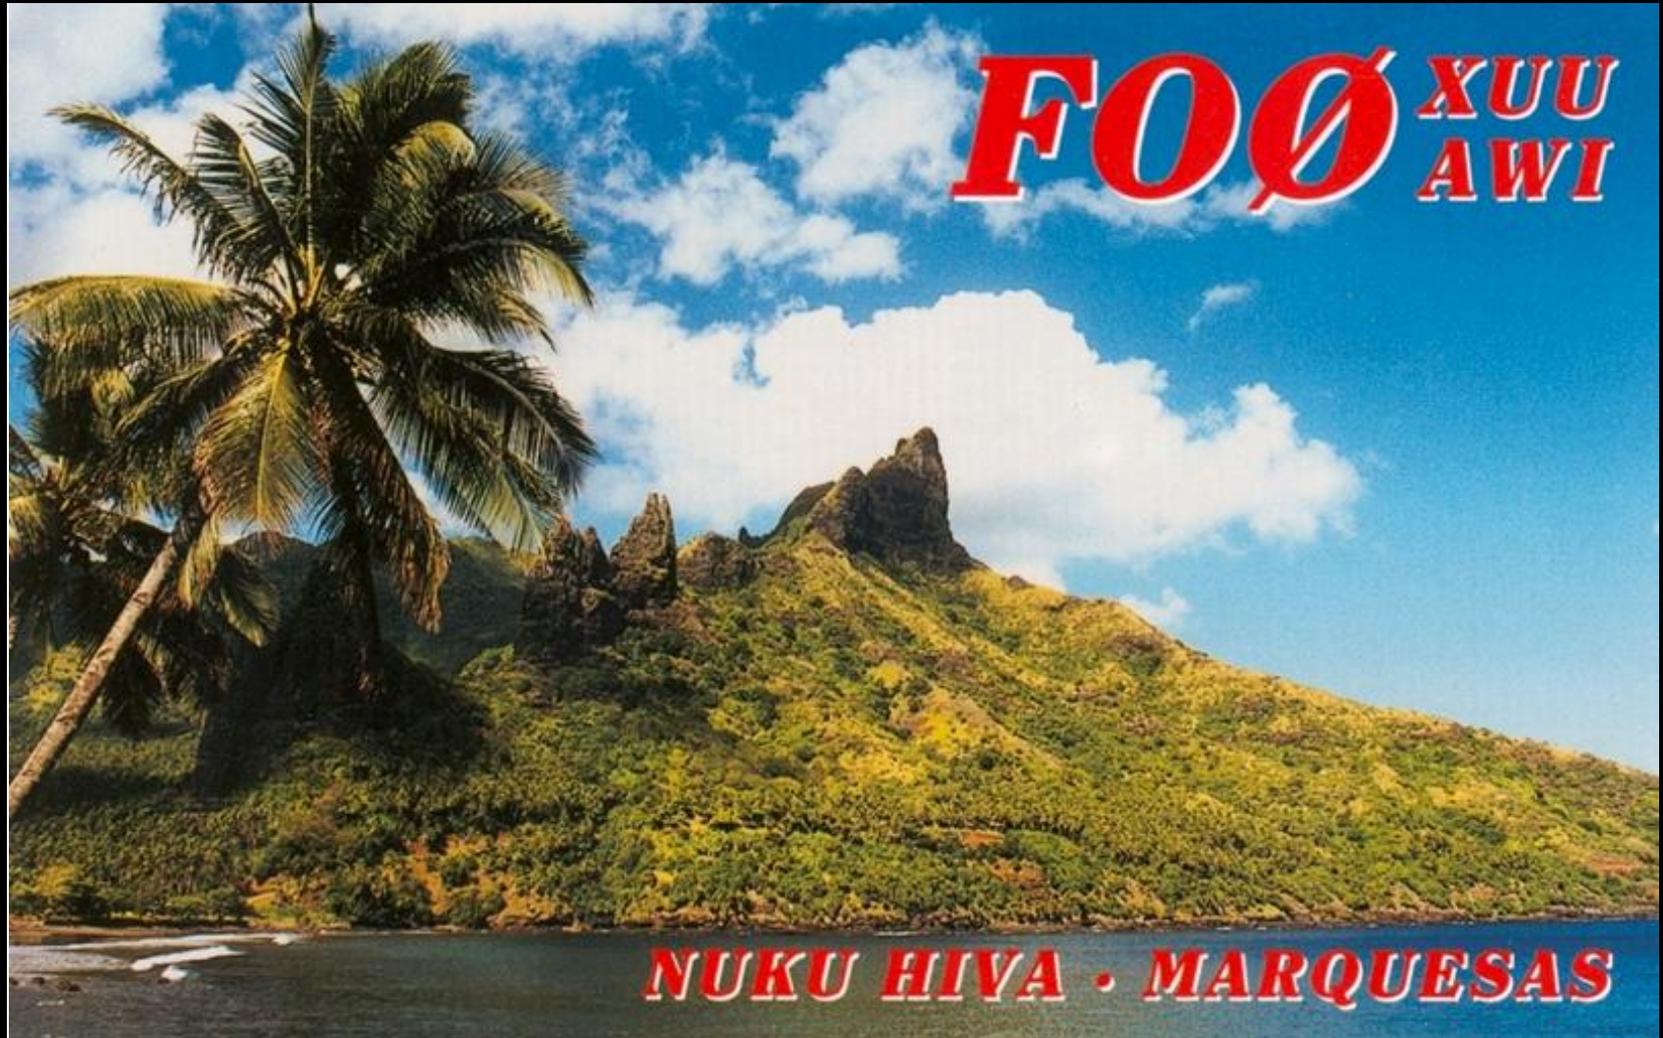

The spirit of adventure took us in October/November 2000 to Tubuai in Australs archipelago and Nuku Hiva in Marqueses. We thank you all who made QSO with us for good operating style. We were only barefoot IC-746 & TS-570 using Butternut HF9V vertical, Cushcraft A3S tribander and 5 element beam for 6m. We must mention here SP9LCV & DL2SDQ for lending us 6 m beam, Bencher Inc. for logistic support, KC1XX for logging program and SP3EJJ for his time spent on mounting RTTY modem.

Tubuai is small easy going island surrounded by shallow turquoise lagoon and a reef with several „motu“. It is inhabited by 2000 people in a few picturesque villages along the coastline. Central part of the island is filled with two mountain ranges rising to 422m.

Jan FO0WEG / SP9FIH

Te Fenua Enata – The land of men – is the Marquesan's name for this beautiful archipelago. Nuku Hiva and the other five inhabited islands have a total of 7500 inhabitants and located about 1400 km north-east of Thaiti. We like to thank our host Yvonne Katupa, her family and all people of Hatiheu village to made our stay there unforgettable. Also we thank our familys, you and the amateur radio commune for the pile ups. Picture on the front side shows our qth: the romantic valley of Hatiheu on the north shore of Nuku Hiva – a green paradies surroundet by high mountains.

## FOØCI - Clipperton Island DX-Pedition - March 1992

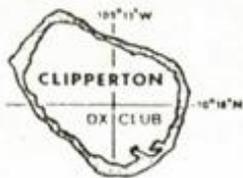

RADIO	MARCH 1992	UTC	BAND	MODE & WAY	TIME
RADIO ON4UN		2 WAY SSB	ON	03/12/92 AT	0421Z
URRS(T) 59		BAND: 20			

Clipperton Island (10° 18' N - 109° 13' W; Grid Square - DK 50), located approximately 1500 miles south of San Diego, California, is a flat, barren, coral atoll inhabited by land crabs and various sea birds (the booby and frigate). In 1990, plans were underway to activate the island in early 1991, however, the operation was delayed due to the crisis in the Persian Gulf. In 1991, the expedition efforts continued for an early 1992 activation after the required paperwork had been received. On March 6, 1992, nine operators activated FOØCI with 7 complete stations and made 48,000 QSOs before leaving the island on March 15.

We would like to thank the following for their support prior to the expedition: Mr. and Mrs. Charles Adler, ICE Corporation, Southern California DX Club, National Wire and Cable Co., The Hoosier Contesters, KC6BBQ, KC6WUZ, KD6AYV, KK6DX, KG7DZ, KL7GRF, WA6PJR, W6PQS, KE6OP, N6AMG and N6AGB. We would also like to thank Mr. Pierre Simon of the PTT in Tahiti for his assistance in the processing of our paperwork.

Our greatest thanks goes out to the crew of the M. V. Spirit of Adventure whose expertise throughout the trip allowed the team to enjoy a safe and well executed journey. This included a trouble free landing and departure from the island.

The nine operators were: NØAFW-Pete, WA2FIJ-Jay, N7QQ-Charlie, EA7CQQ-John, GØLMX/F1MBO-Vincent, ON6TT-Peter, N9NS-Mike, PA3DUU-Arie and WA6FGV-Ron.

Les Minquiers Islands is an uninhabited rock formation midway between St. Malo France and Jersey Island. There are a few little houses on the reef that in the past served as a shelter for the shipwrecked who in the storms managed to jump onto the rocks. Access to the reef is very hazardous due to the many submerged rocks. The most significant island on the reef is Maitresse.

## Channel Islands, Guernsey (GU/MU) and Jersey (GJ/MJ)

In the heart of Europe, a stone's throw of some 15 miles from the French coastline, lie these two beautiful island groups with all the features that will make your visit a great one. They welcome tourism, especially during the warm summer months. The year-round GJ population is 89,000 versus GU's 64,000. Whenever you work a native GJ or GU, there's a good chance that your partner is involved in tourism, dairy farming, banking, finance or associated services.

Ham-wise, both islands have their own amateur radio societies, although the total number of licenses is less than one hundred. And as in all modern and competitive societies, the amateur radio associations are friendly rivals – and very active in all sectors of our great hobby.

So it was right here that the Northern Vikings decided to land. The playing field was, obviously, the CQWW CW Contest 2000, in the multi operator/single transmitter category. The script was rather simple: use the old WWII military structures but modern equipment, and simply go to battle against GJ2A in Jersey – this time over the HF radio spectrum, at the same time ensuring the availability of these two rare European multipliers for the multitudes the world over.

The Guernsey event was staged in cooperation with the Guernsey Amateur Radio Society (GARS), using the facilities of its club station GU3HFN. Phil Cooper, GUØSUP, the GARS President, offered major support with his gang, and also provided the special contest callsign, MU2K. A young spirited team arrived early on the scene with their Titanex verticals, fighting against Mother Nature but yet ran 48 hours without a glitch!

It was a severe but successful event, ending up with 5,200 QSOs and 7.2M points and another 2000 QSOs outside the contest as MU/OH9MM. Your QSO was right there in the bag!

The mission of Radio "4VEH" is to proclaim the Gospel of Jesus Christ and transform Haitian society through the influence of creative Christian programming. Radio 4VEH, a religious non-commercial station, relies on the financial gifts and prayers of its listeners and friends. Can you help bring peace and hope to Haiti with a donation? Visit [www.Radio4VEH.org](http://www.Radio4VEH.org) for more information and how you can help bring peace and hope to Haiti. Thanks for the QSO and UR support!

TNX QSO/s and QSL - hpe cuagn sn from any other DX spot - 73 de Gerd / DL7VOG

San Andrés y Providencia is a small archipelago in the western Caribbean with nice and friendly people and beautiful vegetation. San Andrés is a rather flat island, 12 km long and 4 km wide. Providencia, located 90 km north of San Andrés, is a mountainous small island of about 7 km in diameter. The climate is warm and breezy with temperatures between 27°C and 30°C throughout the year. Special thanks to my friend Mario, HK3WGO, and to Maria Teresa Rodriguez, Secretary of the Liga Colombiana de Radioaficionados, for their assistance with the license. Big hands for Abel, HKØVGJ, his XYL Wilma, and their family as well as for Juan, HKØER, and his family for their overwhelming hospitality.

Thanks to the owner and manager of "Cocoplum Beach Hotel", Luz Milena Díaz, for allowing me to operate my radio from that neat and familiar hotel and thanks to the always friendly staff. I warmly recommend "Cocoplum Beach Hotel", if you are planning vacations away from big tourist resorts in a tranquil and familiar atmosphere at the beach.

Info about "Cocoplum Beach Hotel" can be found at <http://cocoplumhotel.com>. My XYL, Erika, supported my DXpedition again with enthusiasm, comprehension and patience.

The Society of Jesus (the Jesuits) is a religious order dedicated to all kinds of the apostolate. Of its 36000 members (1966), 7000 are engaged in mission work; 7000 in education (all levels), and the others are preachers, writers, directors of retreats, young Jesuits preparing themselves for future work, or coadjutor Brothers (6000) helping the priests in every task of the apostolate. HV 3 SJ is a forward step towards improving communications between the Jesuit Curia and Jesuits in all corners of the World. It is located in Rome, near St. Peter's Basilica, in the extra-territorial zone of the Vatican City.

vy 73,

*Antonio Vernucci*  
*Tony*

My summer QTH lies on the island of Sardinia facing the islet of Tavolara, which is really a block of limestone 538 meters high and having a unique history. After remaining uninhabited for centuries, in the year 1807 Giuseppe Bertoleoni went to Tavolara occupying it and de-facto becoming its sole owner. In 1836, when Carlo Alberto di Savoia - the King of Sardinia - went to the islet for hunting the gold-toothed goats, Giuseppe introduced himself as the king of that little plot of land. King Carlo Alberto recognized his status and gave him several presents, among which a testimonial goatskin which was eventually registered at the Sardinia state office. He so became the king of the world's smallest "kingdom". The picture of Giuseppe and his family is still at Buckingham Palace, together with those of all monarchs of the world. Since then the islet has been mostly inhabited by Giuseppe's descendants and today Tonino Bertoleoni, who runs a restaurant there, still boasts the title of King of Tavolara. The graves of members of the Tavolara royal family can be seen in the small cemetery located in the flat part of the islet. Most of Tavolara is closed to public access as it hosts a Nato base. The VLF transmitter "ICV" transmits to submerged submarines on the frequencies 20.26 kHz and 20.76 kHz, using an antenna which hangs between two mountains.

*Craig*

Thanks for the QSO from this 1999 DXpedition to St. Lucia, which included over 7000 contest Q's and over 3000 pre-contest Q's. The trip was organized by PVRC members K3LP, K3UG, and N3NT, with considerable on-site help from J69AZ. St. Lucia is a beautiful tropical island with an average temperature of 26°C and annual rainfall of 60 to 100 inches. The island sports many natural wonders, including the Pitons - its famous twin peaks which rise straight out of the sea to a height of nearly a half mile; 19,000 acres of Rain Forest; the world's only drive-in volcano, complete with bubbling water and steam clouds; the Diamond Falls, which plummets through sulphur springs that change the water color to yellow, green, and purple; and beautiful coral reefs. Special thanks to the Southwest Ohio DX Association for the use of their antennas on this trip, and Givan, J69AC, for their storage!

MIDWAY ATOLL NATIONAL WILDLIFE REFUGE

# 20M DXCC QSL CARDS ON4UN

Grid Square AL18HE

## Midway Atoll

IOTA OC-030

Midway Atoll, a US possession in the mid Pacific, is a US National Wildlife Preserve administered by the US Fish & Wildlife Service. It has also been designated a National Historic Monument to recognize the importance of the Battle of Midway in June of 1942. This island has a very narrow mission, and access beyond historical or naturalist tours is severely limited.

Midway Atoll is home to 70% of the world's Laysan Albatross and 40% of the world's Black Footed Albatross, both commonly called gooney birds. The Atoll's 300,000 acres of lagoon and surrounding water supports 3 million birds as well as 250 species of marine life and endangered species such as Hawaiian Monk Seals, Green Sea Turtles, and the nearly extinct Laysan Ducks. Additionally, the lagoon has 300 resident spinner dolphins.

K4M intended to operate for ten days in late October but a 3 day delay in transportation reduced the on air time to six and one half days. Even so, over 61,000 QSO's were made. Propagation proved to exceed all expectations with conditions open to many areas of the world 24 hours a day. Due to concerns for avian wildlife, antennas were restricted to verticals only. Two antenna fields, one for CW and one for SSB/RTTY, were established. Switchable vertical dipole arrays (SVDAs) were used for 10 to 20 meters with excellent results. Single verticals were used for 30 to 160 meters and were highly effective as well.

One of the goals of the Midway 2009 team was to ensure that those entrusted with the preservation of Midway Atoll were left with a positive feeling toward ham radio, thus hoping to assure future operations. This operation produced no problems for the local birds, and many positive comments were received while we were there.

We wish to thank the US Fish and Wildlife Service and especially the Midway Refuge Manager, Matt Brown, and his staff for the support provided in making the operation happen, but most of all for allowing our DXpedition to take place. We also wish to thank NCDXF, the Colvin Foundation, INDEXA, GDXF, SWODXA, SEDXC, the Swiss DX Foundation, EUDXF, the Lone Star DX Association, OZDXF, RSGB, the Carolina DX Association, the Clipperton DX Club, ACOM, Rig Expert, Hell Sound, WX0B, Davis RF, WriteLog, Vibroplex, Autek, the Battle Creek Group, ELLI print, W8AEF, and W6SZN, all of whom were principal sponsors of this DXpedition. We also want to thank those other clubs, associations, and the many DXers who provided additional financial support to help make this operation a success. The team also wishes to thank those who provided IT, electronic, financial, logistical, and QSL support throughout the operation - AA1V, DL9RCF, W5DNT, W6XA, Margaret Blackwell, W8CAA, OK1KT, AH6NF, WH6GS and AH6OZ.

Front - N4XP, W6OSP, N7CQQ, N6HC, K9CT, I8NHJ, WB4JTT, DJ9ZB, W8GEX, NF4A, N4PN

RADIO	DATE	TIME	MHz	REPORT
ON4UN	JAN. 9, '80	1635 GMT	14	SSB 5/9 <del>CW</del>

Our thanks to Madison Electronics, J.W. Miller, Hustler, Hy-Gain, the LIDXA, the Red Stick DX Association and the Fairfield (CT.) A.R.A. for their support in making this expedition possible.

We also would like to thank N6AHU, W6PJX, W7PHO, WD6AEI, and the others who assisted us with the emergency traffic. Our sincere thanks to KH6ETG and KH6CY for their assistance with the gear in Hawaii after the teams returned stateside.

Our congratulations to the crew of the Varua, led by Captain Russ Nilson, but most of all, our highest esteem goes to the United States Coast Guard. Their immediate responses and understanding of the problems will long be remembered by the entire team.

## The Story . . . Shortened Version . . . dates are Hawaii referenced

**JAN. 4, 1980** - Flight to Palmyra aborted (radio failure) approximately 120 miles south of Hawaii. Returned to Hawaii.

**JAN. 5, 1980** - Crashed on landing at Palmyra. Jan, WA6YQW seriously injured. Coast Guard, with C-130 arrives and evacuates Jan to Hawaii. After a team vote, we decide to stay. Palmyra is put on the air.

**JAN. 6, 1980** - Varua leaves Palmyra for Kingman Reef. Kingman spotted mid afternoon. Anchor off Kingman Reef shoals early evening.

**JAN. 7, 1980** - Despite high seas and difficult landing, we settle on the reef. Kingman Reef put on the air.

**JAN. 8-9, 1980** - Both sites active.

**JAN. 10, 1980** - Kingman Reef de-activated. Returned to Palmyra at sunset.

**JAN. 11, 1980** - K6LPL seriously injured. Coast Guard arrives with C-130. Entire team leaves Palmyra at Sunset arriving in Hawaii at 10 P.M. 15,000 QSO's were made from Palmyra Island.

**JAN. 12, 1980** - K6LPL receives 4 hrs. of hand surgery at Queens Hospital and returns home Jan. 14.

OPERATORS Palmyra: K6LPL, DAVE and K2HFX, BOB

The 1978 Navassa Island DX-Pedition was operated from 26 November to 3 December 1978; 22303 SSB and CW QSO's were made. Our thanks to each of you who made this possible. We hope we were a new country for you on a new mode or band.

Operators: Randy Rowe, NØTG; Dave Bowker, WØRJU; Myron Kern, WØZH; Tony Trice, ADØP; Joe Markowski, NØWL; Sy Adler, K2KA; Miles Brown, W2PAU; Joe Duffin, W2ORA; Dave Johnson, WA4SSU; Jon Lindsay, W6OIG.

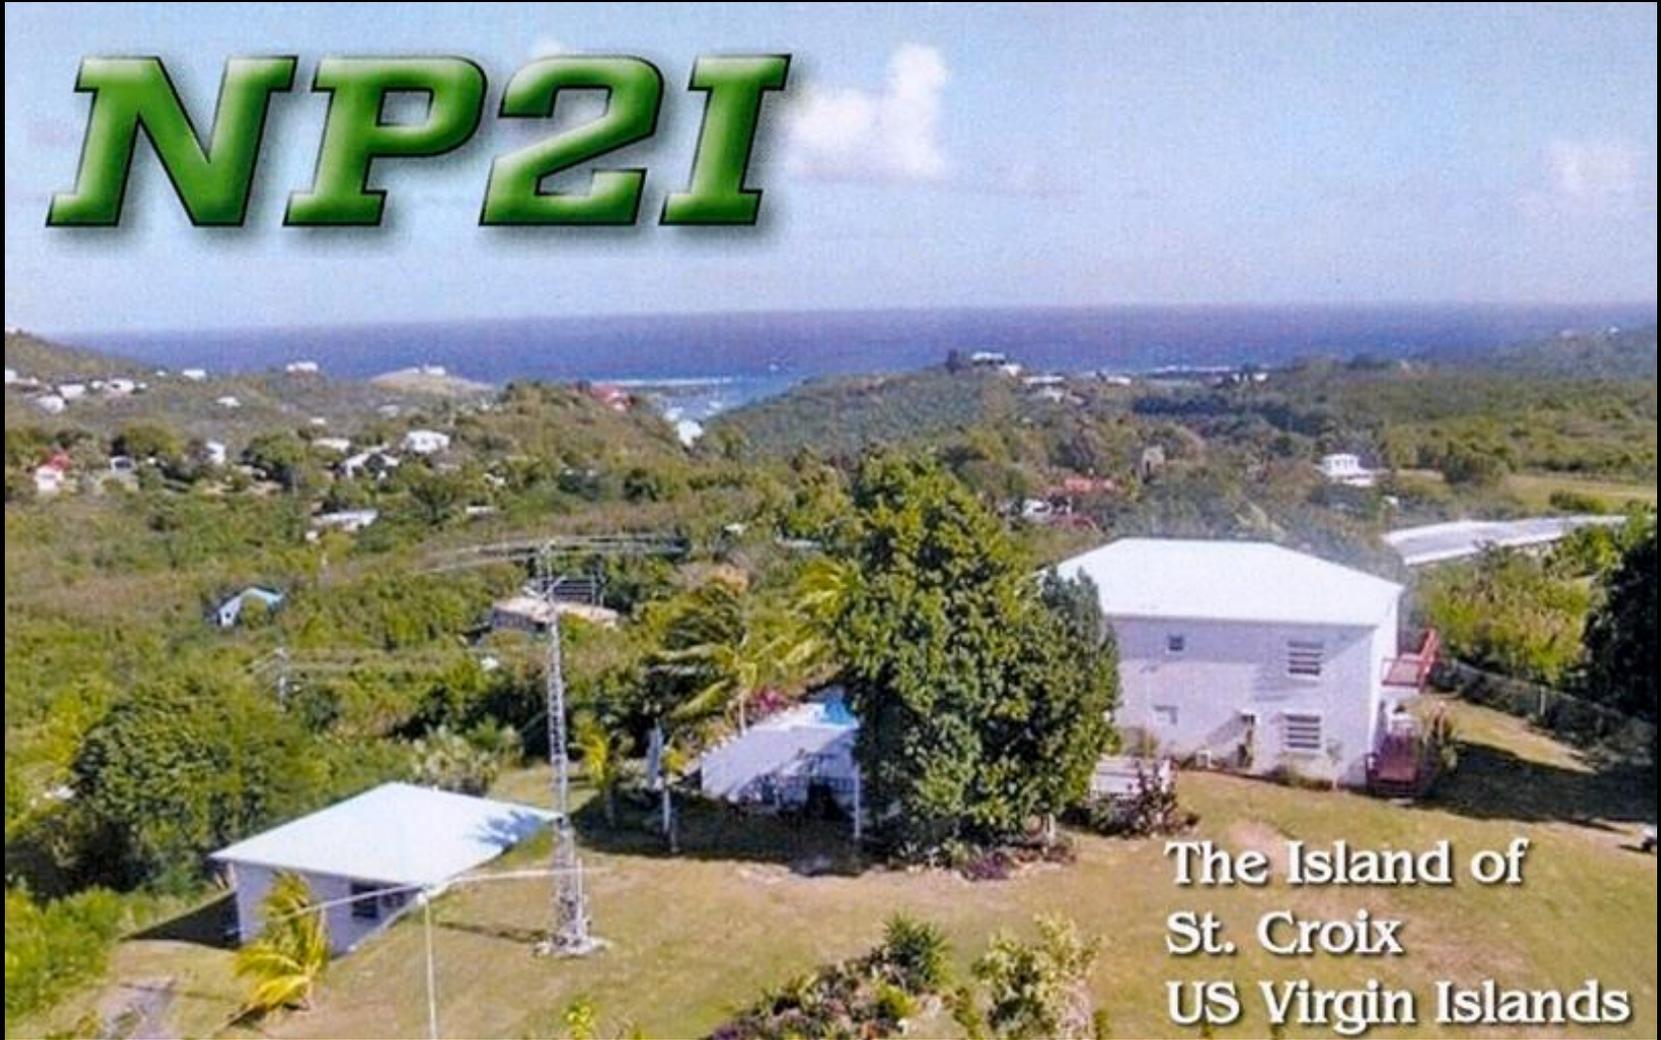

Recognitions: Our sincere appreciation is hereby expressed to the following organizations who have directly supported the DX-Pedition: Atlas Radio, Northern California DX Foundation, Long Island DX Association, McDonnell Douglas Amateur Radio Club, Virginia Century Club, Rookies Amateur Radio Club, Southeastern DX Club, St. Louis Area Teleprinter Society II, St. Charles Amateur Radio Club, Egyptian Radio Club, Gateway Chapter Ten-Ten International, Suddeutsche DX-Gruppe, St. Louis Suburban Radio Club, Mid-Mo Amateur Radio Club, Mississippi Valley DX and Contest Club, and the organized Japanese support via JH1VRQ.

Special thanks to the following for assistance in promotion: W1VV, W1WY, WB1DGD, K2AA, W2GHK, W2IYX, W3HNC, WA3HUP, K4IIF, WA6AHF, WA6AUD, N6JM, W6VPH, W7OK, N7RO, W9MXC, KØDQV, WØDU, WBØMSZ, DJ9ZB, JH1VRQ, LU2AFH, VK3AKK, VU2CK, ZS6IW, 6Y5LA and to the many others who cannot be recognized due to space limitations but without whom the DX-Pedition could not have been a success. Thanks to all.

I would like to thank Mr. Khoury Philippe, of the Ministry of Telecommunications and the Amateur Radio Association of Lebanon, as well as Francis, OD5PL, and Hani, OD5TE, for their help in getting me an OD5 license. Francis and Hani, I cannot thank you enough for your fantastic ham spirit. I will never forget.

As a member of the Belgian Army I was located in the southern part of Lebanon near the city of Tibnin. Our mission there is named BELUFIL 3 (BElgian LUXembourg Forces In Lebanon 3) and we are there to assist United Nations Forces personnel who are looking for and destroying land mines and unexploded bombs and assist the local population with medical needs. I was working in the Field Hospital as a Radiologist Assistant. We have about 400 personnel in our group. I was in Lebanon from 5 June until mid August 2007.

## OH0X FROM EASTERN ALAND ISLANDS

BIG Amateur Radio settlers of the Brando Island Group arrived on the island some thirty-three years ago and found a population of 400 scattered over many islands in the archipelago. This became their famous OH0W multi-site in 1982, with its advanced technology leading to a world win thanks to all OHs working as a team committed to a common goal.

In the 1990s the group created a first SO2R site with customized hardware and several CPUs pushing an efficient operating concept further. Two radios allowed three streams of people to call in on two selected bands as a result of multiple direction beaming and power splitting while still remaining in a single-op all-band category.

In 2010 BIG joined Radio Arcala's station network, OH8X and CR2X, with well-proven station architecture. OH0X became one of the first three European contest locations using state-of-the-art microHAM station automation for original beta testing. Here the latest SO2R solutions, such as MK2R+ and Station Master Deluxe, were fully implemented and put to heavy use.

The station also employs OM Power automated amplifiers and Remoterig remote control technology, with Radio Arcala being involved as their technology partner.

The above concepts allow full use of the Aland Islands site in a remote control mode.

**MARKET REEF 2008**

# 20M DXCC QSL CARDS ON4UN

## ARCTIC MARKET REEF 60°18"N 19°08"E

The Market Lighthouse was built in 1885 to guide important sea routes at the stormy Baltic Sea. Market is under Republic of Finland jurisdiction, being a small piece of Finland beyond another DXCC country, Aland Islands, OH0. Market was still manned in 1969 when it qualified as a new DXCC country and became known throughout the world. In that same year at Christmas, Market Reef was activated for the first time (OJOMR) by a team of Martti, OH2BH, Erkki, OH2BW, Raimo, OH2KK and the late Sigge, OH0NI, soon followed by lighthouse keeper Karl-Erik Eriksson entering the bands as OJOMA under sponsorship of the Northern California DX Foundation (NCDXF). During generator maintenance in May 2008, a SteppIR beam was hoisted plus 300 liters of generator fuel was ferried to prepare for a 10-day stay in the autumn. Old Sol was on our side, providing us with exceptionally sunny and mild weather and good propagation on low bands with a minimum of auroral absorption.

Upon our return to Aland Islands, we put to fire our operating outfits and took all showers that we had missed for ten days. Hope you had as much fun chasing us as we had pulling you ashore on those barren rocks.

To Radio: **ON4UN**

FINLAND

# 20M DXCC QSL CARDS ON4UN

## THE BEST PACKAGE FOR RADIO COMPETITION

The cornerstones are the same whether racing by car or by radio. Missing one will deny you pole position – and the podium. Therefore understanding the game and keeping the focus is essential.

The car itself – radios, amps, station automation and competitive antennas make up the backbone on which the racing strategy should be based. This represents the hardware, and the related plan is to make the best out of it.

The driver himself with a variety of dedicated skills is to draw up a minute-by-minute operating plan and make it jell. This part sounds easier than it is, and the profile of winning drivers is a complex matrix of minds – a multi-talented profile with dynamics and sensitivities to deal with an ever changing game plan. The hungriness to win goes only with the best in the circuit.

The best package wins – in a severe race even the smallest detail counts!

When Yaesu invited us to play a part in developing the best radio, we were delighted – giving us, as it did, a chance to support the blueprint and verify the control functions of the winning engine. The driver working together with the team engineers has proven a winning recipe. We are proud to present to you the best radio, but the racing tactics we keep to ourselves.

**Try out the FTDX9000 and come a step closer to winning the race.**

# 20M DXCC QSL CARDS ON4UN

Operating for three days from Kangerlussuaq (Søndre Strømfjord) on the west coast of Greenland, G3TXF made 1,170 QSOs on CW and another 560 QSOs during the WAE-RTTY Contest.

Many thanks to **Jesper OX3KQ** and **Helger OX3HI**, the two resident radio amateurs in Kangerlussuaq, for allowing me to use their fine club station on top of Black Ridge.

The island of Aruba is an independent entity within the Kingdom of the Netherlands. It lies about 16.5 miles off the north coast of Venezuela in the southern Caribbean, and has a diverse population of about 105,000.

The P4ØY/P49Y station has three towers located on a 1/4 acre lot with the following Force 12 antennas: C31XR at 43 feet; 2 element 10 meter yagi at 55 feet; 5 element 15 meter yagi at 55 feet; 4 element 20 meter yagi at 68 feet; 2 element 40 meter yagi at 76 feet and 1 element 80 meter Sigma 80 at 67 feet. There is also a 160 meter "double L" suspended at 67 feet from the back tower and four 500 foot beverage listening antennas (controlled by a K9AY switching box/preamp) located behind the house in the "Cunucu", the name for the large common areas of undeveloped land located through the island.

The station is owned and operated by John Fore, W6LD/P4ØL, and Andy Faber, AE6Y/P4ØY/P49Y.

P4ØL is happy to confirm the following QSO(s) with

On the 20th of July 2014 it was exactly 200 years ago that his Royal Highness Willem the first (Willem I) signed the decision made of the Union State with the province of Zeeland. In the year 2014 our piece of the province Zeeland named ZEEUWS-VLAANDEREN celebrates his 200 years old Birthday. Many festivals and events happen during 2014. So because of this event the Contest Group ZEEUWS-VLAANDEREN PI4DX (located in this province) did bring this special event in the air with the callsign PC200ZVL from 26 June until 20 July 2014. All station information you can find on our website [www.pi4dx.com](http://www.pi4dx.com). We made about 3700 contacts during 3 weeks. Sometimes we had fantastic pile ups. Thanks to you fellow amateurs and Erik PD1DX to let us use his great station. Stockcorner.nl is our sponsor of the QSL cards. Check their site!

## PJ2T - CARIBBEAN CONTESTING CONSORTIUM

[HTTP://WWW.PJ2T.ORG](http://www.pj2t.org)

CURACAO, NETHERLANDS ANTILLES

Thanks for working our station! Each year since 2003, PJ2T has been the most-logged callsign in amateur radio, worldwide. We've been fortunate to have collected many contest plaques and set scoring records. Thanks for your QSOs that have helped our club reach this goal. Our QTH, called "Signal Point," is adjacent to the former Coral Cliff Hotel (now Sunset Waters). Our station is the site of the famous PJ9JT operations of the past 30+ years. The PJ2T callsign is used for our contesting efforts; non-contest operations use callsigns like "PJ2/"home call." The callsign whose QSO this card confirms appears below.

With towers of 100, 80, and 54 feet and multiple monobanders covering 6, 10, 15 and 20m and a 40m yagi at 107 feet, PJ2T can simultaneously beam toward Europe and the U.S. for contest operation. Wire beams and beverages serve on the low bands. Indoors are four fully equipped KW stations with an Ethernet network and DSL Internet connectivity. QSL Manager for PJ2T is N9AG or LOTW. The station is available for rental when it's not being used by club members. For rental info, contact [ghoward@kent.edu](mailto:ghoward@kent.edu).

## Grid:FK-88 IOTA:NA-105

The Netherlands Antilles voted to split into smaller countries on 10-10-10. The five islands of Bonaire, Curacao, Saba, St. Eustatius, and Sint Maarten had been planning this change for several years. Our focus was to help Sint Maarten celebrate this momentous occasion, and while doing so, we were able to activate a new DXCC entity.

CW and SSB stations were set up on two locations on different sides of the island. We used ICOM 7600 radios, Alpha 8410 amps, and DX Engineering, SteppIR, and Hex-Beam antennas. There were other equipment sponsors and we appreciate everyone's support.

The team consisted of 13 highly skilled, very experienced operators. Putting a new country on the air was an opportunity that none of us had experienced before. We are most appreciative of all sponsors, donors, crew, and the support team. It took everyone's effort to execute this operation.

Confirming our two way QSO:

Mhz	D	M	Y	UTC	2 Way	RS(T)
14	17	FEB	88	2006	CW	599
/						

FERNANDO DE NORONHA archipelago lies in South Atlantic. Its geographic coordinates are 3°50'27" South and 32°24'52" West. It is composed of 20 islands among which FERNANDO DE NORONHA RATA and RASA are the main ones. Its area is only 10,422 sm. We would like to say many thanks to PYØFF Andre and his XYL Ariadne for the invitation and wonderful hospitality. 11.000 qso's was made during our stay. We used a Kenwood TS820S/VFO 820 and Yaesu FT757GX, with 3 El yagi 3DX3 and vertical DXV3 made by Electrill, and inverted V dipoles for the other bands. We activated 160, 80, 40, 20, 17, 15, 12 and 10 meters, when the first transmission was made from the island on 17 and 12 meters. Thanks also to CWP and PY1DFF Claudio who sponsored our QSL card.

## ST. PETER & ST. PAUL ARCHIPELAGO

February 12-16, 2001

ITU Zone 13 • CQ Zone 11 • IOTA SA-014 • GRID SQ HJ50 • WLH LH-0003  
Operators: Jim PY7XC (Team Leader), Ciro PY7ZY, Ely PT7BZ and Andre PYØFF

The PWØS DXpedition team extends their sincere thanks to the Brazilian Navy, SECIRM, and especially CMG Tarcisio Alves de Oliveira, Brazilian Navy coordinator of the activities of the St. Peter & St. Paul Archipelago for their permission and support that made this operation a reality. SECIRM maintains a scientific base in the archipelago, where it sponsors ongoing research of the geology, biology, oceanography, meteorology and fishing activities in the area.

Thanks to all of the DXers whose thoughts and patience were with the team as they fought three days of very rough seas before they were able to safely land. Once there, continual high winds, lightning and rain threatened their operating site and created problems for generators, antennas and other equipment. The team persevered, and succeeded in putting 7,300 QSOs in the log in just under 50 hours of operating time. All bands from 160 to 6 meters were active, and QSOs were made on SSB, CW and RTTY. Further details may be found on the web at [www.soutomaior.eti.br/mario/paginas/dx.htm](http://www.soutomaior.eti.br/mario/paginas/dx.htm).

In addition to the sponsors whose logos are displayed, the team extends their sincere thanks to JA1WSK, PY2XB, PY7ZZ, PY7HL, PY7IQ, PY1RO and W8GC for their generous support of their efforts. A very special thanks to Bill, W9VA, who assisted in many ways to help the team in Brazil accomplish its objectives.

The operators in the insert picture are, from left to right, Andre PYØFF, Jim PY7XC, Ciro PY7ZY and Ely PT7BZ.

## São Tomé & Príncipe WEST AFRICA

Voice of America Transmitting Station, São Tomé Island

# 20M DXCC QSL CARDS ON4UN

The Voice of America transmitting site is located on 346 acres on the eastern-most point of São Tomé Island, in the Gulf of Guinea, off the west coast of Africa, about 20 miles north of the equator. We broadcast in multiple languages to most of the continent of Africa using a 600 kW medium-wave rig on 1530 kHz that feeds a two tower vertical array. Four 100 kW rigs, that can be connected to any of the 15 dipole curtain antennas, are used to broadcast a variety of VOA programs via shortwave to selected areas across all of Africa. We use a 100 kW transmitter on the tropical band near 5 MHz as well. We broadcast programs for the São Tomé government on 945 kHz using 20 kW and also use a low-power FM transmitter for broadcasting VOA programs to the city of São Tomé 24/7. My QTH is the house with the orange tile roof pictured on the front of the card.

DL2HWA Dietmar, DL2RNS Norbert,  
DL4SVA Georg, DL6JGN Hans,  
DL7JOM Olaf, DL7VEE Rolf, DM2AYO Sid

Tarawa is the most significant atoll in the Gilbert Island Group, which is located near the equator in the central Pacific Ocean. Here live about 50 % of the more than 100.000 inhabitants in Kiribati. During World War II Tarawa was the scene of bloody battles.

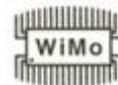

South Tarawa looks like a South Sea paradise – but it isn't. The highest point of the island is only 3 m above the sea. In about 50 years these islands could be flooded...

Our QTH was the Lagoon Breeze Lodge in South Tarawa. This is located about 5 km away from the airport of Bonriki, direct on the lagoon side. 11 operators with 5 stations and 10 antennas were able to log 69.000 QSOs from 160 to 6 m in CW, SSB and RTTY. 39 % of all QSOs were made with far Europe.

A big THANK YOU to DF1YQ, DJ8NK, DL2RVL, DL3NM, DO2AT, OE2SNL, PA3EWP and all our other sponsors!

ANOTHER DX-PEDITION BY I5JHW

KIRITIMATI, or Christmas Island has a colourful history. Captain Cook arrived for a brief visit on 24 December 1777 hence the island's name. Cook found remnants of early Polynesian visitors but no sign of permanent settlement. Largely unvisited until the 1850s, the island was then variously worked (unsuccessfully) by American phosphate interests and a New Zealand copra and pearl-shell company. In the 1880s it came under the umbrella of British interests in the Pacific, and officially became part of the Gilbert and Ellice Islands colony in 1919. Between 1957 and 1962 Christmas Island was the site for high-altitude hydrogen bomb tests, first by the British and then by the Americans.

Confirming QSO with: **ON4UN**

Band: 20m 2x: CW RST: 599

Pse QSL

73 and tnx qso. Giovanni I5JHW

Millions of birds were instantly blinded and later died in the immediate aftermath; both civilians and military workers have since experienced ongoing health problems. The tests had no obvious long-term environmental effects on the island and background radiation is now lower than normal levels. A massive cleanup campaign funded by

the British between 2005 and 2006 has removed almost all visible traces of this part of the Cold War.

KIRITIMATI Island, is a Pacific Ocean raised coral atoll in the northern Line Islands, and part of the Republic of Kiribati. KIRITIMATI Island, is well known for its world class bone fishing. It also has excellent birdwatching and

surfing opportunities.

Many thanks to Ms. Tinia Teuraria, Director of the Captain Cook Hotel, for giving me a good place to mount the antenna, and all the staff for their friendliness and helpfulness.

Thank you to all those who have had the patience to make qso, sorry for all those who have failed, but this was not a real dx-pedition, but a simple vacation with the radio. 73 and hope you next time, de I5JHW Giovanni

## ARCALA EXTREMES GOING DX IN A TURKISH WAY NOW IN ASIA

Turkey certainly offers you geographical variety – the largest city Istanbul is located both in Europe (TA1) and Asia (TA2) while the bulk of the country (97%) lies in Asia together with the capital Ankara (TA2). The Southern region features Antalya province (TA4) as a principal holiday resort on the Mediterranean coast, with great weather and beautiful beaches.

No wonder the Northern suntan types had to rush there and establish another light but permanent radio location. Not to cover the entire beach but just get their QSOs made while basking under the sun. As much as one can do with a mini-sized 2-L SteppIR and some wires hanging down from the roof.

As the saying goes, small can be beautiful. So they pushed the envelope to its limit and again stood at the podium, now scoring high in their home region European (WAEDC) contest. And come CQWW 2008, OH2PM's single 40M (TC4X) and OH2BH's single 80M (TA4ZA) were high box scores again.

There was an aura of mysticism as the Imam's call for prayer at 5 a.m. from the minaret of a nearby mosque coincided with radio contesting from culture rich Asia. A kind of culture mix – as it was!

To Radio: **ON4UN**

## COSTA RICA FACT SHEET - 2010

Although explored by the Spanish early in the 16th century, initial attempts at colonizing Costa Rica proved unsuccessful due to a combination of factors, including: disease from mosquito-infested swamps, brutal heat, resistance by natives, and pirate raids. It was not until 1563 that a permanent settlement of Cartago was established in the cooler, fertile central highlands. The area remained a colony for some two and a half centuries. In 1821, Costa Rica became one of several Central American provinces that jointly declared their independence from Spain. Two years later it joined the United Provinces of Central America, but this federation disintegrated in 1838, at which time Costa Rica proclaimed its sovereignty and independence. Since the late 19th century, only two brief periods of violence have marred the country's democratic development. Although it still maintains a large agricultural sector, Costa Rica has expanded its economy to include strong technology and tourism industries. The standard of living is relatively high. Land ownership is widespread.

### Location:

Central America, bordering both the Caribbean Sea and the North Pacific Ocean, between Nicaragua and Panama

### Area:

total: 51,100 sq km land: 51,060 sq km water: 40 sq km  
note: includes Isla del Coco

### Ethnic groups:

White (including mestizo) 94%, black 3%, Amerindian 1%, Chinese 1%, other 1%

### Religions:

Roman Catholic 76.3%, Evangelical 13.7%, Jehovah's Witnesses 1.3%, other Protestant 0.7%, other 4.8%, none 3.2%

**Languages:** Spanish (official), English

WAFER BAY  
COCO'S ISLAND  
PACIFIC OCEAN

QSL Via TI2CF  
Ing. Carlos Fonseca  
P.O.Box 4300  
San Jose, Costa Rica

COCO'S ISLAND is located 5°32' N, 87°04' W, 500 Km from the Costa Rican coast, 650 Km NNE of Galapagos Island, and has an area of 24 Km<sup>2</sup>. Known since the 16th century as "Isle de Coques", a favorite place for pirates, corsairs and whalers who used the island as a source for fresh water, wood, meat and coconuts. At least 20 treasures are said to have been buried here, including the loot of Lima by William Thompson in 1820 and Bennett Graham (Benito Bonito) with his ship "Lightning" who looted many cities and ships along the South American coast. During the 1800's over 400 expeditions spent years looking for these fabulous treasures, including Gissler who lived 18 years in the so called "Treasure Island", leaving an innumerable amount of caves all over the area. On the rocks at Chatham Bay one can find thousands of inscriptions of pirates and other visitors dating as far back as the 17th century. In 1874 the Costa Rican Government used the island as a prison for a period of 7 years. Uninhabited for the past 90 years, the island was recently declared a National Primary Forest Reserve and is the subject of many biological studies including the Darwin Finches and other unique species found only in this beautiful and exotic place. The Island is primarily composed of volcanic lavas covered by very dense vegetation, with high humidity due to abundant rains which give way to hundreds of waterfalls draining out into the Pacific Ocean through the high coral reefs. Landing is somewhat difficult and only possible at Chatham Bay in the north part (very small installation grounds) and Wafer Bay in the West side where in 1978 a complete amateur radio station and antenna tower system was installed by TI2CF and left there for future amateur visits. No permanent residents live on the island, therefore generators, fuel, some antennas and food are necessarily taken on each trip. Transportation is only feasible by chartered boats from Port Puntarenas and taking 4 days round trip. On behalf of the Costa Rican DX Club we congratulate you for being one of the fortunate ones to work us. Many thanks.

Verified and printed by DX4WIN

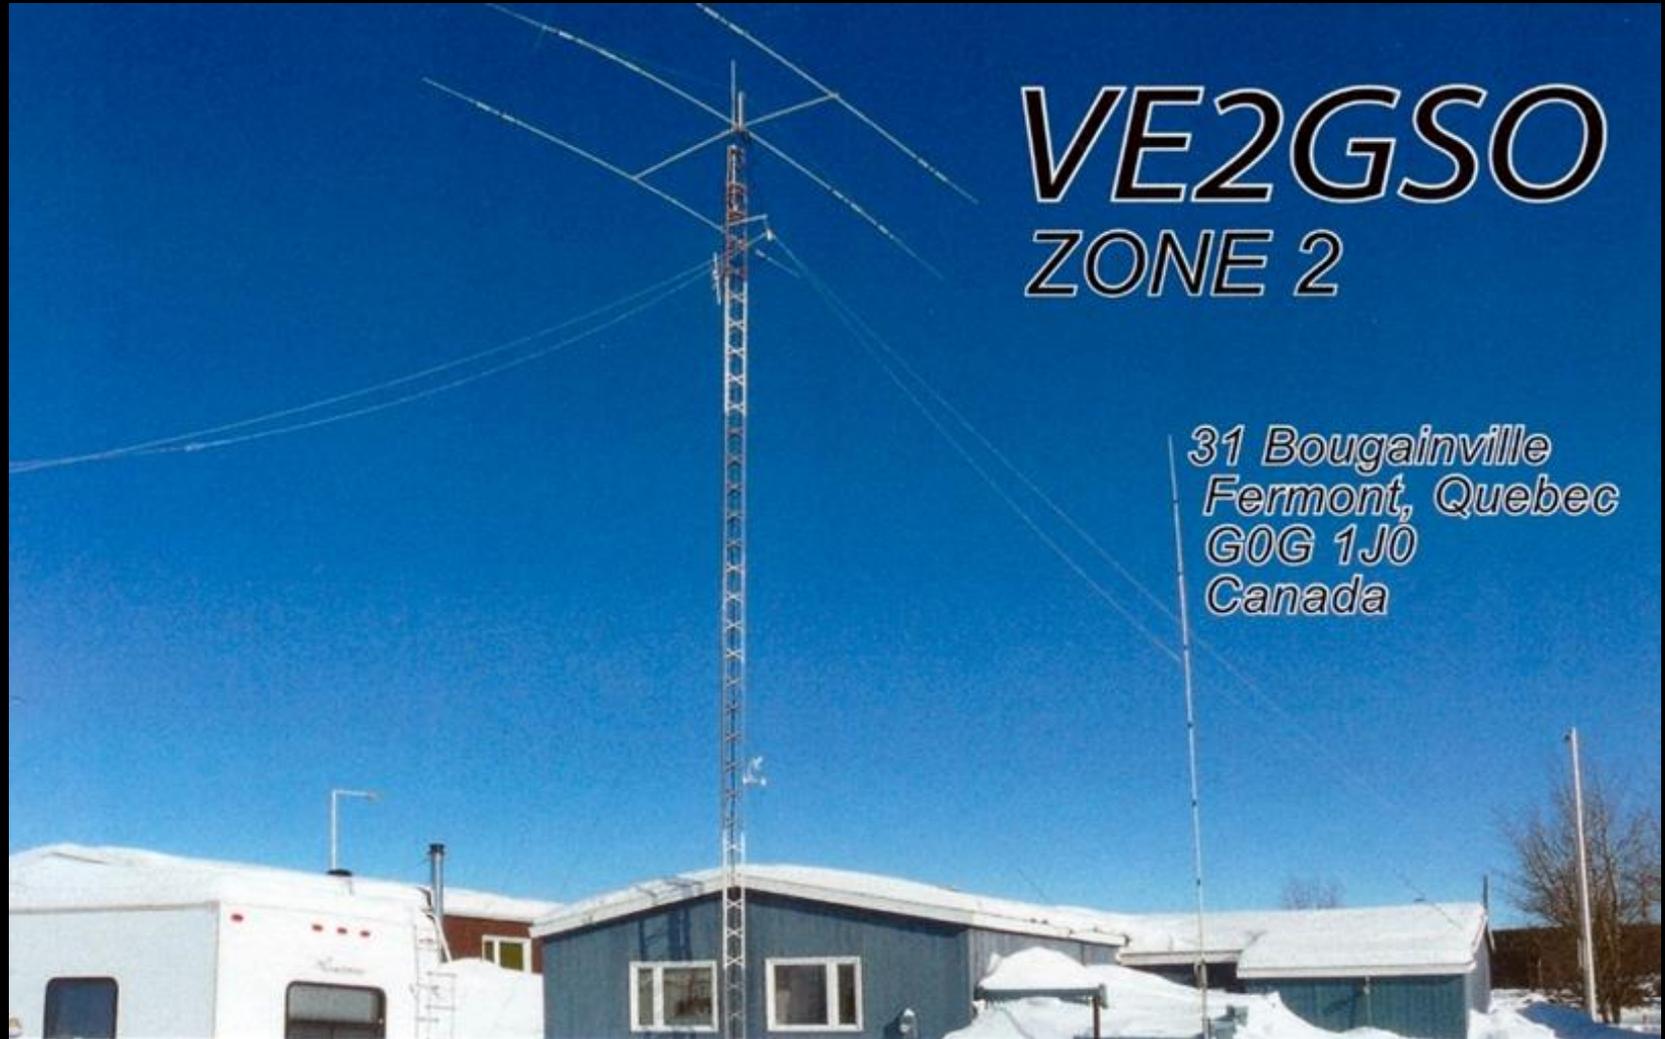

Brunei is the smallest country on the island of Borneo and encapsulated by Sarawak 9M8 and Sabah 9M6. It is a place I wanted to go to already for a long time and with the availability of the Tungku Lodge of Ambran, V85SS it became much easier to organize as I only had to bring my laptop and microHam interface. At the last moment I was in contact with John, 9M6XRO and we quickly decided to do this operation together. John and I enjoyed the fantastic stay at the lodge with all luxurious facilities. We were visited by several local hams and made some short visits to Bandar Seri Begawan. The conditions were not really good but we managed to run a couple of nice pile ups. I like to thank Ambran and family for their hospitality, good care, providing support and transportation. Furthermore I like to thank John, 9M6XRO/V8FRO for the nice time we had at this DX location and where we enjoyed sharing the stories of previous operations but also discussed possible future activities.

**Heard Island (IOTA AN-003)** lies at 53°05' S – 73°30' E. It has a total surface of 368 km<sup>2</sup>, dominated by the active volcano Big Ben, 2745 m high. It was discovered by sealers early in the 19th century. Heard Island is administrated by the Australian Antarctic Division and is now a wildlife refuge.

The expedition left Reunion on Jan 5, 1997 aboard the Marion Dufresne, the research vessel of the French Antarctic Division, and landed on Heard on Jan 12. Five hours and 50 helicopter flights were needed to land the 20 operators and the 34 tons of cargo. On Jan 14, VKØIR came on the air with 5 stations simultaneously; 2 more stations were added later on. The radio tents were distributed over 3 sites, separated by 1,000 ft. The last QSO was logged on Jan 27. Two days later, the crew and entire campsite were taken off Heard Island.

In 13 days of operation, VKØR logged 80,673 QSOs on 19 band/modes, including 1,241 on 160m, and 634 on satellite. We logged over 2,000 different RTTY stations. The expedition made numerous innovations, including daily uploads of the logs/updates/pictures via Pacsat, a very active pilot stations' network, and a real time analysis of propagation based on the computer logs. Our audience could read the daily reports, see the digital pictures and query the log servers both via internet and packet radio.

*Our technical support crew (the people behind the scene):*

*Murphy was on tour with us! We lost the first day after missing our airplane due to custom trouble in Jakarta, had to stop satellite operation after only 39 QSOs because of a failure of the 70cm transceiver, and had to pause operation several times, because of strong local QRM, that made any traffic impossible. 1100-foot-high mountains between us and stateside allowed only few contacts with North America. Nevertheless - we had a lot of fun!*

*In 74 hours of activity we made 7347 QSOs on 10 bands and enjoyed 80 meter activity into Europe as well as the first ever activation of Oscar 13 from this Island. Thanks to all who made this DXpedition possible.*

IOTA - DC 003, Tnx QSL, 73, s Rudi Mgr

*DJ 5 CQ  
Rudi Mgr.*

Cocos (Keeling) is a beautiful coral atoll in the Indian ocean about 1200 kms south west of Java/Indonesia. 25 tiny islands are scattered around a lagoon of about 7 miles in diameter. Cocos Island is a big underwater volcano, rising from 15000 feet below sea level to just 15 feet above. First sighted in 1609 by William Keeling and settled in 1826, the Islands became part of Australia after a plebiscite in 1984.

We had a wonderful time on the island. A superb QTH and perfect traffic conditions resulted in 15.285 QSOs with 130 countries. Especially enjoyable it was to have a lot of low band activity, even to stateside on 80 and 160 meters. Thanks to all who made this DXpedition possible.

## WORLD COMMUNICATIONS YEAR 1983 NORFOLK ISLAND

H.I.D.X.A.  
CLUB  
SPECIAL ACTIVITY  
AUG - NOV 1983

# VK9WCY

# 20M DXCC QSL CARDS ON4UN

**W.C.Y.**: communications in all its forms are vital to the well being of Norfolk Island. Its remoteness in the South Pacific Ocean - its nearest neighbour being New Caledonia which is over 700 km to the North - reinforces the residents of Norfolk Island's support for the objectives of the United Nations in declaring 1983 a "World Communication Year".

**PHILIP A. PAGE**

Minister for Tourism and Communications

**NORFOLK ISLAND**: a beautiful island in the South Pacific noted for its historic past and connection with the Bounty and Pitcairn Island. The island recently celebrated the 125th anniversary of the Pitcairn Islanders landing on Norfolk after abandoning Pitcairn Island. Some Pitcairners subsequently chose to return to Pitcairn Island.

Although nearly half of the island was destroyed because of the eruption of the Soufriere Hills volcano, which began in July 1995 and still goes on, and the capital Plymouth was completely buried by tones of ash and pyroclastic flows -as you can see in the picture-, life continues in the tiny island of Montserrat. In 1991 the population was 10.630, but now there are just about 4.000 inhabitants who live in the northern half of the island which is still green and perfectly inhabitable. They say: "Me nah move!" (I'll never move!) None of them have lost their smile and their kindness, though many lost everything.

We want to thank Shirley & Lou Spycalla from Erindell Villa for their marvellous hospitality, to Mr. Joseph Zephaniah (VP2MAZ) for helping us with the licenses, to Joe Phillips (VP2MBP), to our friends EA3AJI, EA3BHK, EA3BKI, EA3CR and EA3DIX and other EA3 friends for their support, to all those associations who have believed in us and to all those 11.776 QSO that have made this become real. And, of course, to our son Marc for his patience, To all, thank you!.

## A LAND WHERE NATURE IS STILL IN CONTROL

The Falkland Islands (population 2000), a British Crown Colony, are located 225 miles northeast of the southern tip of South America.

Port Stanley, on the eastern island, was the launch pad for one of the greatest DX adventures ever. It was from here that the six week VP8SSI South Sandwich Island and VP8CBA South Georgia Island DXpeditions commenced.

Falkland Island radio amateurs and their families extended generous hospitality toward the DXpedition members. The Falkland Islands hams shared their homes and stations allowing expedition members to make 7,000 QSOs signing VP8BZL.

Following departure from Port Stanley, the ABEL-J, a 106 foot American research vessel, became the platform for VP8BZL/MM concurrent with the 2,200 mile voyage.

Our sincere thanks go to VP8s: WA, ZV, ALJ, BFH, BOQ, ML, and NY and to the Falkland Islands Amateur Radio Association.

## *We hope you enjoyed your contact with VP8SSI*

The South Sandwich Islands are located in the Scotia Sea 1,150 miles southeast of the Falkland Islands within the Antarctic pack-ice region. Forming a glacier-covered arc, the eleven volcanic islands rise steeply from the icy water.

Southernmost in this mountainous group is Thule Island, the base of VP8SSI, rising 2,600 feet from the sea. Projecting from the cliffs of Thule is a small exposed land area - the only area suitable for landing and camp location. Because of the constant crashing surf, few landings have ever been attempted without a helicopter. Our Zodiac shore landing was rough and wet!

The famous British explorer, Captain James Cook, sighted the South Sandwich Islands in 1775, noting extreme winds, snow, cold and cloudiness with rare moments of sunshine. Cook's observations proved to be true as hurricane force winds shredded our arctic tents, driving us into the ruins of a tiny rescue hut from where we had to evict several seals. Hostile weather and aggressive fur seals challenged the expeditioners daily.

Cook described the South Sandwich Islands as "the most awful place in the world." Having experienced one of the greatest DX adventures, the team became believers in Cook's powerful words. A successful landing was made thanks to the skillful crew of the American research vessel, the Abel-J. Despite the adversities, 40,000 QSO's were made and the team proudly hoisted the British flag in celebration. We congratulate you for making this contact. We sincerely thank our supporting audience - you made the VP8SSI dream come true.

The team would like to thank all amateurs, groups and companies who have helped us with donations: Kenwood USA, Corp., Cushcraft Antenna Corp., MFJ Electronics, RF Enterprises, Bob Heil Sound, IIX Equipment, Ltd., International Wire and Cable Co., Bencher Iambic Paddle Inc., Gap Antenna Products, Inc., Butternut Electronics, M Squared Electronics, Sierra Technologies Group, Synthetic Textiles Inc., Cabela's, Gateway 2000 Computer Systems, Logikey Co., Den-Tronics, Xantek, Inc., W9INN Antennas, J\*COM, KD7P Software, W6EL Software, W1FM Software, Payl Software, KD2LL Software, Aerospace Consulting Software, AMSAT, Personal Database Applications Software, R&D Electronics, Patagonia Inc., W8GZ DX Foundation, Lightning Bolt Antennas, CPS-Hamrad, WB2DND Software, U.R.E., and to 5/9 Magazine Japan.

Also special thanks to G4DYO and the Chiltern DX Group, VP8's-WA, ZV, ALJ, BFH, BOQ, ML, and NY, JA1ACB, JH3DP8, JA1ELY, WJ1R, K1BV Helen and Ron Green, KB7IVU, KC1MH, JA0KZ, AH2BE, WW5L, JA3AUQ, JA3DGV, JA3PFZ, JA3MNP, JJ3PFZ, K0LST, EA6WV, OH DX Boys, San Diego DX Club, SEDXA, Long Island DX Assn., IARS, Birdland, U.K., IRDXA-W6PQS, and to Captain Hamilton Carter & crew of the Research Vessel ABEL-J & Spice Island Traders.

The Henryk Arctowski Station of Polish Academy of Sciences was found on 26 Feb. 1977 in Admiralty Bay on King George Island at South Shetland archipelago. The staff of the station realizes the polar project of Polish Academy of Sciences. Biological, meteorological and geophysical (seismology magnetism and ionosphere) researches are carried out all the year. Constant staff of the station amounts 19 persons including scientists and technicians. The station receives scientists from other countries on the basis of the manual exchange. The main coordinator of researches carried out the H. Arctowski Station is Institute of Ecology of Polish Academy of Sciences-Dzianków Leśny near Warszawa.

## NATIONAL INSTITUTE OF AMATEUR RADIO

The NIAR is committed to implement plan of establishing a nationwide net work of Amateur Radio Clubs in India.

The NIAR has objects such as, to Promote ham activities in the area, Organize training programmes, Provide equipment to licenced hams, Develop friendship along local amateurs and to help during emergency.

The NIAR Club is a boon for those interested hams who cannot have their own sets.

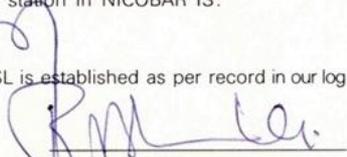

The NIAR made the DXpedition for VU7WCY/Laccadive Is. in 1983.

The DXpedition VU4APR/VU4NRO was organized by following operators.

VU2BL, VU2BQZ, VU2DS, VU2DSV, VU2JOS, VU2KNN, VU2LKP, VU2MY, VU2MYL, VU2NB, VU2NSN, VU2NUD, VU2RAT, VU2RBI, VU2SRX, VU2SU, VU2SUS, VU2TO, etc.

The operation was acted by five different stations, four stations in ANDAMAN IS. and one station in NICOBAR IS.

This is to certify that the QSL is established as per record in our log book.

## XF4DX REVILLAGIGEDO DXPEDITION 1987

Confirming QSO	FEB. 87	UTC	MHZ	MODE	RST
ON4UN	2 <u>3</u> 4 5 6 7 8	1750	1.8 3.5 7 <u>14</u> 21 28	2x SSB <u>CW</u>	<u>59(9)</u>

Revillagigedo consists of three small islands and two adjacent rocks – all volcanic in origin. This archipelago lies 450 miles off the Western coast of Mexico, at 19 degrees North, 111 degrees West. Socorro, the largest island, contains a small airstrip, built in 1983, & is manned by a small military garrison. Socorro is about 24 miles long & 9 miles wide; its volcanic peak rises to slightly over 3700 feet high. XF4DX operations were conducted from the airstrip itself, with tents & generators & gear set up around the plane, a Grumman G-1. Our primary objective was to give XF4 to those who needed it most – mainly Europeans. In 93 hours of operation we made 15,110 QSO's – 8718 CW, 6392 SSB. Expedition Members: XE1ALD, XE1HC, XE1JAK, XE1IKP, K4UEE, WA8MAZ, K9AJ, K9VV, WØRLX.

## Vanuatu Geography

Vanuatu is an island archipelago consisting of approximately 82 relatively small, geologically newer islands of volcanic origin with about 1,300 km north to south distance between the outermost islands.

The nation's largest towns are the capital Port Vila, situated on Efate, and Luganville on Espiritu Santo. The highest point in Vanuatu is Mount Tabwemasana at 1,879 metres on the island of Espiritu Santo.

## **YK9G** UK DX-pedition to Damascus, Syria Grid Loc : KM83

In just under seven days a team of five UK operators (**Roger G3SXW**, **Nigel G3TXF**, **Fred G4BWP**, **Lionel G5LP** and **Rob GM3YTS**) made 28,100 CW QSOs (net) operating as **YK9G** from the **YK0RJ** club station in Damascus.

The operators are most grateful to **Omar YK1AO** and **Marwan YK1AU** of the Syrian IARU member society **SSTARS** for their invaluable assistance with the licence and logistical support.

## THE FINAL FANFARE WITH A BRAND NEW DXCC STATUS

*It is very rare for a new DXCC Entity to be born in the middle of busy Europe. This has brought some special excitement and joy to the air waves.*

For Kosovo this joy was doubled as their new ITU (+383) country dialing code

was activated at the same time. Whether by radio or by telephone, the mountainous state of Kosovo is now truly connected to the world. It was time for jubilation by both radio folks and by telecom administrators: DXCC country 340 is here. The distinctive blue-yellow flag of Kosovo is proudly flying high.

The first two radio venues were the SHRAK HQ at the Technical University in Pristina and the out of town Ura Gurit Hotel in Vushtrri, some 20 km away. Tall antenna towers were installed and Kosovo suddenly became the most sought-after country across the bands. Tens of thousands were there wanting to catch a new star, Z60A. As the local power lines were noisy, and noisy LED lights illuminated the area, it was better to look for a much quieter location that was as far away as possible from people and noise.

An empty, war torn house was found at 1000m ASL. Unlimited space for beverages was also available. While the house itself was riddled with bullet holes, there was one corner that, thanks to gas heating, was cozy for operating. This house became home for our low-band operations in the later weeks. While the temperature was often down to minus 17C (2F), the warm feeling of handing out low-band counters more than made up for it.

## ZD7XF - St Helena Island

IOTA : AF-022

Grid : IH74db

Operating as ZD7XF from St Helena for nine days in June 2011 and also for fourteen days in March 2012, Nigel G3TXF made 28,000 CW QSOs across the nine HF bands.

The RMS St Helena continues to provide the only regular passenger and cargo link with the outside world, until the new airport on St Helena opens in early 2015. The photo shows the RMS St Helena arriving off Jamestown. Many thanks are due to Bruce ZD7VC for his help with planning these two DX-operations from St Helena.

# 20M DXCC QSL CARDS ON4UN

## ZD9IR

Chris de Beer is an advanced life support paramedic, whose job has taken him to six DXCC countries over the past five years. In most of these spots, he's played ham radio. He's also travelled extensively apart from work, and has operated as 3DAØZ, 5H4IR, 5H9IR, C9/ZS5IR, KF6NOF, ZK1XXP, ZS5IR, ZS6RI and ZS8IR.

Gough Island is a British possession, and is administered from Tristan da Cunha island. Its location in the Roaring Forties makes it a less-than-ideal holiday destination, but the weather is temperate with an average monthly temperature of 10 to 22°C. Freezing weather is rare. Population is several million, mainly petrels and albatrosses. The only humans on the island are the six crew members of the South African weather station.

Environmental concerns have made it very difficult to install good antennas, but Chris has managed to complement the C3H tribander with wire antennas for the low bands. His activity has covered Phone, CW and RTTY.

Gough and Tristan da Cunha constitute the same DXCC entity. As activity from the latter has been rather sporadic, ZD9 eludes many DXers. To ensure that the masses have the best crack at working the islands, the NCDXF provided a radio, a weather-hardened antenna and the QSL cards. Steve Bookout NR4M of Rapidan Data Systems provided a complimentary copy of DX4WIN. Bernie van der Walt ZS4TX is providing a Super Combo Keyer. Chris R. Burger ZS6EZ and Rusty Epps W6OAT assisted with logistics.

TNX QSO ES 73 DE DAVE, W4DN

**OPERATORS:** (L. to R. on Photo) **Bob Patten ZF2DE (N4BP); Julio Ripoll ZF2JS (WD4JNS); Bruce Phegley ZF2PU (W4OVU); Dave Novoa ZF2DN (W4DN Ex-KP4AM).**

LITTLE CAYMAN ISLAND is located in the Caribbean Sea, 19.8 N and 80.0 W or about 150 miles south of Cuba and 100 NW of Jamaica. It has a permanent population of less than 50 very friendly Caymanians. The Island is flat and measures 1 X 10 miles. Diving is excellent, food is very expensive. Temperature and humidity were very high during the five-day operation. Despite equipment problems and poor propagation conditions, we logged 2445 QSOs (1540 on the IARU contest, 1005 before and after, including 210 on 6 meters and RS-12 Satellite). Our Thanks to: Max Price, Chef and scuba buddy; Bruce Sawyer, N6NT; Betty Bua; Marilda and Camil, and our respective families for their cooperation and support.

EQUIPMENT: Kenwood TS-440 & Collins 30L1, Antennas: Tribander & Dipoles; Yaesu FT-690R 11 & Cubical Quad for 6 meters.

During 14 days of our stay on Chatham Island (from October 5 till October 18.2007) we made almost 15.000 two way QSOs cw/ssb/rtty with our friends all around the World. Thank you all for your cooperation in the pile up. We would like to offer special thanks to **SP7HT, ZL2DZ, SPDXC** and also to Rybnik Department of Polish Association of Mining Engineers and Technicians (**SITG**) for card printing. Warm thanks goes out to the owners of Awarakau Farmstays - **Greg and Rosemarie Horler**.

Tnx for QSO/QSL, 73 ! .....

*Our first visit to Paraguay in the heart of South America was a great experience and adventure for us. Friendly people showed us a new culture and lifestyle. Of course we visited the famous Iguassu Falls and the giant dam Itaipu. Special thanks to Tom, ZP5AZL/ZPØR, and his family for a warm hospitality. To work at his big contest station was a good feeling, only the conditions were rather poor. Thanks for nearly 7000 QSOs, but no QSO on 12 & 10 m. QSL via our homecalls in return direct or via bureau.*

**The Island:** Marion is one of two islands comprising South Africa's Prince Edward group. The island is roughly 20 km in diameter, rises up to 1230 m elevation, and lies at 46° 53'S 37° 52'E, 1600 km off the coast. As could be expected in the Roaring Forties, the island is extremely windy, with gales on around 110 days annually.

The island has a rich variety of bird and mammal life, and killer and humpback whales hunt and breed in the cold waters.

The permanent weather station on Marion is home to 12 weathermen, biologists and support staff. The crew remains on the island for just over a year, with no means of getting supplies onto or off the island.

**The Operator:** Chris de Beer (ZS5IR, formerly ZS6RI) took a year off from being a paramedic to become the medical officer for the 53rd relief crew on Marion. ZS8IR is the first personal callsign to be issued for use on Marion; previous operations have used the club callsign of ZS2MI or ZS8MI. Antennas consist of an assortment of wire antennas, including rhombics, a 50 MHz Yagi and a low band vertical.

**The Supporters:** The NCDXF came through with a linear amplifier and QSL support. The Lone Star DX Association, Marc Lurie of LAR, Hal Lund ZS6WB, Jan van Niekerk ZS6NW, Uli von Aswegen ZS6IR and Chris Burger ZS6EZ all contributed equipment. Software was supplied by WF1B (RTTY) and ZS6AJS (Swisslog). The Battle Creek Special low band antenna was provided courtesy of the NCDXF, WØCD, W8UVZ and K8GG.

**The Equipment:** IC735 FL2100Z (400 W output) PK232-MBX

## OKINO TORI-SHIMA & 7J1RL

Okino Tori-shima is a coral reef at 20°25' N 136°05' E, lying in the midst of the Kyushu-Palau Ridge. Its size is about 5km in length east to west and about 2km in width at its easter part. During 1939 and 1941 a circular basement, 40m in diameter, was built by concrete blocks to construct a meteorological station, light house and seaplane base on, but the work was abandoned due to the War.

JARL, in commemoration of its 50th Anniversary, sent a DX-pedition to the reef. The expedition station 7J1RL was operated on two iron scaffolds erected on the construction mentioned above from 30 May 1976 to 2 June 1976 and was contacted by 8,931 stations in 73 DXCC countries.

## HKØAA

Bajo Nuevo...

This seldom visited reef is located 300 miles north-east of San Andres Island, south-west of Jamaica in the Caribbean Sea. Landing is only possible at a low sand bank, 200 metres long and 10 metres wide. Our expedition was organized at San Andres Island and we took off from there in a 40 foot diesel boat. SMØAGD tried to find Bajo Nuevo back in 1974 but failed because of navigation problems. This time we used Loran-navigation and managed to locate the low reef which is visible only from within a distance of 3 naut. miles. During the 67 hour operating period, we made 6300 QSO's from Bajo Nuevo.

This expedition was organized by Sundsvall DX Group, Sweden, and sponsored by Northern California DX Foundation, Inc.

Equipment: 2- Yaesu FT 101 E. 1- FL 2100 B.  
1- Heath SB 200.

Antennas: 12 AVQ, 18 AVT and dipoles.

D	Date	UTC	MHz	RST	2-WAY
	26.03.07	19:40	14,16	59	SSB
					ON
					

In March 2005 five german contesters visited Curacao, NA (SA-006) to participate in the sideband portion of the CQ WW WPX Contest. Some of us have never met before, but immediatly we felt like a team working together since years. With the great support from Geoff (W0CG) and the Caribbean Contest Consortium (CCC), letting us use their great station at Signal Point (PJ2T), we were able to claim 32 Million points. This should be good for the world #1 or #2 seat in Multi/2 and with some luck also for the world record. Thanks to everyone who worked and supported us. More Info at [www.pj2t.org](http://www.pj2t.org)

In 1959 The Sudan was plunged into civil war-North versus South. The war lasted until May 7, 1972 when the Addis Accord was reached between General Nemeiry of the Sudan and the southern guerrilla leaders.

The three provinces of Bahr-el-Ghazal, Equatoria, and Upper Nile were granted complete autonomy with two exceptions; foreign policy and defense. The capitol of the Southern Sudan was established at Juba.

The area is comparable in size to England and is inhabited by an Arab/African people who are proud of their autonomy. During 3½ days, some 3200 QSO's were made in this first amateur operation from the autonomous Southern Sudan.
