SOVEREIGN MILITARY ORDER OF MALTA

SMOM - Sovereign Military Order of Malta - is a fully independent entity with an ancient tradition and glorious history. Founded before the conquest of Jerusalem in 1099 by the crusaders, recognized in 1113 by Pope Pascal II, from 1310 to 1522 SMOM held the sovereignty of the island of Rhodes, and from 1530 to 1798 of the island of Malta. Then, after temporary Sees, the Order established itself in 1834 in Rome where it holds several extraterritorial areas.

Its members are known as the "Knights of Malta". Under the provision of International Law, the order maintains diplomatic relation with 64 countries in the world as well as with many international organizations. His most Eminent Highness the Prince and Grand Master of the Order rules over a world-wide organization dedicated solely, at its ancient tradition dictates, to providing assistance in the hospitaller, charitable and social fields.

Regarding 1A0KM, which is located in the extraterritorial zone of "Villa Magistrale all'Aventino" (Loc. JN61FV) in Rome, Italy, special thanks are due to the Grand Magistry for its assistance.

Our sincere appreciation to all who supported this DXpedition. The Soviet-Vietnamese Joint Venture Company, "CUULONG," which made funds available, to INDEXA, NCDXF, and Mosley Electronics for their support with equipment, antennas, QSLs and much needed funds. We also wish to thank RW3AH, JH3DPB, and the many JAs, XV2 and 3W operators who donated VHF/RTTY stations. Most important is the support we received from individual amateurs and clubs worldwide, who had faith in us to conduct this DXpedition and whose continued support will help us fulfill our financial obligations.

On Tour Again - December 1998

Spending the christmas days under the tropical Sun turned out to be a nice experience for us five Germans who went to Fiji, where we discovered a delightful paradise and its friendly inhabitants. About the same number of Fijians and Indians live on the island providing for an interesting mixture of customs, cultures and cuisines. We stayed at the Horizon Beach Resort near Nadi airport on Vitu Levu's West coast finding both a helpful crew and space enough to erect two verticals and a beam. The sun surprised us with 150 spots facilitating our traffic with Europe around the clock. When after 16000 QSOs we closed our logs, Europe had a share of 40%. Just the other way round all our nine-band-contacts were Ws and JAs. Anyway, hoping you had fun catching us, we'll be seeing you from our next DX-spot ...

Guinea is located in West Africa and has 300 km of coastline on the Atlantic Ocean. It shares borders with six countries: Guinea-Bissau, Senegal, Mali, Ivory Coast, Sierra Leone and Liberia. The land area is divided in four topographical regions: Lower Guinea (Maritime Guinea), Central Guinea (the Fouta Djallon), Upper Guinea (the Mandingue) and the Forest Region (the Guinean Ridge). Typical vegetation in Maritime Guinea is the mangrove tree, in Upper Guinea grassy or tree-covered swamp, and in the Forest Region dense forest. The principal watercourses of all the West African countries have their sources in Guinea, which is often called "the water tower of West Africa".

Guinea was a French colony for 60 years, from 1899 to 1958, gaining its independence on 2 October 1958.

The best-known of Guinea's masks are the Baga nimba, which depict the goddess of fertility, a woman with large breasts and scarifications representing grains of rice, the main Baga crop. The Baga wear the masks during weddings and agrarian festivals to beseech the goddess to increase the fertility of women or the earth. Baga and Nalo women wear the wooden and raffia banda mask, which depicts a horned crocodile and invokes the water spirits for rain. The Baga's bird-shaped labemp is used on festive occasions and celebrations marking the end of initiation rites.

Location during our stay in Guinea was the Hotel Riviera Guinée. We operated simultaneously with up to four stations from 160m to 6m. We logged 52385 QSO's, including 1240 on 160m, 4287 on 80m, 3263 on 30m, 5437 on 17m, 6559 on 12m, 2103 on 6m, 2221 on RTTY, 170 on PSK31 and 66 on SSTV.

Many thanks to all who made this DXpedition possible, especially to Khalil, our Guide, Francois, VE2XO and Bernd, DF3CB for the pilot and website support and Joost, ZSSS for Pactor MBO support. Thanks also to Kabel Kusch.

BOUVETØYA

The island was discovered January 1, 1739 by Frenchman Jean-Baptiste Lozier Bouvet. It was the first known sighting of land south of 50° South. The first landing was by an American expedition in 1823. The island was more accurately positioned by the German Valdivia expedition in 1898-99.

In the 1927-28 southern summer Consul Lars Christensen of Norway equipped the vessel SS Norvegia for scientific research in the South Atlantic, and the expedition landed and claimed the island for Norway on December 1, 1927.

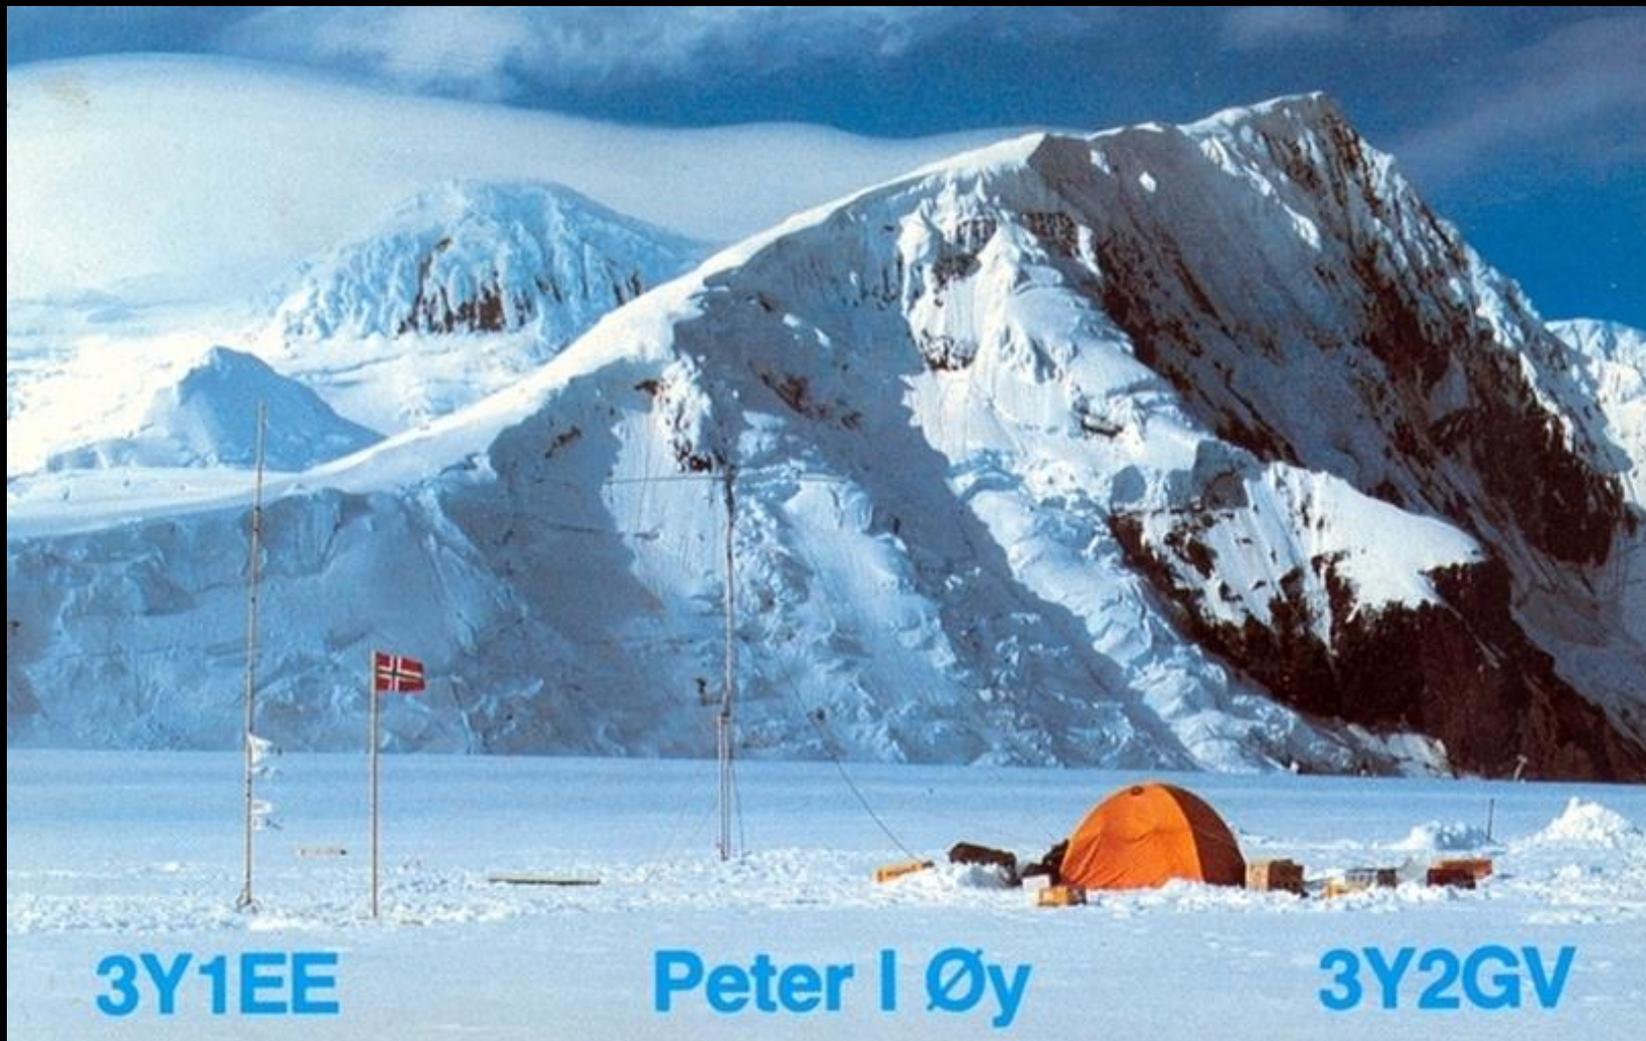

A Norwegian law of 1930 gave the island status as dependency. It abounds with seals, penguins and other sea birds. By a Royal Resolution in 1935 sealing was prohibited on the island, and a Royal Decree of 1971 declares the island as a nature reserve.

The island is located at 54°25' S and 3°21' E, and measures about 6 by 9km. Fully 93% of the island is covered by ice, and steep cliffs almost around the whole coast, together with high seas make landing very difficult. The island is located at the southern end of the Mid-Atlantic ridge, and is an extinct volcano. No volcanic eruptions have been registered by visitors, but fumaroles are frequently observed.

The area Nyrøysa was formed by a large rock-slide between 1955 and 1957. This area on the west coast of the island is the only safe site for expedition camps. It forms a plateau rising to an elevation of about 50m above the sea-level.

Past Norwegian expeditions had made an accumulated total of about 2500 QSO's from the island: 3Y1VC and 3Y3CC in 1977, 3Y1VC and 3Y5DQ in 1978-1979.

A NEW COUNTRY BY POPULAR VOTE

THE STORY OF THOSE 117,000 QSOs AT 403T

No doubt the participants and operators of 403T value one experience above everything else. The beauty and cleanliness of this coastal country coupled with the friendliness and hospitality of its people will make Montenegro everyone's favorite. It's simply a new DXCC country worth a visit – a beauty not to be missed.

This "Hidden Pearl of the Mediterranean" boasts 293 kilometers of beautiful Adriatic Sea coastline dotted with three 403T stations. Huge beams radiated RF power to faraway lands to salute this new Republic on its birth. People from 16 countries participated in the DX Festival at various times during a period of three weeks.

But along with the Montenegro experience, people who had never met before proved that one common denominator – DX – would bring them together in a friendly manner to witness an event of their lifetime with team building and group dynamics as well as with enough operating hours under their belts to sense the lifeline of DXpeditioning – running pileups day in and day out on all bands.

We owe a great debt of gratitude to Ranko, YT6A and Dragan, YT6Y along with the Organizing Committee for their efforts in providing those present and others out in the world with one more DXperience and another mega DXpedition as those with more than 100K QSOs are often classified.

We thank Telecom Authority (AGENTEL), NCDXF, EUDXF, Vertex Standard (Yaesu), SteppIR, Acorn, Intrograf and SKY Contest Club for their valuable support.

We wish to thank all of the DXers who helped make our 4W DXpedition a memorable one. Hopefully you had as much fun working us as we did getting those 13,000 contacts into the log. Although the trip proved to be challenging in some ways, we feel reasonably satisfied that we had accomplished our goal: "Provide a new country for DXers on the 160, 80, 40, & 30 meter bands." Some 5,400 QSOs were made on those four low bands.

Special thanks are extended to:

- Thor, 4W6MM, for all his kind logistical support and encouragement.
- Ross, 4W6UN, for his guidance to insure our DXpedition was both legal and safe.
- Steve, VK3OT, for his assistance in bringing us together with the local 4W6 operators.
- Made, YB9BV, for his support in logistics and planning.
- Rod, WC7N, for his yeoman's job serving as a Pilot Station.
- Andy, W6/G4VPM, for keeping our web page current and providing web logs.
- Jim, N7JW, and Al, K7CA, for building and donating a 160 meter antenna which helped us make 439 Topband QSOs.
- Mr. Alan Boerenhout with the United Nations in New York for expediting our licensing request.

Our DX-pedition was organized by the Radio Club of Youth Organizations Committee and the Bureau of Communications of the Revolutionary Committee of Libya. We were active from July, 11, 1995 to July, 25, 1995 on all bands CW and SSB. During this time we made over 35.000 contacts. We had organized the first Libyan Youth Radio Club on the base of International ASSAKR club. We express our hearty gratitude to everyone, who made the 5A1A operation possible: the Bureau of Communications of the Revolutionary Committee of the Great Socialist People's Libyan Arab Jamahiriya, the Government of Libya, the Government of Ukraine. We would like also personally thank to: Mr. Seid Shenfir, Mr. Sharaf Mohammed Al-Haiali, Mr. Nick Tsymbal, Mr. Alex Chizh, Mr. Valery Eshchenko, Mr. Rafaa Elmadani, Mr. Ali Abdullah Ahlab, Mr. Mohamed Khlaf, Mr. Ali Joida, Mr. Usaama Ismail, Mr. Saddyk, W4BRE, K2ENT, JA1BK, JH1AJT, JK1KRS, JR1IOS, K1GW, UU8JJ, LZ2UA, OM3JW, UX0UN, UT5UT, I0ZV, IK0DWN, IK2ILH, I2MQP, HA8XX and many, many amateurs from around the world for making this such a highly successful DX-pedition.

40M DXCC QSL CARDS ON4UN

TWO WEEKS OF RADIO ARCALA'S BONGO DRUMS IN MADAGASCAR, AFRICAN ZONE 39

Radio Arcala traveled to Madagascar to put 5R8 on low bands and in the CQWW SSB Contest with 14,560 QSOs of which 4,607 on low-bands, consisting of 8,610 unique calls, to claim ultimate success — hence this QSL.

Radio-wise, they applaud the two K3s for performance, size and appearance as the rigs passed through Customs easily, with no eyebrows raised. In the pileups, they were able to sort out each and every caller — hence this QSL.

But ultimately it was a massive antenna jungle with phased verticals over a guarded field. At dawn the low-band convoy left base camp for a 12-hour stint on the field with no sanitary facilities. And finally it all paid off when the top-band opened at the end of the second week — hence this QSL.

Another stint of DXotica with another hasty military coup underway did not hamper this DXpedition, nor was a single bullet fired — hence this QSL.

Thanks to Ake, 5R8FU and Jacqueline at La Villa Suede for hosting 5R8X and to NCDXF and OHDXF for their logistical support.

EQUIPMENT:

2 x Elecraft K3 & Alpha 91B, phased verticals & Hy-Gain TH11DX.

5X1M confirms QSO.
Thanks to ON5NT for QSL service!

I had a wonderful time in Kampala with Peter Casier's family. Thanks to Tine and Peter for a very pleasant and interesting stay in Uganda. During the CQ WW CW contest 1997, I operated with Peter's callsign, 5X1T, in 20m single band, setting a new record for zone 37. Outside the contest I operated as 5X1M.

When putting up the 80m vertical, one of the fiber sections broke. What do you do when you are in a place near the equator and where you don't easily find a do-it-yourself shop? You look for bamboo in your own backyard. So if you hear 5X1T on 80m these days, ask him about his bamboo vertical!

DL2CC is: Frank Grossmann, Schwabstrasse 22, D-70197 Stuttgart, Germany
E-mail: frank@grossmann.com

CW forever!

73, see you next contest - Frank

Guyana

Guyana is a tropical country on the northern shoulder of South America, 215,000 sq km in area approximately the size of Great Britain, and bordered by Venezuela, Brazil, Suriname and the Atlantic Ocean.

Guyana first gain European notice in 1498 with the voyages of Christopher Columbus, it was the stage for competing colonial interest – British, French, and Dutch – until it officially became British Guyana in 1831. In 1966 the country gained independence, and adopted the name Guyana.

Imagine Guyana

Imagine a place of incredible beauty where nature still reigns supreme, where time has stood still or at least moved at a slower pace to the rest of the world. Imagine a city built almost entirely of wood in the beautiful colonial style architecture that has no comparison elsewhere in the world. Imagine pure, fresh rivers of dark, deep waters reflecting like mirror, the lush and vibrant rainforest that crowds their banks. Imagine the brilliantly coloured birds and butterflies that swoop and soar over their polished surfaces. Imagine a thousand breathtaking waterfalls and magical creeks. Imagine virgin rainforest, home to an innumerable species of rare exotic plant and animal life. Imagine majestic mountains and rolling savannahs as far as the eye can see where ranchers and cowboys ride the last frontier on the open range. Imagine the hiss of the rawhide lasso and the dust and the danger of the coral. Imagine Eldorado, a land that nature has blessed with untold riches of diamond and gold just beneath its surface, where bold adventures set off in search of sparkling treasures. Imagine warm tropical breezes and the song of the tree frogs at night. Now open your eyes, forget imagination. This reality. This is Guyana.

Josef „Sepp“ Rindfleisch, DJ7CY

16 Feb. 1930 - 20 Feb. 2002

On the occasion of the twentieth anniversary of the Bavarian Contest Club (BCC), we organized a DXpedition to the Kingdom of Nepal and dedicated it to the memory of DJ7CY. We operated from a beautiful penthouse-like office on top of the Nepal Bayern Electric Corp. (NBE) factory building with a magnificent view over the Kathmandu Valley and all the way to the majestic Himalayas. In spite of the very high noise level, the team managed to log 26,402 QSOs. Of those, 685 QSOs were on 160m and 1,925 on 80m. 79% of all QSOs were in CW. It was great to receive excellent reports from all over the world. However, it was a pity that not everybody who heard us well made it to our earphones. The team is deeply grateful to Satish, 9N1AA, Gourish, 9N2AA, as well as Lochan, the co-owner of NBE, Walter, the son of DJ7CY and Bernd, DF3CB, who created the beautiful home page <http://www.DF3CB.COM/9N7BCC> for us. We enjoyed the company of the very friendly and charming people of Nepal, who seem to have a much more positive attitude towards life than many people in the well to do western countries do. We just hope that the present political unrest in Nepal will soon be overcome for a better, more prosperous and peaceful future. The people of Nepal deserve it.

Sepp, licensed in 1959, was somebody whom you hardly ever heard on the bands. If his challenging responsibility as owner and chief executive of a precision tooling company left him any time, he spent it in his shack trying to find rare stations, especially on the low bands. He was a CW only op, a "full house" member of the "DXCC Honor Roll", a long time member of the BCC, and above all a very good and trusted friend of ours.

Six operators, five transmitting antennas, four low band receive antennas, three stations, two exhausting flights, and one common goal. These were the ingredients for our successful dxpedition to the Democratic Republic of the Congo. The expedition playground was situated at the suburbs of Kinshasa near an industrial zone with lots of noise from various sources. Fighting the tropical QRN and manmade noise, especially on the low bands, was a real challenge for us. Despite all this and the frequent power cuts we managed to put more than 30.000 QSO's in our log. 565 QSO's on Top Band, 3000+ RTTY QSO's and 12.217 unique call signs are a few astonishing figures we can only be proud of. We like to say THANKS to our sponsors, all individual donators, the A.R.A.C, and our host Frère Luc.

The 9Q500N team: PA3EWP Ronald, ON4CIT Wim, ON6CC Marc, ON4HIL Patrick, ON4ATW Theo, ON4IA Luc.

Burundi is a landlocked country with an equatorial climate. Called "The heart of Africa" it lies on a rolling plateau, with Lake Tanganyika in its south west corner. It is bordered by Rwanda on the north, Tanzania on the south and east, and the Democratic Republic of the Congo on the west. It became his independence in 1962.

We operated simultaneously with up to four stations from 160m to 6m. We logged 33503 QSO's, including 127 on 160m, 1721 on 80m, 2547 on 40m, 3441 on 30m, 3296 on RTTY, 349 on PSK31, 50 on SSTV and 5 on 6m WSJT EME.

Many thanks to all who made this DXpedition possible, especially Floyd, N5FG and Bernd, DF3CB for the pilot and website support.

YAESU

A couple of months after my XYL, Katrien surprised me with a T-shirt from 'CQ' carrying the text : " ... my wife said, if I didn't get off the radio, she'd leave me ... OVER ", I left for a 3 months humanitarian mission as a telecom consultant for UNHCR. Being back now, I think she prefers me to stay on the radio, hi! If not for the genocide and the unstable situation of the country, Rwanda is a place where one could easily settle. The climate is very enjoyable, with temperatures between 23 & 30°C, in combination with heavy, but mostly short rainshowers; ideal for fertile soil. Agriculture is providing most of the food for the communities, as well as cattle-breeding.

Equipment used : Yaesu FT900/AT (thanks to Yaesu Europe & Peter, ON6TT/9Q5TT). Antennas : Cushcraft R7 (thanks to Oklahoma Comm Center) covering 10-40m and inverted-L's for 80 and 160m (thanks to John, ON4UN for all radials and antenna wires). Operating low power (100W) on the low bands didn't seem to be a problem. It was exciting to get quite some stations on 9 bands CW, some even adding 8 bands SSB. During the 70 days of my stay (and only in my spare time) 20000+ QSOs (16000 CW & 4000 SSB) were logged as 9X/ON4WW and 9X1A (only during WPX CW Contest). Furthermore I wish to thank Ghis, ON5NT, my QSL manager for providing and getting this card out to you. Also thanks to YOU for this (these) fine QSO(s). 73, Mark - ON4WW

The 1998 Pratas Island DXpedition is indebted to the organizing team: Katy Chen BV5AG, Chinese Taipei Amateur Radio League (CTARL) President; Dr. Bolin Lin BV5AF, CTARL Past President; Mr. Chien, Senator to the Republic of China Government; William Wu BV2VA and Martti Laine OH2BH. Thanks to their support and efforts, this operation was a success.

The organizing team and operators are very honored to acknowledge the support of the Ministry of Defense and the Ministry of Transport and Communications of the Republic of China in making this expedition a phenomenal success. In addition, the operators graciously thank Commander Liang and his staff for their generous support in hosting the Pratas Island DXpedition Team.

Major financial support provided by the CTARL. Radio equipment courtesy of Yaesu Musen Co., Ltd. QSL support by W4MPY.

Tnx QSO and QSL 73 de Babs

Inhaca Island is about 40 km east of Maputo. Its offshore coral reefs are among the most southerly in the world. Few hundred of Tembe-Tsonga residents living in this rural area.

Our QTH, the Inhaca Island Lodge located at a north cove.

We like to express our thanks to the hotel management, special to Senhor Vasco and Senhor Fale from Euro Travel, Maputo.

Your sigs. : 59 QSL Thanks.

09191

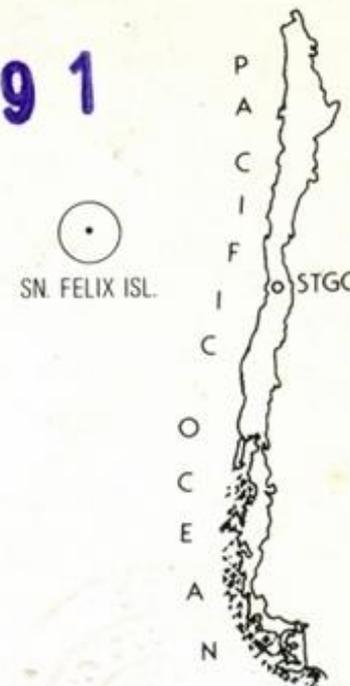

In 1984, during september and october, and after many years of being inactive, "Radio Club de Chile" was able to organize and run a DXpedition to San Félix Island, wich is under the sovereignty of the Chilean Republic. The official Callsign to use was CE Ø AA.

San Félix Island lies East-West on parallel 80, at about 500 miles west of the Chilean shore, in the Pacific Ocean. Stretching over 1 1/2 mile, with an average width of 1/2 mile, the Island is volcanic in its origin, presenting a grayish lava formation. On its surface, may be seen rotten scoria fragment, showing different grades of porosity, and as if they were recently ejected from an active volcano.

Two chilean amateurs, Max: CE 9 DVN, and Fernando: CE 2 GXY, went to the Island, where they reached an amount of more than 31.000 QSO's. They could also count with the support of many stations helping from the mainland.

The operation took place in the following bands: 160, 80, 40, 20, 15, 10, and also a few contacts could be done on 6 meters; they used SSB, and CW modes.

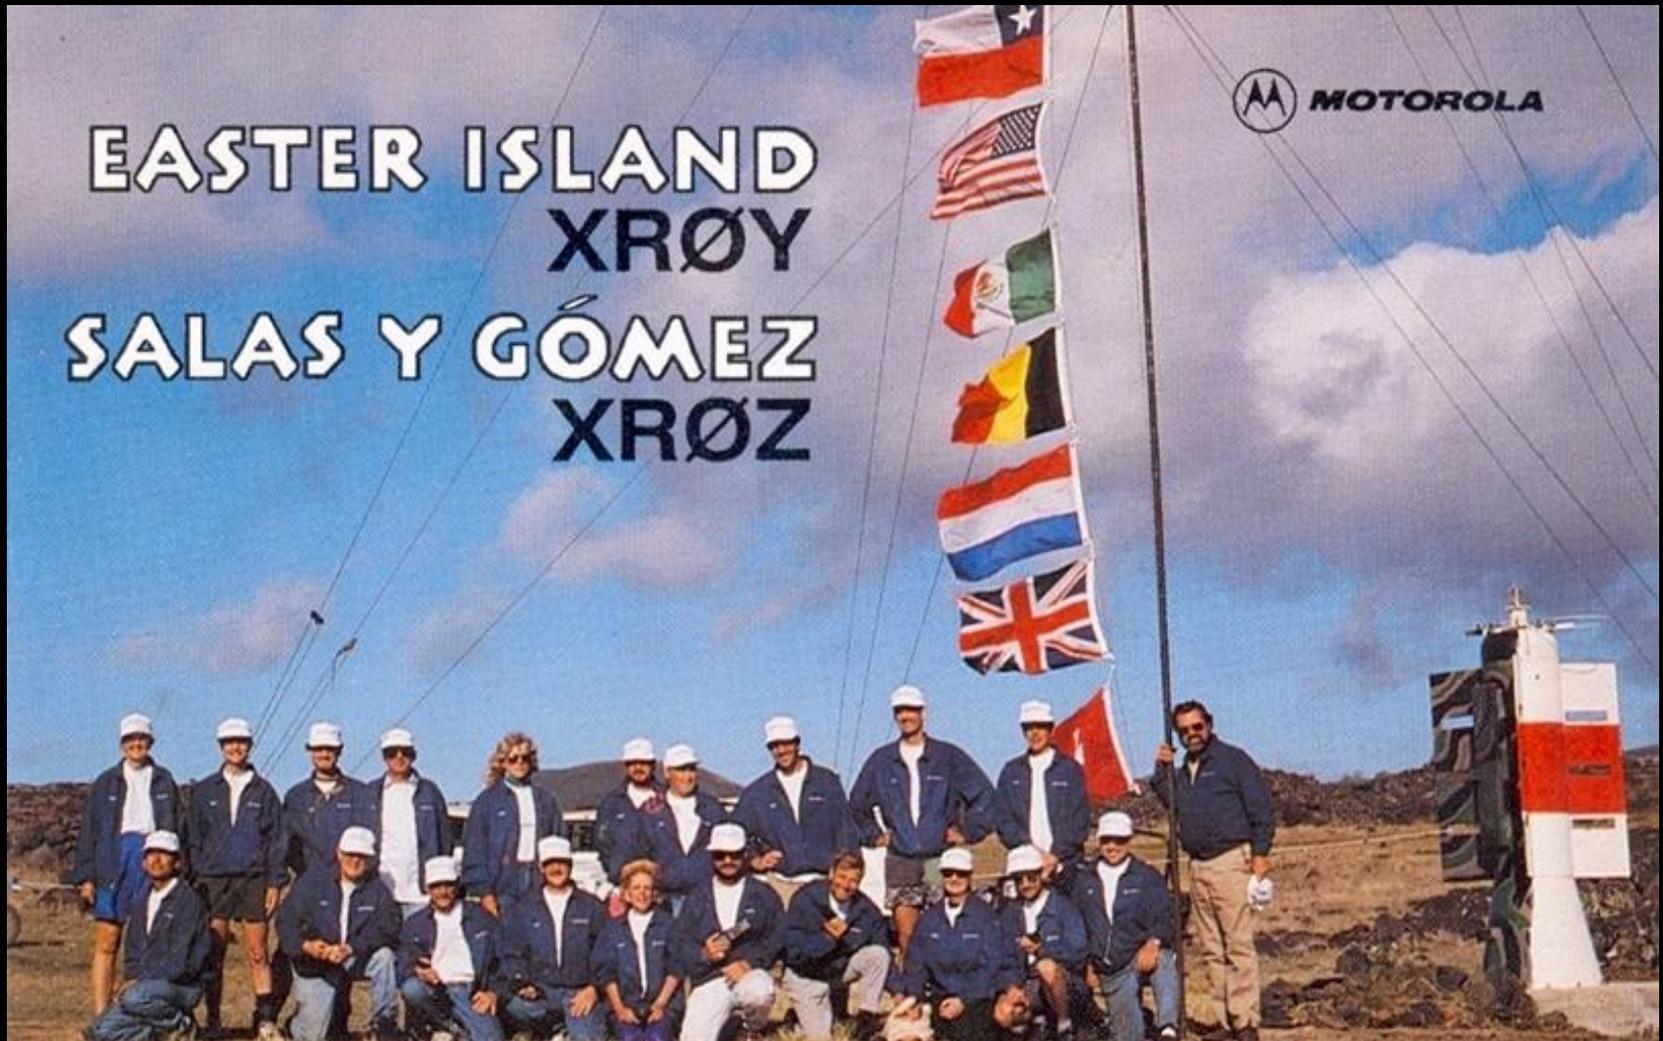

Most of rigs, antennas, and in general accesories, used in this operation, were supplied by "Radio Club de Chile", and its members.

SEPTEMBER 1995
CORDELL EXPEDITIONS

THE EXPEDITIONS: The 1995 Cordell Expeditions to Easter Island and Salas y Gómez were carried out simultaneously during Sept. 1-22, 1995. They were conceived, organized, and led by Bob Schmieder KK6EK and Carlos Nascimento NP4IW. The team included radio amateurs Bob Allphin K4UEE, Max Bachi XE1XA, John Brosnahan WØUN, Craig Boyer AH9B, Luis Chartarifsky XE1L, Paul Daley WT8S, Vincent Denecker GØLMX, Don Dvorak KE6QZZ, Dave Farnsworth WJ2O, Ralph Fedor KØIR, Lee Hallin WB7SND, Bill Hein AA6TT, John Hilbish W3UM, Enno Korma PAØERA, Wes Lamboley W8FMG, Nellie de Lazard XE1CI, Joe Rich N1OCS, Jim Riff K9JSC, and Albert Zaehner HB9BCK. Science divers and technical support persons included Albert Boosman, Marcel Duhart, Ricardo Olsen, Sue Estey, Gunthar Hartwig, Barbara Hilbish, Bill Kruse, Gail Kruse, Harry Sherman, Steve Smith, and Martin Tossey. The radio teams logged almost 40,000 QSOs on all bands during 15 days of operating, including contacts using SSTY, RTTY, and 6-meter EME. The expedition developed a variety of new techniques for remote communications, including an internet connection to the expedition site, e-QSLs (e-mail), next-day QSLs (U.S. mail), WWW pages, publically posted logs, FTP downloadable logs, callsign server access to the logs, an expedition internet reflector, barcode printed on QSL card, real signal reports, dupes requested, and an automatic beacon. The expedition is documented in a book by KK6EK.

February 2000: on tour again ...

After several operations from island in the Pacific and Indian Ocean we found it would be time to visit South America – of course an island again. Because nobody of us speaks Spanish the journey could have become a complete disaster. Fortunately we met very gracefull people in Chile giving us all the necessary support.

Robinson Crusoe Island is part of the Juan-Fernandez-Archipel in the Pacific Ocean, located 700 km West of Chile's continental coast. The island was named after the sailor out of Daniel Defoe's famous novel. This novel is based on a true story which happened to Alexander Selkirk. He lived for 4 years on this particular island after his ship was smashed on the cliffs in 1704.

Robinson Crusoe Island with his 600 friendly inhabitants appeared us much more hospitable than to this poor sailor centuries ago. We like to express our thanks to all people, who helped us making this trip a successful one. Specially we would like to thank Eliazar CEØZIS, who allowed us to convert his home into a radio station.

We hope you had as much fun as we had putting all the 22.000 QSO into our computers – mostly in CW and RTTY.

See you again from our next tour ...

Sable Island is located 300 km east-southeast from Halifax, NS. The crescent-shaped, made of shifting sand dunes island is home of the wild ponies with the long, flowing manes and tails. It has also been a temporary home for shipwrecked sailors brought there inadvertently by the legendary gales that blow around the island. Sunken ships litter the surrounding ocean floor, giving the island its reputation as "the graveyard of the Atlantic". Since 1853 there have been 350 recorded shipwrecks on Sable Island.

The CY0MM team stayed on the island from Nov 15 until Nov 29. Nearly 50,000 QSOs were logged by 4 operators on 160-6 m using CW, SSB and RTTY modes. Our equipment consisted of FT-1000MP, TS930, TS-2000 and IC706. Due to the air-plane cargo weight limitation we were able to bring only one amplifier along (MLA2500). Antennas used: 7el M2 yagi for 6m, TH2 tribander for 20-15-10, A3WS tribander for 17/12, Delta Loops for 40/30 and verticals for 80/160.

We would like to express our sincere thanks to the following groups and individuals:
 Sable Island crew: David MacKenzie and island crew for their help which was instrumental to the success of this expedition
 Financial Support: In addition to the sponsors whose logos are displayed, the following individuals and groups helped CY0MM: W2YC, K6BU, N5ID, NN0TT, KU4EC, JA3EJG, G4CWD, VE3CR, KSLAM, K7ER, JA3CWL, PA1555-R40 (SWL), VE3BUC, W3JJ, W0SF, PA0WRS, JR2WCX, HS1NGR, JR1EFG, PA3ARM, JH0BBE, WV2B, W1PL, N5ORT, VE3MR, WB8TGY, N6DMV, JI3BFC, G0JHC, K2FF, KE8J, KT1J and JA8FRI, Oklahoma DXA (K5YAA), Virginia DX Century Club (W4SD), NADXA (NF7E)
 Logistics support: VE3NWA - online log, VA3TTN, VE3NFR and VA3VMM -160 m antenna, VE3EJ , VE3FF and VK1AA.

St. Paul Island

ST. PAUL ISLAND, the graveyard of the Gulf of St. Lawrence, is located fourteen miles off Cape North, the Northeastern part of Cape Breton Nova Scotia. A menace to navigation, St. Paul has been the location of countless shipwrecks. Many a dream of early immigrants to North America were thrashed on her hazardous rocky shoreline. Before the establishment of lifesaving stations, many a shipwrecked mariner after fighting their way through rocky outcrops and churning seas to shore, only starved to death on this desolate island. There have been more than a thousand who have lost their lives on the rocks of St. Paul. St. Paul is divided into two parts. The large island has many abandoned dwellings and an automated lighthouse on the Southwest side. The island is uninhabited except for a few birds who nest there. The small island houses the Northeast light and is separated from the large island by a narrow channel of water. Two lighthouse keepers, the ONLY residents of St. Paul Island live in one of the three houses built by the Canadian Coast Guard. We were transported to and from the mainland by the fishboat Debra Margo. During our stay our equipment was powered by a 1.5 kW generator. Three transmitters were operated simultaneously about 21 hours per day. Five beams were used for 6, 10, 15, and 20 meters, and for the first Oscar satellite communications for St. Paul. Inverted Vee's were used for 40, 80 and 160 meters. During our 7½ days we made more than 17,300 contacts in more than 120 countries. Many thanks to the lighthouse keepers, Carl and Paul our fabulous hosts. Thanks also to VE1ZB, VE1RI and the Sydney amateur radio club VE1CR for all of their help. Thanks to those who lent equipment, VE7BSM, VE7WJ, and all those who gave a lot of moral support, especially VE7BFO and W7ISX. A pleasure to work everybody from St. Paul Island.

ERITREA

In the early days the area was divided in chiefdoms and sheikdoms, often at war with each other. In the 16th century large areas of present Eritrea came under dominance of the Turkish Empire. They were supplanted by the Egyptians, until the Italians got control in 1890. From 1942 Eritrea was under British military administration until federated with Ethiopia by a UN resolution in 1952. In 1961 the armed struggle for independence started, lasting for 30 years. On April 27, 1993, Eritrea was proclaimed as an independent state, and subsequently recognised by UN and the world community. Eritrea has about 3.5 million inhabitants, covers some 125.000 sq. km with a coast line at the Red Sea about 1.200 km long.

E35X Project

The expedition was organised by Ham Forum, LA5X, in co-operation with Telecommunications Authority of Eritrea, to introduce amateur radio once again. More than 50 Eritreans attended the seminars. Asmara Technical School Radio Club was established and licence training started.

E4/OM2DX

Michal OM2DX, Steve OM3JW, Rudy OM3PC and Miro OM5RW were active during 14.-22.12.2007 from Bethlehem as E4/OM2DX and made almost 30.000 QSOs. We are proud that we gave E4 to as many stations as possible. This was the first expedition after almost eight years of silence from Palestine. Thanks to the sponsors for the donations and support, who also made this expedition possible: Especially thanks to Mrs. Lenka Hazbunova and her husband and Mr. Zoltan Gabor for their help during the trip and to Mr. Tony Baboun for the great hospitality. Last but not least to you for all the contactts.

ZK2C confirms

[TNX QSO & QSL](#)

The island of Niue in the South Pacific Ocean is a sovereign state in free association with New Zealand. The official languages are English and Niuean. Only about 1,400 inhabitants live on the island of 261 sq km. Niue is one of world's largest coral islands with steep limestone cliffs along the coast.

Our QTH was at Namukulu Cottages (www.namukulu-cottages.nu) of Brian and Teresa Scott located on a high plateau about 50 m above sea level in the North of the island 500 m off the coast. The team consisted of nine operators and we operated simultaneously with up to four stations (four K3-transceivers, two KPA500 amplifiers, one HL-550FX amplifier and eight antennas from 160 m to 6 m). More than 48,200 QSOs were logged in CW, SSB and RTTY.

Many thanks to all our corporate, foundation and individual sponsors.

EA8BH Formula Racing Team and year 2000

Entering the new millennium may provide revitalizing opportunities for amateur radio contesting. Following the spirit of the world's premier motorsport – Formula One – the F1 racing team approach was adopted, and a good QTH and needed equipment were selected.

Here at EA8BH, a team of dedicated engineers work hard at technical innovations and station design and make the **best overall package** available jointly with the **world's most skillful drivers**. In return, the best drivers, backed by team management and **support personnel**, gear themselves to cut the finish line first. The concept has worked well and several extraordinary results already speak for themselves.

The team had targeted to capture all major CQ World-Wide Contest records, and the strategy was set accordingly. This included CQWW all-band cw and ssb (N5TJ), CQWW RTTY all-band (N4GN) and CQWW160M cw (OH2BH) records. Here the Formula team worked tirelessly, evaluated and **maximized all success factors** and made them jell. The rest was just routine action, and it was no surprise that all past records were indeed outperformed with a comfortable margin.

Yaesu Musen Co. Ltd. is the engine supplier to the Formula team, benefiting from the valuable information that the team provides for Yaesu. The information is used exclusively to help Yaesu supply **the best radios** and operating comfort for serious amateur radio operators world-wide.

While the team is Finnish-American-Spanish-Japanese, the actual racing site is located on the African continent at Faro de Sardina, Gran Canaria, **Canary Islands, Zone 33**.

Here, along the Atlantic Ocean shoreline, an equatorial setting offers a good take-off for EA8BH signals and an ever attractive and inspiring climate for **further innovations**, while the team is afloat in the crystal blue but salty Atlantic wiggling their toes, headed for new horizons in amateur radio contesting.

The thought for this Dxpediton was conceived on April 4th, 1998. With the assistance of Kan JA1BK we arrived 6 days later with renewed license in hand. This operation took place from April 13th to the 20th. The operators were **W6KR/Rob** and **W6RJ/Bob**. 22,691 QSOs were made. The operation occurred from two locations separated by about 5 miles. This eliminated cross band interference.

Two stations were active at most times using 2xIC-706Mk11s, FinFet 500W out amplifier, FORCE 12 C-3S 26' high, Titanex V80E vertical, and assorted 1/4λ verticals.

The DXpediton was sponsored by the operators and **HAM RADIO OUTLET**.

40M DXCC QSL CARDS ON4UN

FO/OH1RX

Iles des Marquises, FO/M

Nuku Hiva - 'the Island of Men' - rises steeply from the Pacific Ocean giving a very different face to the French Polynesian paradise. The beauty lies in the violent formations created millions of years ago. The majestic surroundings served as the place of some of the earliest and most important cultural and governmental center dating back over 2000 years - peaking at 100 000 inhabitants by 1300AD. The ruins at Hathieu Village raise the imagination to wild level. The islands were discovered by the Spanish 1595 and the French ruling started 1842. The population today is around 2500, half of them living in the 'capital' Taiohae.

The main focus of the **OH PACIFIC 2008** operation was on the low bands for East Coast and Europe. The well welded team consisted of the following characters: Jouko **OH1RX** and XYL **Merja**, Pertti **OH2PM** and YL **Kirsti**, Veijo **OH6KN** and Juha **OH8NC**. Martti, **OH2BH** piloted the pedition and Teemu, **SM0WKA** was mastering our pages at www.sm0w.com/marquesas.

The station was set up on a farm in the village of Tovii at 800m ASL. This proved to be an excellent site with no man made noise, just some occasional conflicts with the local fauna (cows). We ran two stations during the night and one during the day. The antennas consisted of phased 2 el. verticals for 30-80m, single vertical for 160m, 5 band Spider Beam and R8 as a multipurpose radiator. The QSO results were: total 14478 Qs, 7560 Qs on 30m-160m, 2915 Qs on 80m and 742 Qs on 160m, 467 Qs on RTTY. Europe score: 400 Qs on 80m.

QSL via buro or direct to Pertti Simovaara **OH2PM**, Suomusjarventie 460, 25390 Kiikala, Finland.

And our earthly exploration doesn't stop here - stay tuned for our next expedition !

FOØCI - Clipperton Island DX-Pedition - March 1992

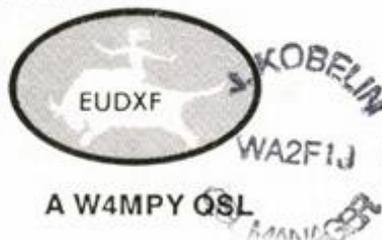

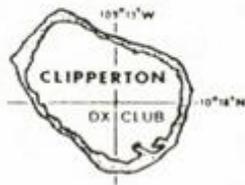

RADIO	MARCH 1992	UTC	BAND	MODE 2-WAY	RPT
RADIO ON4UN		2 WAY SSB	ON 03/12/92 AT 0638Z		
URRS(T) 59		BAND: 40			

Clipperton Island (10° 18' N - 109° 13' W; Grid Square - DK 50), located approximately 1500 miles south of San Diego, California, is a flat, barren, coral atoll inhabited by land crabs and various sea birds (the booby and frigate). In 1990, plans were underway to activate the island in early 1991, however, the operation was delayed due to the crisis in the Persian Gulf. In 1991, the expedition efforts continued for an early 1992 activation after the required paperwork had been received. On March 6, 1992, nine operators activated FOØCI with 7 complete stations and made 48,000 QSOs before leaving the island on March 15.

We would like to thank the following for their support prior to the expedition: Mr. and Mrs. Charles Adler, ICE Corporation, Southern California DX Club, National Wire and Cable Co., The Hoosier Contesters, KC6BBQ, KC6WUZ, KD6AYV, KK6DX, KG7DZ, KL7GRF, WA6PJR, W6PQS, KE6OP, N6AMG and N6AGB. We would also like to thank Mr. Pierre Simon of the PTT in Tahiti for his assistance in the processing of our paperwork.

Our greatest thanks goes out to the crew of the M. V. Spirit of Adventure whose expertise throughout the trip allowed the team to enjoy a safe and well executed journey. This included a trouble free landing and departure from the island.

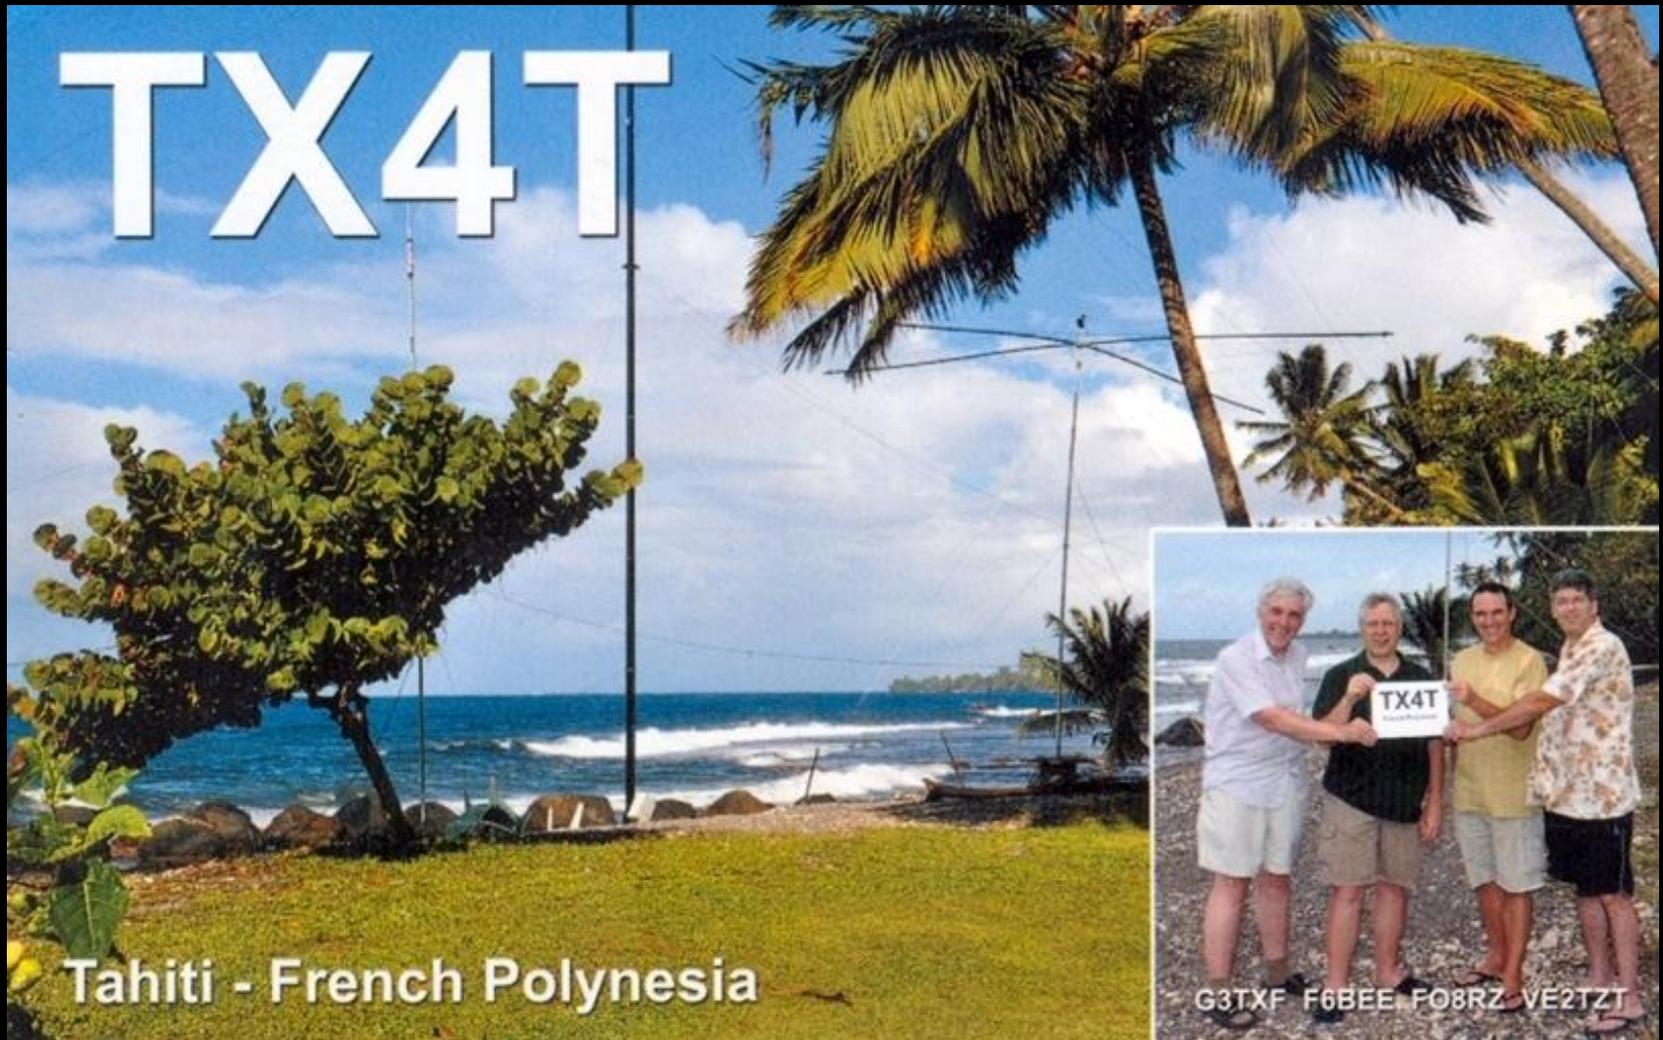

The nine operators were: NØAFW-Pete, WA2FIJ-Jay, N7QQ-Charlie, KA7CQQ-John, GØLMX/F1MBO-Vincent, ON6TT-Peter, N9NS-Mike, PA3DUU-Arie and WA6FGV-Ron.

YAESU

The 20 VKØIR team members arrived on Reunion Island between Dec. 26, 1996 and Jan. 2, 1997. During the day we mostly worked on our cargo, ordered more supplies, and made sure that all was loaded aboard our ship, the Marion Dufresne. During the evenings, from Dec. 28 until Jan. 4, we were on the air with TOØR, our Reunion Island call sign.

We were active from the QTHs of FR5DN and FR5DD, from our hotel, the beach in front of the hotel, and later on from the dock beside our ship. We concentrated on RTTY and 160m, and made a total of 2,232 QSOs as TOØR. A short warm-up for the fierce pileups to come on Heard Island! The TOØR activity was also a test for the internet and packet servers used to distribute our logs, and the daily updates, pictures and feedback.

The VKØIR/TOØR operators were: 9VIYC-James, EA8AFJ-Michel, HB9AFI-Kurt, HB9AHL-Willy, HB9BHW-Hans-Rudi, K3VN-Al, K4UEE-Bob, K9AJ-Mike, KK6EK-Bob, KØIR-Ralph, N6EK-Bob, N6MZ-Mike, OE9AMJ-Arno, ON5NT-Ghis, ON6TT-Peter, PA3DUU-Arie, RA3AUU-Harry, VK2IDM-Dave, W8FMG-Wes, WØGJ-Glenn.

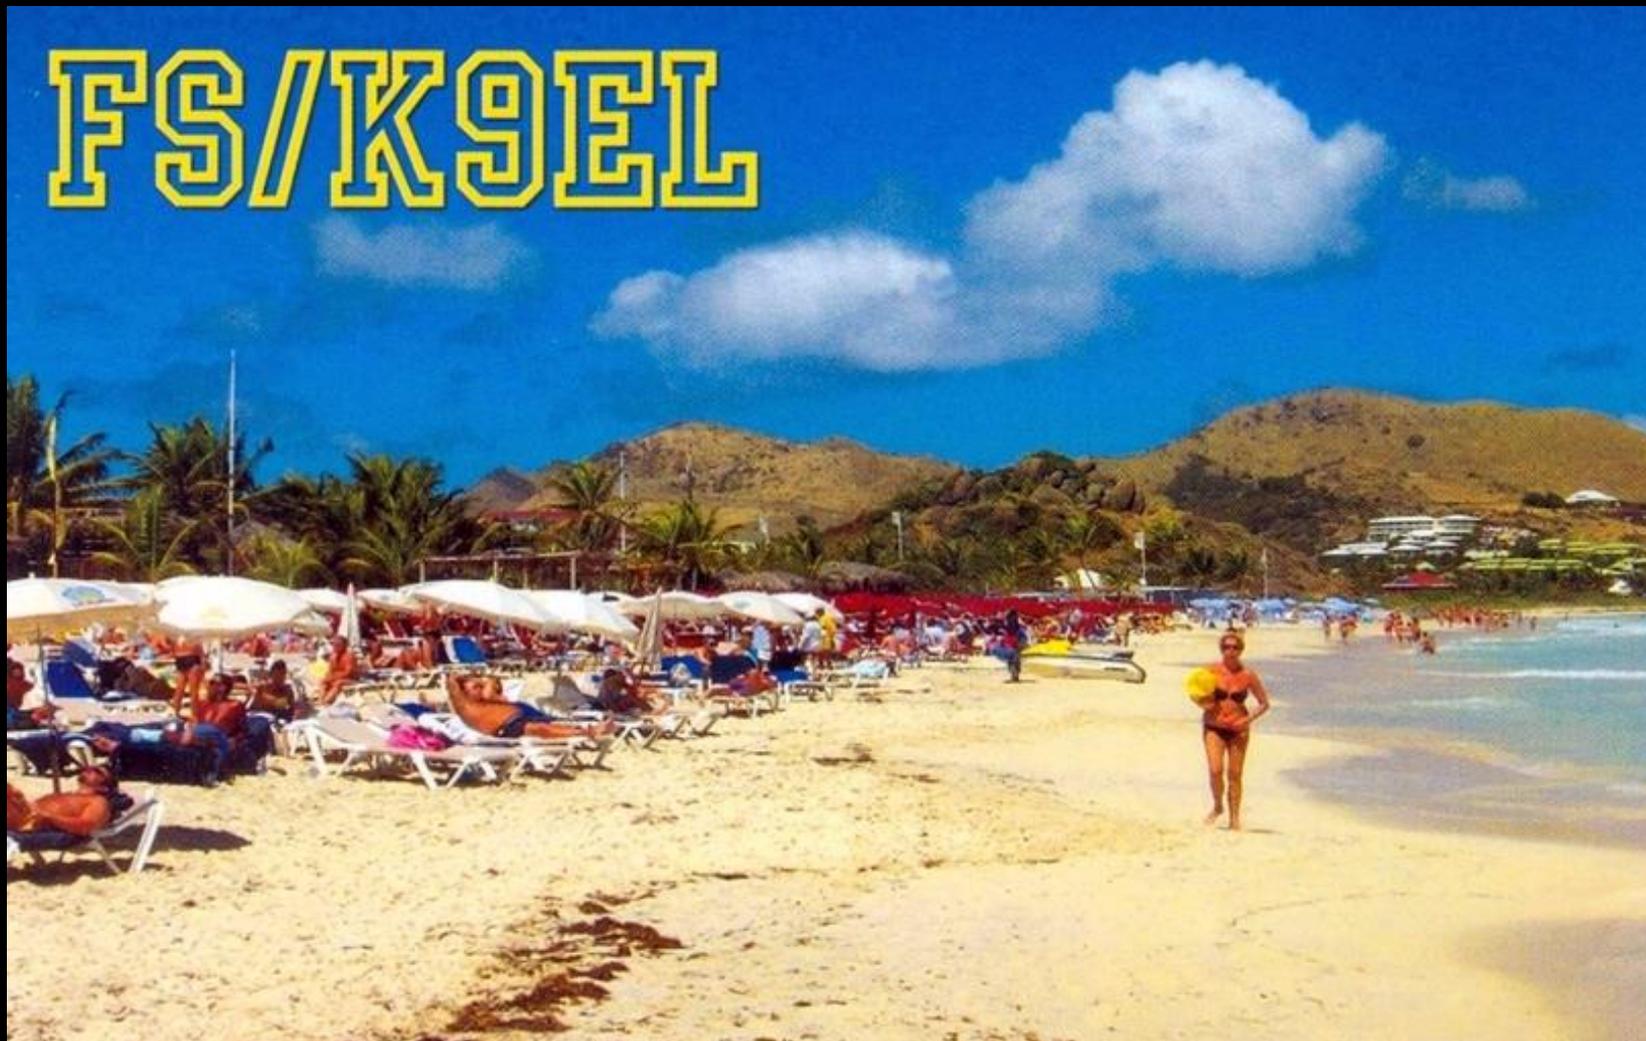

We wish to thank the Reunion hams for being our gracious hosts. They went out of their way to assist us with transportation, last minute shopping, help with cargo and customs and threw us one heck of a New Years Eve party. *Thank you:* FR5DN, FR5FC, FR1HZ, FR5GQ, FR5DD, FR5DX, FR5EG, FR5FK, FR5GS, FR1AJ, FR5BT and Olivier. You are forever great friends!

Amsterdam Island · Martin de Viviès Base · IOTA: AF-002 · DIFO: FT-001

Martin de Viviès base is located on Amsterdam Island with twenty scientific and technical persons who daily guaranty the functioning. They are leaving at least six month each year together and a district chief is in charge of the expedition.

A remote military staff provide all logistical facilities on the territory like telecommunication, Power supply and engeneering. There are carefully taking care of the drinking water capted from the rain showers.

A military doctor is also involved with the indispensable medical equipment. For catering, a cooker and a butcher are needed and the local beef production goes also to the other bases from the territory.

Three people from Meteo France control the meterological network station. The weather is quite good. Temperatures are moving from +5°C to +25°C but pelting rains and heavy winds are blowing during the winter season.

The World Wide lowest pollution rate has been registered from Amsterdam Island. A technical program with the Polar Institute is going on with five scientific volunteers: activities include all aspects of earth quake, atmosphere and magnetic surveys.

One ornitholo is achieving the follow up of the Albatros, jumper gorfous, seal and invaders rabbits population on the Island.

Q.T.H. NORMAN GRAHAM

Shan-a-Garra, Main Street,
Castledawson, Co. Londonderry.
Northern Ireland.

Greetings

FROM NORTHERN IRELAND

Northern Ireland comprises the 6 counties—Antrim, Armagh, Down, Fermanagh, Tyrone and Londonderry, and with over 13,000 miles of uncongested road, there is always something new around the next corner.

The Golf and Fishing are amongst the best in the world, while with the Mountains o' Mourne, the incomparable Glens of Antrim and the unique Giant's Causeway, the scenery is ever-changing and beautiful.

1971 is Ulster Festival year with displays, pageants and other entertainments all being organised throughout the country to add interest to the visitor's stay.

tnx fer QSO es QSL, cuagn, 73 Holger -H44IO-

During our 8 week long DX-pedition trough the South Pacific a total of 34.000 QSO's were established. We journeyed to the Solomons (21 Nov. to 5 Dec. '92, H44IO/H44XO), to Wallis & Futuna (10 Dec. to 22 Dec. '92, FW/Y31XO, FW/Y58IO), to Tuvalu (23 Dec. '92 to 11 Jan. '93) and in between we spent a few days in Fiji (3D2AO/IO/XO). We met with Birgit during December '92 whilst in Fiji. Seventy seven per cent of all QSO's were made in CW. Birgit was our SSB operator.

Our QTH was on VAVAY RIDGE, the highest point in Honiara, the capital. On the photo is shown the view over Honiara and the Iron Bottom Sound to Japan and Europe. In total approximately 10.500 QSO's (92% CW) were made. We used the TURBOLOG-program also for the CQ-WW-DX-CONTEST (3.500 QSO's)

We would especially like to thank Fritz (DL7VRO/Y49RO), Knut (DGØZB/Y24HO from QSL ROUTES Berlin) and Ben and Bernd from FUNKELEKTRONIK for their help in preparing the tour and their generous donation. It goes without saying that we thank all those whos donation accompanied the QSL-card.

By the end of November 2010, following the January 2010 Haiti earthquake which claimed the lives of 222,000, left 300,000 injured and 1.3 million homeless, Finnish Red Cross Emergency Response Units in Haiti have treated approx. 115,000 people, provided relief items to approx. 96,000 recipients, and delivered tents and other shelter material to approx. 20,000 people. More than 130 Finnish Red Cross delegates have served in Haiti, Technical Delegate Pekka Holstila (HH2/OH2TA) was one of them.

Contadora Island, Panama, IOTA: NA-072

operated by

Swen Taake, DL2BAY and Stefan Radtke, DL5XX

The Island of Contadora belongs to the Archipelago de Las Perlas, which consists of about 100 islands in the Pacific Ocean, and served as our operating QTH from 16-28 November 1996. This beautiful island has a total area of approximately 1 square kilometer and a population of less than 100.

We closed our logs after 9,000 QSOs, including some 5,000 QSOs made during the CQWW CW contest, and we are happy that you were among them.

Our special thanks to Günter, HP1XVH and his wife Susanne for their warm hospitality.

St. Lucia in the West Indies offers many diverse attractions: tropical rainforests, sandy beaches and many natural sights. The host of the people are unmatched. We thank Mr. Fabian Lewis from NTRC and Miss Ester from Fox Grove Inn near our QTH. The Fox Grove Inn is a quiet paradise for relaxing and fine dining.

Our first destination of the LLDXT Tour 2002 was Dominica. This lush and relaxed island offers a lot, both for radio and holiday. Our location was Calibishie, on the North shore. Breathtaking beaches and a fantastic take-off (see cover photo) were a great combination. Unfortunately the electricity company struggled with major generator problems, which resulted in almost daily power cuts during our stay. Despite this fact, we made 16,539 QSOs in 7 days of operation on "The Nature Island of the Caribbean". See you next year from . . .

IS CONFIRMING OUR QSO

TO RADIO:		ON4UN			
DATE	UTC	BAND	2-WAY	RST	RST
17. Feb 2014	1728	40m	CW	599	

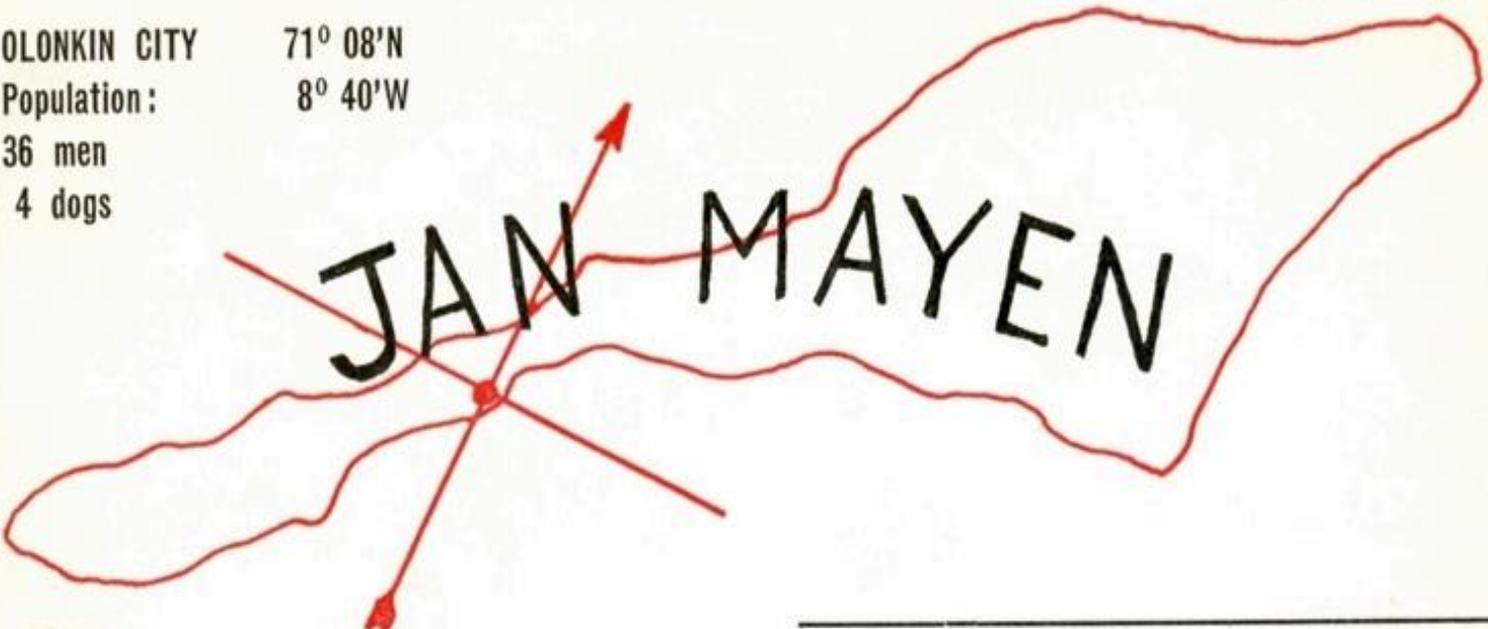

The BCC goes North... Three German HAM's and BCC members (DL2JRM, DL5CW and DL6JF) went to one of the northernmost European radio shack. Icy temperatures, major solar eruptions and the polar night made this trip not only to an adventure. It was a really nice experience for each of us. During seven operating days together we made about 13.000 QSOs, including entry in the ARRL DX CW Contest as JW/DL5CW - M/S category.

Thank's to the guy's around JW5E especially to Harald, JW7XM.

The U.S. Naval Base at Guantanamo Bay, Cuba covers 50 sq. miles, is populated by 9000 people and serves as a training base for Naval ships. Located 45 miles east of Santiago on Cuba's south shore, the base was acquired in 1903 by treaty. Completely self-sufficient, the base produces its own power and water.

I am the Base Passenger Transportation Officer, or to put it another way, I am running the only scheduled airline from the U. S. to Cuba!

Howland Island is a National Wildlife Refuge and is managed solely for the protection of breeding seabirds, migratory shorebirds, marine turtles, the coral reef ecosystem, and all forms of native plants and animals. The two wildlife biologists accompanying this expedition as representatives of the U.S. Fish & Wildlife Service were able to collect valuable information about plant and animal populations, and to survey the refuge for signs of any introduction of dangerous alien organisms that might disrupt the ecology of this tropical oceanic island.

N8S

Swains island is unusual as the atoll is an unbroken circle of land and as such it features a lagoon closed off from the sea. The fate of such a lagoon depends on the amount of rain. No rain: it dries up; some rain: it changes into a small, strongly saltwater lake; lots of rain: it changes into a freshwater lake. The latter has happened here.

SWAINS ISLAND DXPEDITION

4-17. April 2007.

WAKE ISLAND 1996
ZONE 31 IOTA - OC-053

ICOM
Experience A Country

Wake Island, a tiny island formed millions of years ago by volcanic action is rich in history and unlike most DXpedition destinations is known to many people outside ham radio. It has served as a US Military Base in the Pacific since before WWII and is the first US possession west of the International Date Line being 2600 miles west of Hawaii.

The Dateline DX Association activated WAKE ISLAND with two primary goals, working both Europe and East Coast North America and providing 40, 80 and 160 meter QSO's to those who needed it. AL7EL's 1995 limited operation proved a need existed.

The team of AL7EL, WB2DND, K4HQI and N6EK operated for six days completing 8733 QSOs. Of the QSO total, 5722 were on CW, 2811 on SSB, 140 on RTTY, and 60 on satellite. 40, 80, & 160 meter contacts produced 52% of the total QSOs. The success of the low band effort is attributed to the effectiveness of the "Battle Creek Special". Without that antenna the operation would not have been nearly as successful.

The Dateline DX Association wishes to thank Mr. Sam Kaapuni, Chief of Fire and Emergency Services on Wake Island for his support in arranging our visit and assisting us while on the island. Also thanks go to Mr. Mike Timmons, Project Manager and Mr. Paul Fusco, Site Manager for their support.

We also express our sincere gratitude to the Northern California DX Foundation, The Chiltern DX Club/RSGB HF DX Fund, INDXA, The Rochester NY DX Association, The Salt City DX Association, The Southern New England DX Association, The Western NY DX Association, The 59(9) DX Report, and ZJ Electronics for their financial assistance. Without equipment assistance from ICOM America, Telex HyGain, Ham Radio Outlet, The Battle Creek Group, The Radio Works, Heil, AEA, Timewave, NI6T, KI6WF, AH6NB, AA1V, JA8CDG and JAMSAT, this operation would not have been possible. A special thanks to Ruby, KE4VRR, XYL of K4HQI for handling QSL chores.

The 1978 Navassa Island DX-Pedition was operated from 26 November to 3 December 1978; 22303 SSB and CW QSO's were made. Our thanks to each of you who made this possible. We hope we were a new country for you on a new mode or band.

Operators: Randy Rowe, ~~NØTG~~; Dave Bowker, ~~WØRJU~~; Myron Kern, ~~WØZH~~; Tony Trice, ~~ADØP~~; Joe Markowski, ~~NØWL~~; Sy Adler, K2KA; Miles Brown, W2PAU; Joe Duffin, W2ORA; Dave Johnson, WA4SSU; Jon Lindsay, W6OIG.

Recognitions: Our sincere appreciation is hereby expressed to the following organizations who have directly supported the DX-Pedition: Atlas Radio, Northern California DX Foundation, Long Island DX Association, McDonnell Douglas Amateur Radio Club, Virginia Century Club, Rookies Amateur Radio Club, Southeastern DX Club, St. Louis Area Teleprinter Society II, St. Charles Amateur Radio Club, Egyptian Radio Club, Gateway Chapter Ten-Ten International, Suddeutsche DX-Gruppe, St. Louis Suburban Radio Club, Mid-Mo Amateur Radio Club, Mississippi Valley DX and Contest Club, and the organized Japanese support via JH1VRQ.

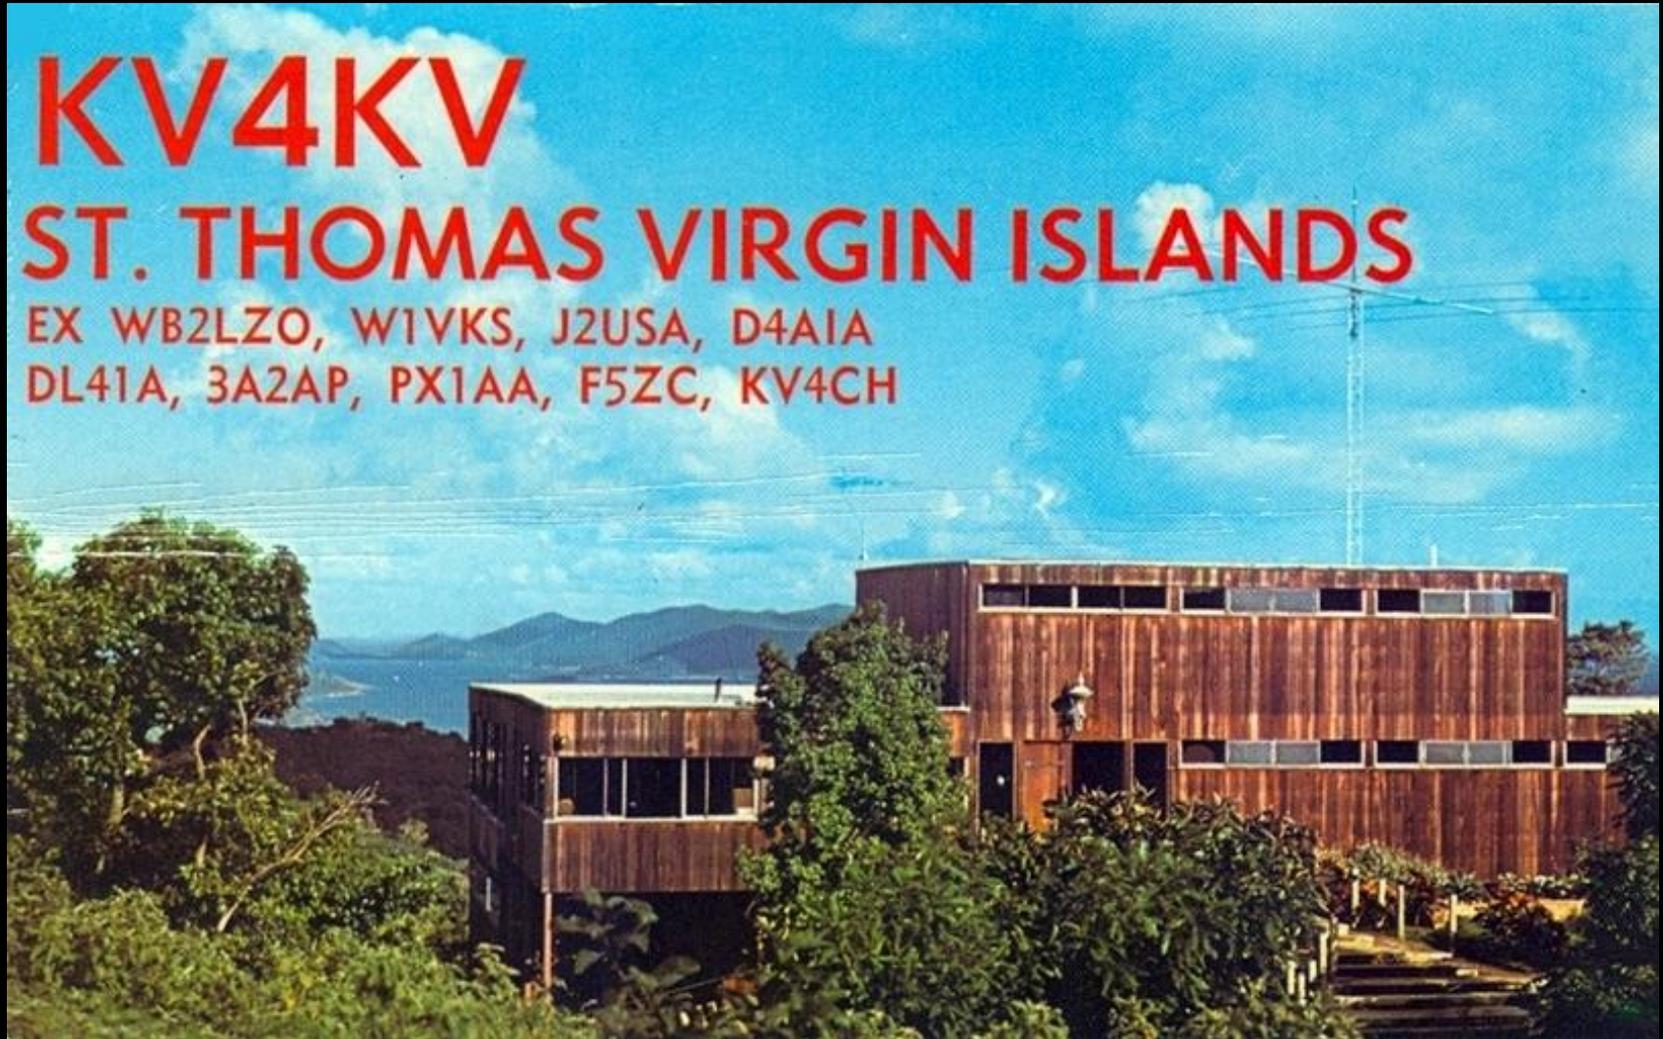

Special thanks to the following for assistance in promotion: W1VV, W1WY, WB1DGD, K2AA, W2GHK, W2IYX, W3HNC, WA3HUP, K4IIF, WA6AHF, WA6AUD, N6JM, W6VPH, W7OK, N7RO, W9MXC, KØDQV, WØDU, WBØMSZ, DJ9ZB, JH1VRQ, LU2AFH, VK3AKK, VU2CK, ZS6IW, 6Y5LA and to the many others who cannot be recognized due to space limitations but without whom the DX-Pedition could not have been a success. Thanks to all.

MNI TNX FOR NICE QSO. VY 73!

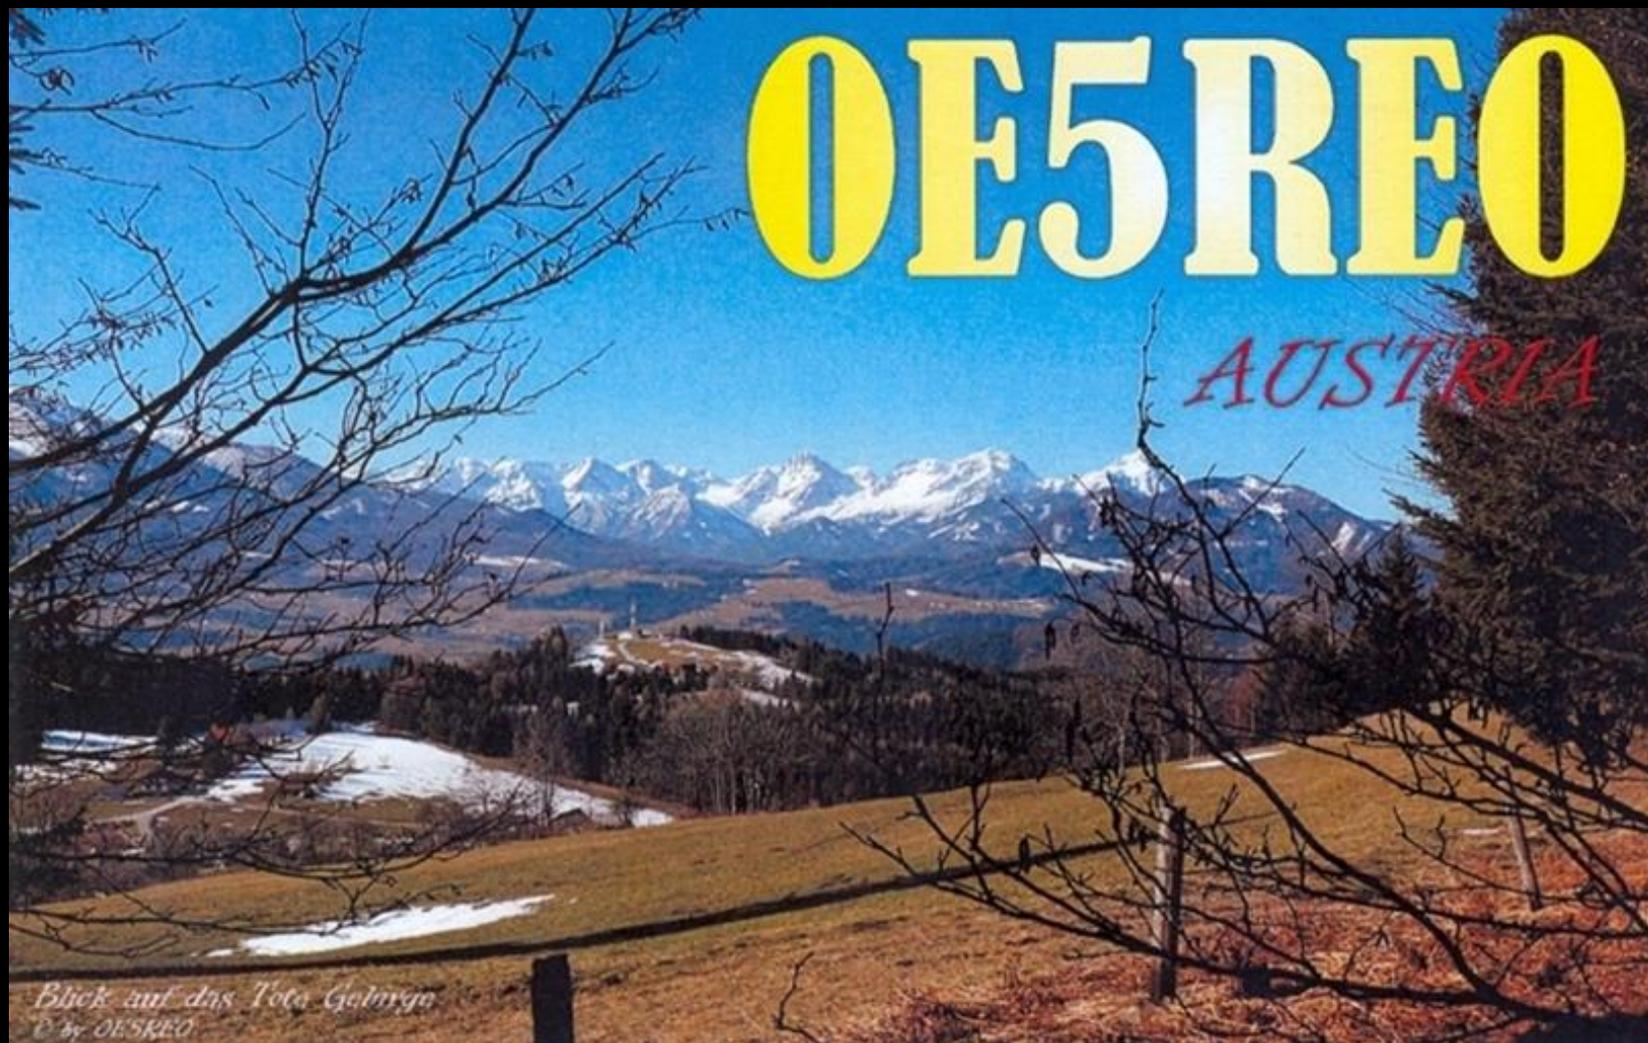

Francis HB9CRV

Lebanon has an area of 10452 sq.kms. and a coast line of 240 kms along the Mediterranean sea with an anual rainfall of 9 mm. Half of the country lies 900 mtrs. above sea level. The capital city is Beirut on the western coast with a population of 1,5 millions. The mild climate and the ski slopes only 45 minutes from the city makes it possible to ski in the morning and swim in the afternoon. Casino and night life entertainments plus the fabulous shopping facilities are encouraging a growing tourist trade. The historical sites of Beirut, Tripoli, Saidon, Jubeil (where the alphabet was born) and most of all Baalbek are magnificent and must be seen.

40M DXCC QSL CARDS ON4UN

A vibrant display of the Northern Lights (Aurora Borealis) in shades of green, yellow, and orange, illuminating a dark forest of evergreen trees at night. The aurora is centered in the sky, with a bright yellow-green glow at the base of the trees.

OHØB

From Åland Islands with the Sound of Northern Lights

40M DXCC QSL CARDS ON4UN

THOSE FROZEN FINNS UNDER THE AURORAL OVAL

Ever wondered why OH signals have no consistency? Sometimes they come through and sometimes they don't — not at any price. And when they do, they are booming in, but running seemingly without filtering capacitors.

It is part of the mystique surrounding the Arctic Circle. The Northern Lights — Aurora Borealis — are nature's light show, an exercise in elementary particle physics, superstition, mythology and fairy tales. The Northern Lights have filled people with awe and inspiration — and frightened some to think that the end is at hand. Experiencing their magic makes one speechless.

The particles which stream down from the Solar Wind directly affect propagation when they reach the Earth in a belt called the Northern Lights Oval. This belt is wider on the night side of the Earth than on the day side, and is centered around the magnetic pole. The width of the belt on the night side is up to 600 kilometers. These particles, when colliding with the gases in the atmosphere, cause either a complete blackout of shortwave signals or a strong Arctic flutter on the signals that do get through. And there are more days with this celestial display than not; hence the game is tough for the frozen folks in the North.

See the natural picture on the front and get addicted to the beauty of Mother Nature. Come and visit your favorite OH, and he will share with you the mystique of the Northern Lights while tuning up and down empty bands. These people are True Believers, and with a massive array of antennas they try to change the world order. Or at least make their contacts via Long Path to get by the oval. They never give up — those Suffering Finns are a determined lot!

Please surf to http://virtual.finland.fi/finfo/english/aurora_borealis.html and <http://www.studiotunturi-lappi.fi> for a journey to the landscape of your QSO.

APPROACHING MÄRKET REEF ONCE AGAIN

FROM WINTER 1969 TO SUMMER 2004

It was 35 years ago when the ARRL recognized Märket Reef as another DXCC counter. Märket does not actually mean "market", but with two dots added above the letter A makes it a word denoting "mark". And indeed, an important seamark it is - given its prominent role in guiding sea traffic, now with an automated light. The first year saw three expeditions; OJOMR, OJOMI and OJODX and these involved some twenty OHs who experienced the DX light for many years to come.

The very original team with their friends, totaling 26, headed by Lars, OHORJ and accompanied by Märket's erstwhile only resident ham, Kee OH0NA/OJOMA decided to sail toward these stormy waters and make another adventurous Zodiac landing, put the OJO on and enjoy the camaraderie of those other years. It was all done with style - the 160-ft. schooner "Linden" was employed with her first-class facilities and entire beauty of 630 sq. meters (6800 sq. ft.) of sail surface. The boat is a replica of vessels used in the early 19th century and it can be hired for any memorable Baltic Sea cruise. See "<http://www.linden.aland.fi>"

Party @ Sea participants: (standing from left) OH1MA, OH3UU, OH2KK, OH4NS, OH2KH, OH5NE, OH2BAA, OHORJ, OH1XX, OH2BAD, OH2BR, OH1NOR, OH1NM, OH1TV, ES1AR, OH0NA/OJOMA, OH2PM, OH2TA, OH2WC, OH2BH, OH0XX and (kneeling) OH1TX, OH5NQ, OH2QV, OH2MM and OH2BC.

2004-07-04	18:44	14.	SSB	59

With The Spirit Of Discovery - Always!

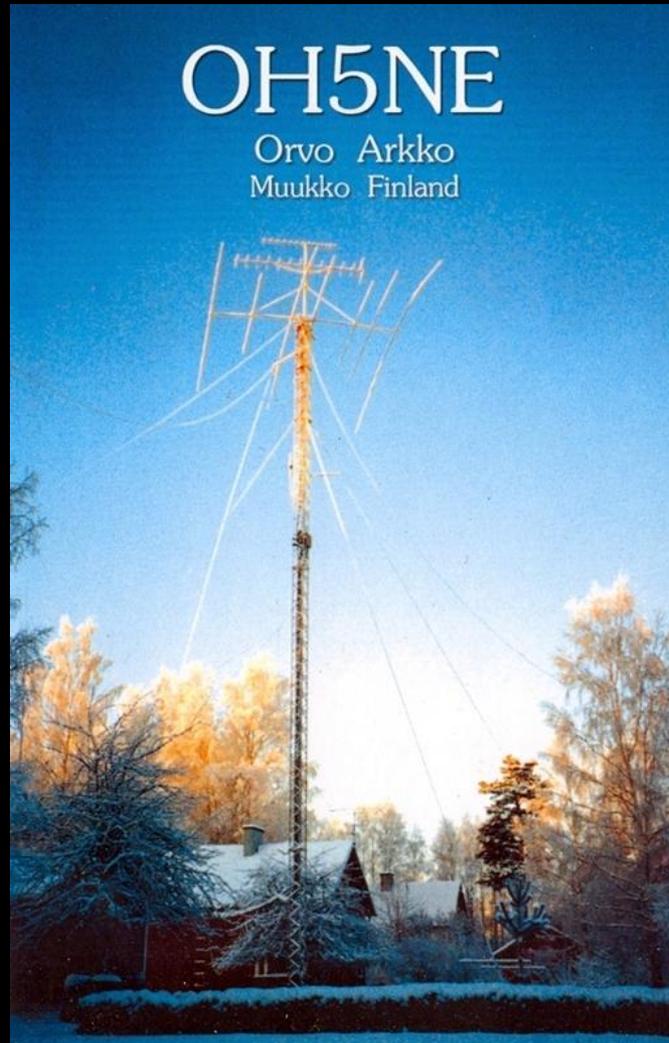

But as always, the sea was unpredictable and high winds made a landing impossible. On the following day, a small team landed by a small dinghy on the leeward corner of the reef and Märket was active once again and got into your log. The spirit of discovery was still the same - 35 golden years later.

Landing party: Lars, OHORJ, Martti, OH2BH, Ville, OH2MM, Pertti, OH2PM, Pekka, OH2TA, Orvo, OH5NE

Equipment: 2x Yaesu FT1000MPs and FinnFet FF-1101 amps & A4-beam.

Some 12.414 QSOs were made during this extended weekend outing. The entire undertaking was hosted by Club Zero, OH0AB/OJOJ and the Märket Reef Power Co. - with OHORJ at the helm.

Greenland is the largest island in the world. Most of the 55,000 inhabitants live along the coast in 18 towns. Since 85% of the country is covered by ice, transportation between the towns is by air or boat. The photo shows a portion of the town of Nuuk, where my contest operation took place, from the Club Station OX3NUK. Thanks to OX3HX, OX3DB and LA5KW for their hospitality and assistance.

photo: Norwegian whaling shooting a harpooned minke whale

The continuing slaughter of whales should be stopped immediately in all parts of the world. The excuse of scientific research has no base whatsoever. Everyone should participate in the fight against this cruel and unnecessary activity before it is too late. The point will come sooner than you think before whales are extinct and can only be seen on films or pictures. So help to get the world rid of this inhumane hunt. Contact your local Greenpeace-office for more information.

40M DXCC QSL CARDS ON4UN

An aerial photograph of the island of Saba, showing its rugged, green mountains and steep cliffs meeting the deep blue ocean. The sky is bright blue with scattered white clouds. The text 'PJ6A Saba' is overlaid in the top right corner.

PJ6A
Saba

A new DXCC Entity, born 10-10-10.

40M DXCC QSL CARDS ON4UN

DXpedition to the new DXCC entity of Saba/St. Eustatius

Organized by the Southeastern DX Club (SEDXC)

Operators:

K4SSU, K4UEE, K4ZLE, K5AC, K8EAB, KØIR, KU4V, N4GG,
N4HH, N4LR, N4NX, VE7CT, VE7XF, W4GKF, W6IZT

This new DXCC entity was created as a result of the dissolution of the Netherlands Antilles on 10-10-10. The two islands of Saba and St. Eustatius are now considered one DXCC entity due to their close proximity. We chose Saba as our operating site due to the uniqueness and beauty of the Island. It is a rocky volcanic island with a single road. It is located between St. Maarten and St. Eustatius and is five square miles (13 sq. km) in size and a population of 1400. There is excellent scuba diving, snorkeling and hiking making this tiny spot in the Caribbean a mecca for eco-tourism; see www.sabatourism.com. It has earned the moniker "The Unspoiled Queen". Saba has one of the shortest commercial runways in the world. Landing and take off from there is not for the faint hearted! For more information see www.pj6a.com

The Netherlands Antilles voted to split into smaller countries on 10-10-10. The five islands of Bonaire, Curacao, Saba, St. Eustatius, and Sint Maarten had been planning this change for several years. Our focus was to help Sint Maarten celebrate this momentous occasion, and while doing so, we were able to activate a new DXCC entity.

CW and SSB stations were set up on two locations on different sides of the island. We used ICOM 7600 radios, Alpha 8410 amps, and DX Engineering, SteppIR, and Hex-Beam antennas. There were other equipment sponsors and we appreciate everyone's support.

The team consisted of 13 highly skilled, very experienced operators. Putting a new country on the air was an opportunity that none of us had experienced before. We are most appreciative of all sponsors, donors, crew, and the support team. It took everyone's effort to execute this operation.

This country consists of 4 major rocks which form the crater ring of a submarine volcano. The largest rock is 130m long and 20m high. There is no vegetation. Wildlife is restricted to sea-gulls, crabs and bird-flees.

Over 5K QSOs were made in 3 days on 10 - 160m CW/SSB.

Our thanks go to ELECTRIL (antennas), TRANSBRASIL (flying our equipment), the many friends who helped with material, work and encouragement and to the truly magnificent crew of DOUDOU DIOP, who transported us between F.N. and the rocks, and to NCDXF which provided funding & QSL's.

ELETRÔNICA POPULAR ATLANTIC AWARD (EP-AA)

Sponsored by the Amateur Radio department "CQ Radiocamadores" of the Brazilian magazine *Eletrônica Popular*, the EP-AA is granted to amateurs of any country who send proof of contacts with 60 countries of the Atlantic Ocean border; one of them must be with a Brazilian oceanic island (PY0):

1. Contacts must have been made after March 31, 1967.

2. All authorized amateur bands and types of transmissions are valid, with a minimum report of 3-3 for phone and 3-3-8 for CW.

3. Applications enclosing a log authenticated by a recognized Amateur Radio association must be addressed to: "EP-AA Manager — *Eletrônica Popular* — Caixa Postal 1131 — ZC-00 — Rio de Janeiro — GB — Brazil".

4. In order to cover postage, 8 IRCs should be sent by applicants (please don't send currency, but only IRCs).

5. The official list of the DXCC will be adopted; only the countries of the Atlantic border proper (and not of interior seas, such as Baltic or Mediterranean) are valid for the EP-AA.

SURINAME FACT SHEET

Location and Physical Features: Surinam lies on the northeastern coast of South America, bordered by French Guiana to the East, Guyana to the West, and Brazil to the South. The interior highlands are covered by dense tropical forests, intersected by rivers. The southern border region is savanna. The highest point is 1,225m (4,120ft), in the Wilhelmina mountain range.

Area: 163,265 sq km (63,036 sq miles), **Population:** 425,000 (1992), **Capital:** Paramaribo

Language: Dutch is the official language, but English is widely spoken: Sranan Tongo, the lingua franca is spoken by almost everyone. Also spoken in Surinam are Sarnami Hindustani and Surinam Javanese as well as several Creoles and Amerindian languages.

Religion: The main Christian denominations are the Dutch Reformed Church, the Moravian Church and the Roman Catholic Church. There are also Hindu and Islamic congregations (about 27% and 20% of the population, respectively).

Climate: Tropical climate, outside the hurricane zone. Temperatures range from 21-32 degrees Celcius. There is little seasonal change. The warmest months are September and October.

This is a new DXpedition
of the LYNX DX GROUP
thanks for calling us.

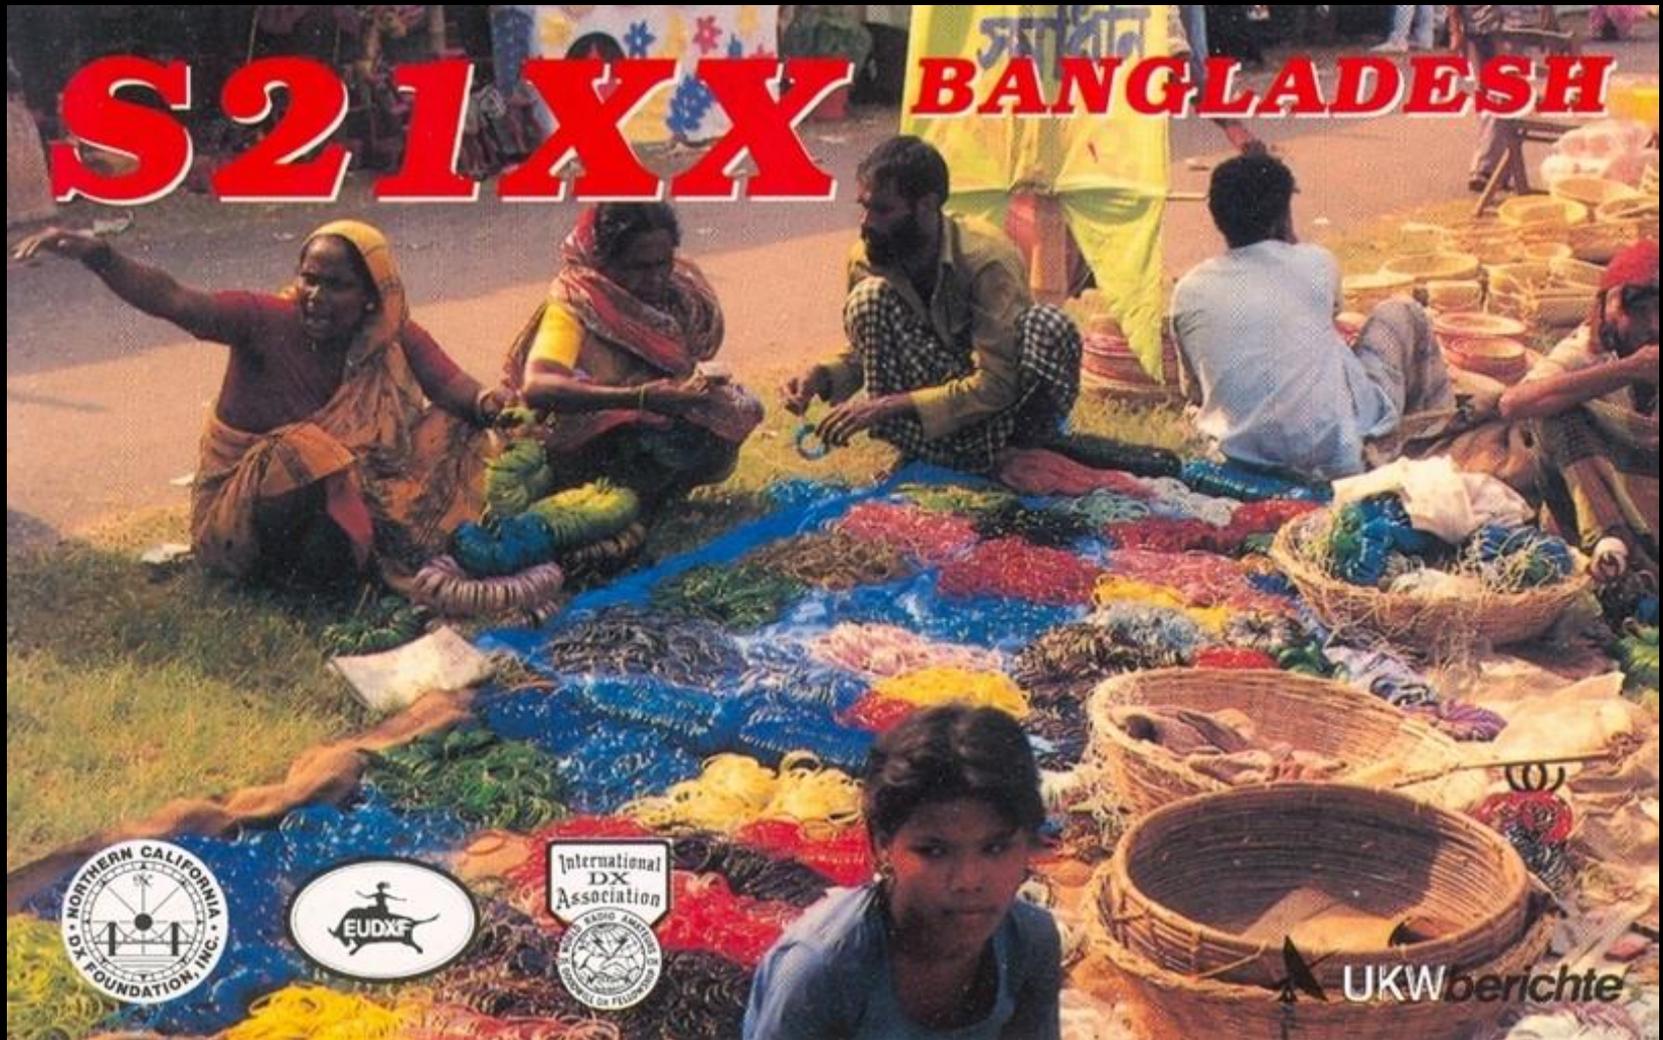

The Saharan Arab Democratic Republic or RASD —formerly Spanish Western Sahara— was formally proclaimed on February 27, 1976 in Bir Lehlou. To date, the RASD has been recognized by 71 countries and it is the 51st. member of the Organization of African Unity (OAU). The country is bordered on the north by Morocco, on the south and southeast by Mauritania and on the east by Algeria and the west by Atlantic Ocean. The physical character of the area has many faces, ranging from vast stretches of desert to green oases from worthless sand to valuable phosphate deposits and fishing.

Bangladesh, „the land of the bengals“ is a delta of 55,598 square miles formed by the rivers Ganges and Brahmaputra. Our operation took place from a remote village north of Dhaka, the capital of the republic. At the present bottom of the sunspot cycle we decided to operate mainly on the low bands and in the CW-mode. That's why we installed a 66 ft. high top-loaded vertical antenna with elevated radials – our special low band gun – and six more other antennas. Living two weeks in our peaceful resthouses with a wide garden and running up to three transceivers by power supply from a 7 kW generator, we had a really good time there. The outstanding success, the many visits by friends at our QTH and the fine hospitality of the landlord made our stay a memorable one. The log was closed with 12.839 QSOs, more than 150 countries and 923 top-band QSOs, a few of them even with North America straight over the pole.

We gratefully appreciated the great support by the officials of the B.A.R.L. Lastly, thanks to all of your for unforgettable pile-ups. 73's, see you on the next trip operation.

We spent 8 days and 7 nights in our hotelroom, fighting big pile-ups and small mosquitos. Unfortunately, due to very unreliable main power, we couldn't stay on the air as much as we wanted. Some nights we were operating by the candlelight using a car battery as the only power source for the ICOM-735. We worked 9320 QSOs on the 9 HF bands.

The opposite picture was taken on our last day in Sao Tomé. After packing all the radio gear we finally had a chance to take our first and only swim in the ocean just before flight departure. It was great!

Special thanks to S92LB, Luiz and his XYL Bertha, without their help our operation wouldn't have been possible.

Thanks for the QSO, 73 from John and Erik.

The Republic of Tuvalu – a Pacific Paradise

With an elevation of 2 m above sea-level this island-nation will vanish first once the ice-caps melt and the ocean rises. Funafuti is a long, narrow atoll just providing the space for a road and houses on either side. Apart from one hotel, a few shops and Darwin's famous Drill Hole Funafuti is a modest place. We stayed at the Hide Away Guesthouse on the atoll's Northern tip with the Koepcke family who played phatanstic hosts. We »brought all our aluminium on the air«, losing an amplifier after only forty hours of operation. As it happens every time we have to repair something ...

We made over 20000 QSOs though, and hoping you had fun catching us we are looking forward to hearing you again on our next DX spot...

TNX QSL - QSOs verified by DL7UFR

QSL de
DL7UFR

The first destination of our 1999 Kiribati DXpedition was Tarawa. We made 32.630 QSO's (without dupes) between October 19th and November 10th, including 324 QSO's on 160m, 1.986 on 80m, 776 on 6m and 877 on RTTY. We operated simultaneously with up to 6 stations. Some of the antennas were vandalized by guests of a big party at the hotel. During the stay on Tarawa, half of the team made a 10 days DXpedition to Banaba (T33CW, T33Y) with half of the equipment. Many thanks to all who made this DXpedition possible, especially to the YL's and XYL's travelling with us, Bernd DF3CB, Manfred DK1BT and Dietmar DL3DXX, for the online log logistics. GLAD TO HELP AN OLD FRIEND!

COCO'S ISLAND is located 5°32' N, 87°04' W, 500 Km from the Costa Rican coast, 650 Km NNE of Galapagos Island, and has an area of 24 Km². Known since the 16th century as "Isle de Coques", a favorite place for pirates, corsairs and whalers who used the island as a source for fresh water, wood, meat and coconuts. At least 20 treasures are said to have been buried here, including the loot of Lima by William Thompson in 1820 and Bennett Graham (Benito Bonito) with his ship "Lightning" who looted many cities and ships along the South American coast. During the 1800's over 400 expeditions spent years looking for these fabulous treasures, including Gissler who lived 18 years in the so called "Treasure Island", leaving an innumerable amount of caves all over the area. On the rocks at Chatham Bay one can find thousands of inscriptions of pirates and other visitors dating as far back as the 17th century. In 1874 the Costa Rican Government used the island as a prison for a period of 7 years. Uninhabited for the past 90 years, the island was recently declared a National Primary Forest Reserve and is the subject of many biological studies including the Darwin Finches and other unique species found only in this beautiful and exotic place. The Island is primarily composed of volcanic lavas covered by very dense vegetation, with high humidity due to abundant rains which give way to hundreds of waterfalls draining out into the Pacific Ocean through the high coral reefs. Landing is somewhat difficult and only possible at Chatham Bay in the north part (very small installation grounds) and Wafer Bay in the West side where in 1978 a complete amateur radio station and antenna tower system was installed by TI2CF and left there for future amateur visits. No permanent residents live on the island, therefore generators, fuel, some antennas and food are necessarily taken on each trip. Transportation is only feasible by chartered boats from Port Puntarenas and taking 4 days round trip. On behalf of the Costa Rican DX Club we congratulate you for being one of the fortunate ones to work us. Many thanks.

73's Boris E73Y

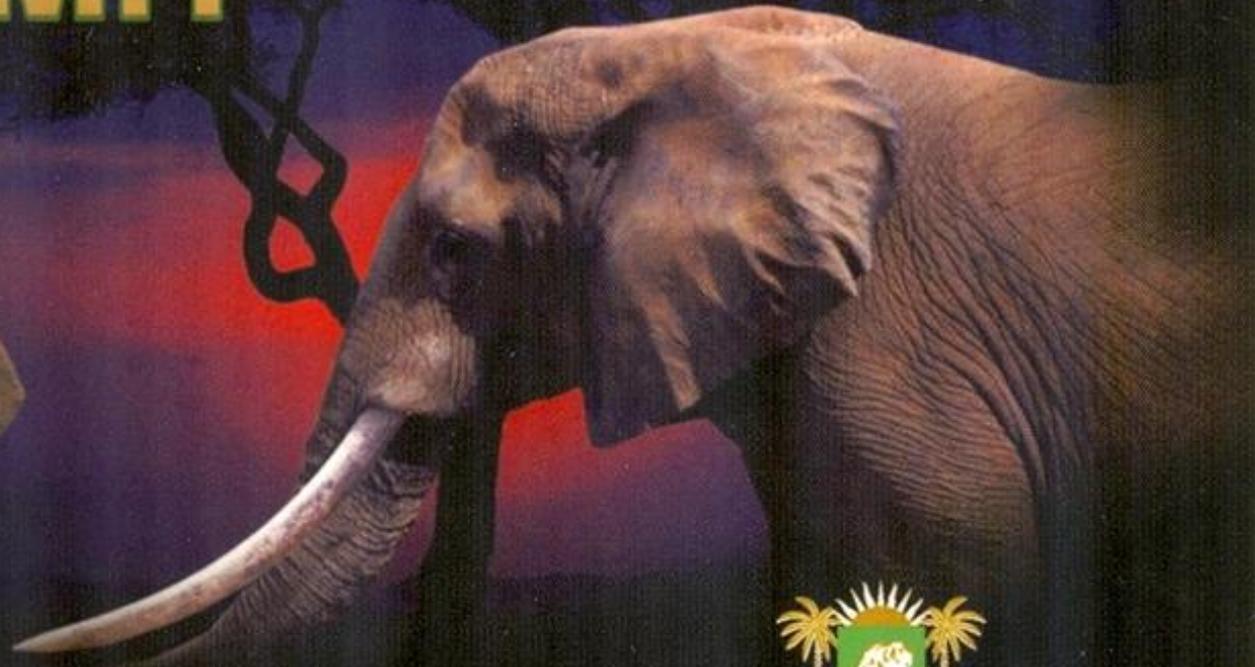

Republic of Chad is a landlocked country in central Africa. It is bordered by Libya to the northwest, Sudan to the east, the Central African Republic to the south, Cameroon and Nigeria to the southwest, and Niger to the west. Chad covers area of 1,284,000 square kilometres (496,000 sq mi) which is populated by 10,146,000 inhabitants (2005 estimate). Due to its distance from the sea and its largely desert climate, the country is sometimes referred to as the "Dead Heart of Africa". Chad is divided into three major geographical regions: a desert zone in the north, an arid Sahelian belt in the centre and a more fertile Sudanese savanna zone in the south. Lake Chad, after which the country is named, is the largest wetland in Chad and the second largest in Africa. Chad's highest peak is the Emi Koussi in the Sahara, and N'Djamena, (formerly Fort-Lamy), the capital, is the largest city.

Chad has more than 200 distinct ethnic groups, which create diverse social structures. The colonial administration and independent governments have attempted to impose a national society, but for most Chadians the local or regional society remains the most important influence outside the immediate family. Nevertheless, Chad's peoples may be classified according to the geographical region in which they live. In the south live sedentary people such as the Sara, the nation's main ethnic group, whose essential social unit is the lineage. In the Sahel sedentary peoples live side-by-side with nomadic ones, such as the Arabs, the country's second major ethnic group. The north is inhabited by nomads, mostly Toubous. The nation's official business languages are French and Arabic, but over 100 languages and dialects are spoken. Due to the important role played by itinerant Arab traders and settled merchants in local communities, Chadian Arabic has become a lingua franca

FEDERATED STATES OF MICRONESIA

ZONE 27

V63DX

An aerial photograph of a tropical atoll island. The island is elongated and features a central lagoon with a darker blue interior. The surrounding water transitions through shades of light blue and turquoise, indicating shallow reefs and sandbars. The island's landmass is dark green and brown, showing dense vegetation and some cleared areas. The entire scene is set against a deep blue background of the open ocean.

QSO WITH

In early 1849, the North American telegraph network had reached Saint John, N.B. But not yet Halifax, Nova Scotia. The latest news from Europe arrived in Halifax via fast "Packet Boats". The dispatches were taken by horse and rider to Victoria Beach, a distance of 233Km/144 Miles. During the two day trip there were changes of horses every few miles and one change of rider. At Victoria beach the dispatches were taken by steamboat to Saint John, New Brunswick from where they could be telegraphed through the rest of North America. This was organized by a forerunner of the Associated Press.

The Pony Express ceased operation in November, 1849 when the telegraph was completed through to Halifax. The event will be commemorated in September and October of 1999 with a re-enactment and celebrations along the original route.

To recognize this event the Call Sign XJ1JF was issued

Heard Island Expedition 1983

OPERATED BY: Dave Shaw VK3DHF and Al Fischer K8CW

FROM: 21 Jan to 21 Feb 1983

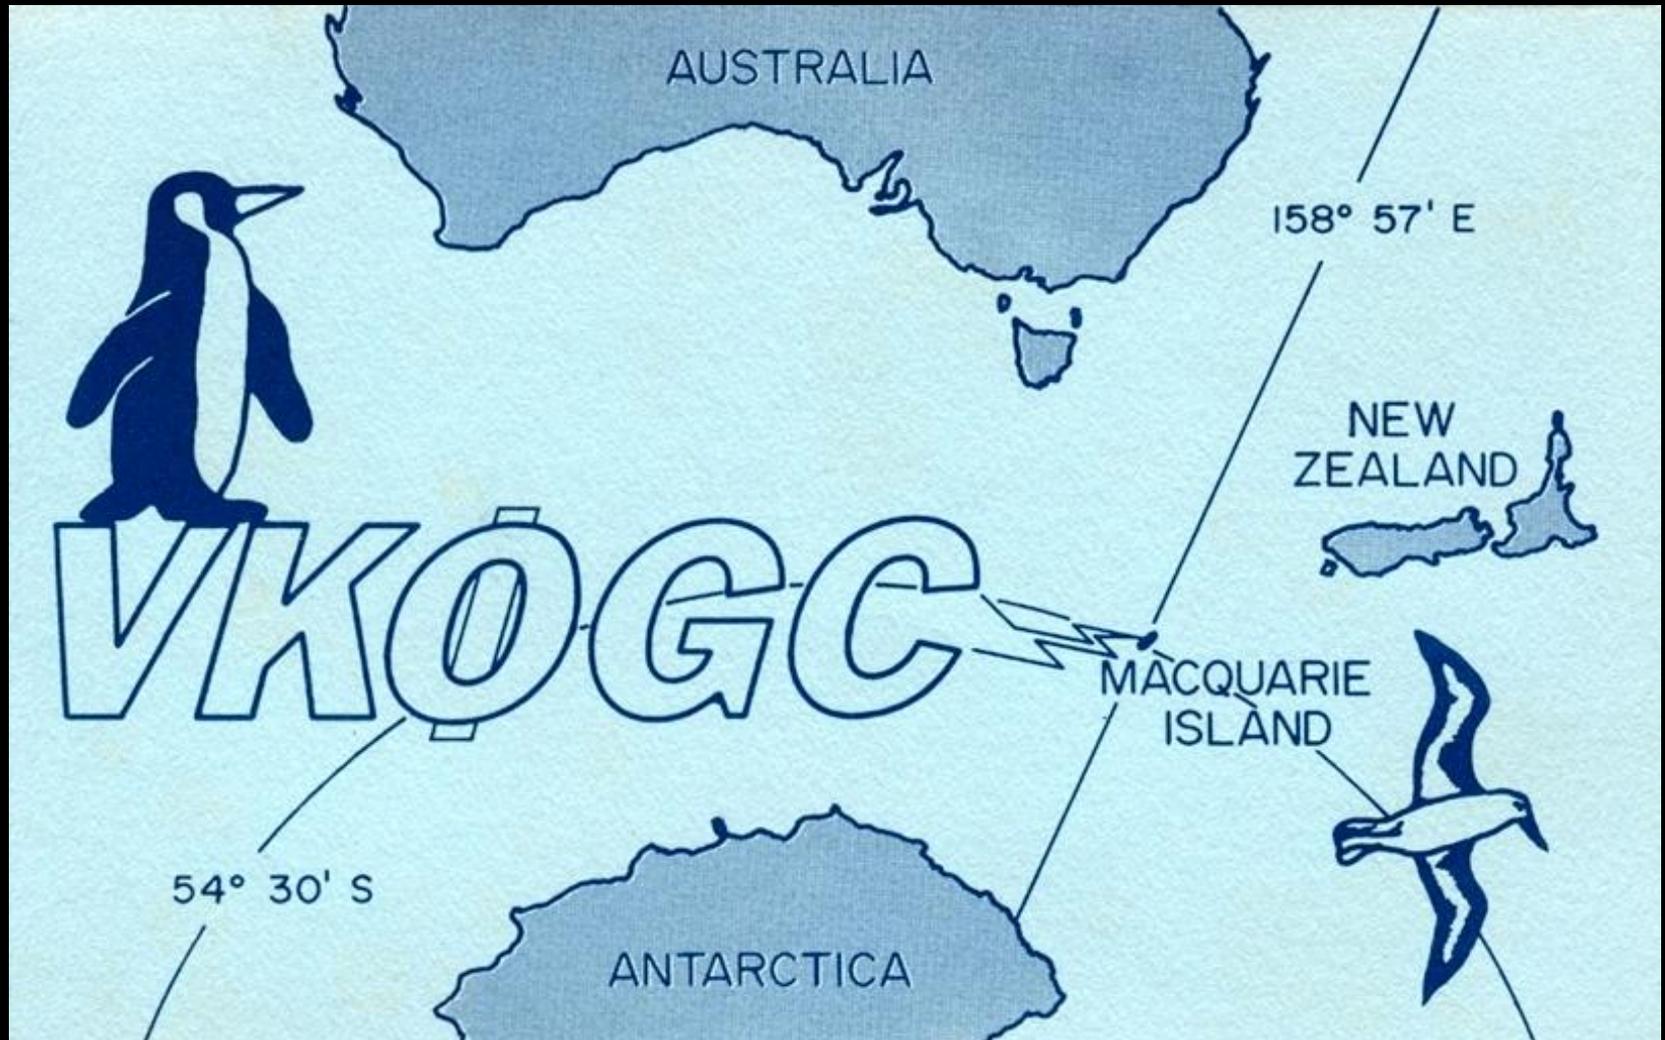

This remote, cold and windswept island is located 73°S—53°E, 4100 km SW from Perth, West Australia. Approx. 30,000 contacts were made. This expedition was successful by having financial assistance from NCDXF, IDXF, CANADX, Long Island DX, ARCADIANA, DXFF, Divisions of Wireless Institute of Australia, JYI and many more Clubs and individuals. \$A30,000 was paid to the Heard Island Expedition Company for transport, clothing, footwear, bedding and food. Equipment was donated or loaned by VK2, VK3 and VK6 Divisions of WIA, Netronics (VK6NE), VK6FS, TVW7 Perth and many VK6 operators. Al K8CW brought two linears, HF rig and vert.ant. The mountaineering group was successful in being only the second expedition to make the ascent to the top of Mawson's Peak of Big Ben, the dominant feature of Heard Island. Away from Australia for 69 days, they logged approximately 9,000 km on the Maxi-Yacht ANACONDA II. From the calm waters of Australia, through mountainous seas of the lower latitudes, the yacht performed magnificently with a report of 18 knots during the return home. After 15 months of planning and research, this international expedition achieved its objects without injury or incident. Icom Transceivers IC720, IC730's and IC740 used exclusively.

RIG : IC-706 HL-1K ANT : DIPOLE

Thank you very much for calling and making QSO. We had very good days in the island with VK9FL (JE5FLM) at the end of 1996. I made about 1400 QSOs on HF bands, but I could not reply requests of many DXers with some troubles. So I want to operate again in the near future. Catch you again.

Thanks for supporting our operation : KDXG(Kagawa DX Group), JAIJQY, JAIWPX, JE5WJM, Hayashi Musen(QuickLOG), VK9LH, VK2IAZ with JARA members, staff of the Pinetrees Lodge and their guests, and my wife JF5PRY with sons.

Mellish Reef (Lat 17°25'S, 155°51'E) is located approx 500 miles east of Cairns, Queensland, in the Coral Sea. The only permanent land site is Herald's Beacon, a sandy coral cay, almost devoid of vegetation, which rises about two metres above sea level at high tide. The only inhabitants of Mellish Reef are the thousands of sea birds and nocturnal crabs.

This is the location chosen by the DOWN UNDER DX'ERS CONTEST CLUB for the assault on the 1984 CQ World Wide DX Phone Contest. The expedition was made possible by the generous assistance of TRIO KENWOOD AUSTRALIA PTY LTD, AMATEUR RADIO ACTION magazine, DICK SMITH ELECTRONICS, RADIO AUSTRALIA and several amateurs who contributed time and money towards the trip.

The club also wishes to thank KEITH THIELE for the use of his yacht, SPITFIRE, and for his expertise in sailing her, as well as the CITY OF GLADSTONE, Queensland, for it's kindness and hospitality and, in particular, Marilyn and Tom Newton VK4BTN.

QSLs kindly donated by H.I.DX.A. CLUB.

Operating for six days from Milly's Inn at Shoal Bay, Nigel G3TXF made 6,000 CW QSOs. This first return visit in March 2003 (after 30 years) to Anguilla and the callsign **VP2EN** coincided with the RSGB Commonwealth Contest [BERU] during which some 640 QSOs were made. The station was a TS-50 (100w) to an R-7000 vertical. Outside BERU, the focus was on the WARC bands and 40m.

A joined operation of:
 PA0ZH, PA3EWP, PA3GCV, PA4WM, PA5EA, PA5ET

Second and final destination of the "Caribbean Tour 2002" was Montserrat. From an operation site only a few meters away from the exclusion zone (EVACUATED AREA), we managed to have two stations running 24 hrs a day, 7 days a week. In total we made 31.886 QSO's during our 12 days stay, including a MOST entry in the CQ-WW-DX SSB contest. So, close to the rumbling and shaking Soufriere Hills volcano, one might ask the question: "either brave or stupid". In fact, we were on the safe and inhabitable part of the island, and embraced by the kindness of the Monserrations and the beauty of their "Emerald Isle of the Caribbean".

HOST ORGANIZATION:

Pitcairn Island Amateur Radio Association (PIARA)

QSL Support & Management: Yaesu, JG7AMD/Super log

Ducie Island, located at 24.67 degrees S, 124.80 degrees W, is the most isolated of the four Pitcairn Islands. The nearest land is Henderson Island, which lies 354 km to the West/Northwest. Ducie is a coral atoll, but has also been the site of past volcanic activity. This has left the shoreline adjacent to the lagoon with a sharp, jagged surface that makes walking without proper foot protection difficult to impossible. The shoreline adjacent to the ocean is made up of broken coral, seashells and stones. Ducie occupies an area of 0.7 square km, and is approximately 4 meters above sea level. The only significant vegetation is *Tournefortia argentea* (called cabbage trees, by the Pitcairners). Wildlife consists of several species of seabirds, and millions of crabs.

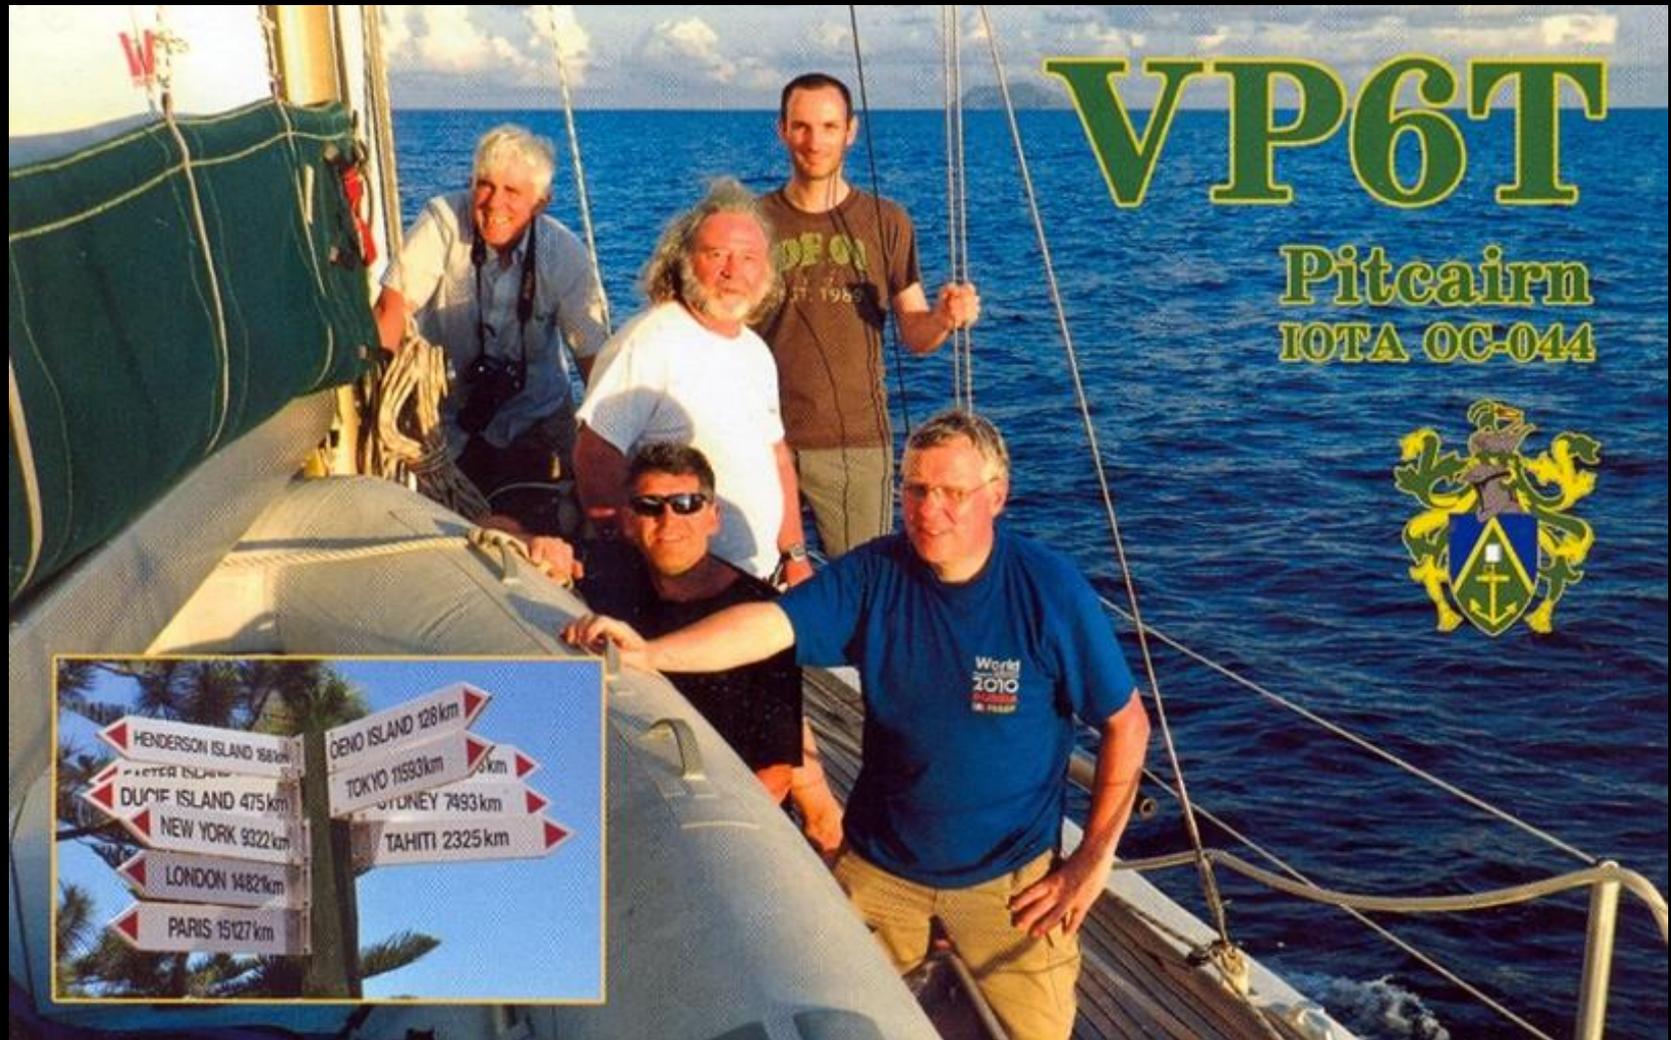

The approval of IARU membership for the Pitcairn Island Amateur Radio Association (PIARA) on November 15, 2001 paved the way for activation of Ducie Island as an all-time new DXCC entity.

The initial attempt by the PIARA was during the November-March storm season in this part of the Pacific. On November 19, our ship was within 100 km of Ducie when high seas and engine failure forced us to turn back.

The second PIARA attempt was successful. We met the *Braveheart*, which had steamed from Antarctica to meet us in Gambier, French Polynesia. We stopped briefly at Pitcairn Island to pick up gear and the remainder of our team. Landing our team and gear was efficient and without incident due to the professionalism of the *Braveheart* crew and the hard work of our team. The temperature on the shore was close to 50 degrees Centigrade. In spite of high temperatures, several storms, and enormous pile-ups, from March 16-26 VP6DI logged over 51,000 QSOs, and 22,413 unique calls. We are grateful to give a new one to so many!

VP6T Pitcairn Island, Pacific Ocean IOTA : OC-044 LOC : CG44WW

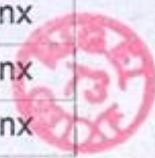

Organised by Jacques F6BEE, the five-man VP6T DX-pedition from Pitcairn made 56,300 QSOs in just over eleven days operating. The VP6T team members were Jacques F6BEE, Vincent F4BKV, Michel FM5CD, Gilles VE2TZT and Nigel G3TXF. The operation is grateful for the support received from NCDXF. Details of all sponsors as well as photos and other information can be found on the VP6T website: www.VP6T.org. In order to be as ham-friendly as possible, the full VP6T logs were uploaded to both ClubLog and LoTW each day during the operation.

South Georgia Island

South Georgia Island:

South Georgia Island is a British overseas territory in the southern Atlantic Ocean. It is a remote and inhospitable place. The island is at 54.17 degrees South and 36.30 degrees West. There is no native population on the islands. Legendary polar explorer Sir Ernest Shackleton is buried in the cemetery at Grytviken.

The Henryk Arctowski Station of Polish Academy of Sciences was found on 26 Feb. 1977 in Admiralty Bay on King George Island at South Shetland archipelago. The staff of the station realizes the polar project of Polish Academy of Sciences. Biological, meteorological and geophysical (seismology magnetism and ionosphere) researches are carried out all the year. Constant staff of the station amounts 19 persons including scientists and technicians. The station receives scientists from other countries on the basis of the manual exchange. The main coordinator of researches carried out the H. Arctowski Station is Institute of Ecology of Polish Academy of Sciences-Dziekanów Leśny near Warszawa.

XW8KPV is the second official radio station for amateurs in PDR LAO.

For this Dx-pedition and the establishment of XW8KPV we had the co-operation of the following Ham volunteers from Japan : JA1UT, JH1AJT, JR1CBC, JL1MWI, JQ1FAB.

It is a marvelous thing that after such a long silence XW8KPL and XW8KPV can now communicate with Ham amateurs all over the world.

We want to express our sincere gratitude to the following who have kindly co-operated : JH1DHI, JH1HGC, JH1IZA, DJ9ZB, KQ2M, K7SS, PY5EG, JP1NWZ, JR1CTA, JM1HJG, JH1DTC, Hamers Co., Jalatech and Laos Embassy in Tokyo.

MACAU, A UNIQUE BLEND OF EAST AND WEST

Macau has attracted international travelers and traders – along with adventurers such as DXers, explorers and missionaries. Macau is the oldest European (Portuguese) settlement in China and during four and a half centuries the territory has experienced a pageant of history developing into today's modern Macau. You will find living evidence of ancestral China, Renaissance Europe and the cosmopolitan 1990s, with non-stop casinos, marvellous restaurants and quiet retreats where tropical Asia relaxes with the old-world Iberia. The Portuguese era of Macau is to come to an end by December, 1999 when China will resume Macau's administration.

Macau with its 450,000 inhabitants is located only 60 km from Hong Kong and is easily accessible by sea and air, and an imposing gateway joins the enclave to China's Guangdong Province. Several airlines operate to Macau from many major Asian locations.

It is here in the heart of Macau that the home of XX9TR and XX9TZ is located at the Hotel Royal, overseeing the entire area of 21 square kilometers of Macau. Here the Royal's friendly staff have made the hotel premises available for amateur radio. The 19-floor building with six different restaurants and Macau's only full-length indoor swimming pool is at the disposal of tired DXers to refresh and prepare for another operating stint from this rare radio location.

While the DX station is managed by Martti Laine, OH2BH/XX9TZ and Pertti Simovaara, OH2PM/XX9TR, you may also visit this site and experience its DXexotica – the limelight of amateur radio at its very best.

You can make your reservation at Hotel Royal (853) 552 222 or FAX (853) 563 008.

KOSOVO

40M DXCC QSL CARDS ON4UN

THE FINAL FANFARE WITH A BRAND NEW DXCC STATUS

It is very rare for a new DXCC Entity to be born in the middle of busy Europe. This has brought some special excitement and joy to the air waves.

For Kosovo this joy was doubled as their new ITU (+383) country dialing code

was activated at the same time. Whether by radio or by telephone, the mountainous state of Kosovo is now truly connected to the world. It was time for jubilation by both radio folks and by telecom administrators: DXCC country 340 is here. The distinctive blue-yellow flag of Kosovo is proudly flying high.

The first two radio venues were the SHRAK HQ at the Technical University in Pristina and the out of town Ura Gurit Hotel in Vushtrri, some 20 km away. Tall antenna towers were installed and Kosovo suddenly became the most sought-after country across the bands. Tens of thousands were there wanting to catch a new star, Z60A. As the local power lines were noisy, and noisy LED lights illuminated the area, it was better to look for a much quieter location that was as far away as possible from people and noise.

An empty, war torn house was found at 1000m ASL. Unlimited space for beverages was also available. While the house itself was riddled with bullet holes, there was one corner that, thanks to gas heating, was cozy for operating. This house became home for our low-band operations in the later weeks. While the temperature was often down to minus 17C (2F), the warm feeling of handing out low-band counters more than made up for it.

THE MAGIC COFFEE CAN ANTENNA ON 2.4 GHz

The ZA1A operating locations were 300 meters apart and had to be linked together for shared logging as well as for multiplier passing. The commercial 2.4GHz links were damaged due to high RF levels and two sites were left idling independently. But amateur radio is known for its innovations, and a new 10dB antenna was created out of a Nestle Coffee can. Two operating locations were not in clear sight of each other, but this powerful antenna helped to establish a consistent and continuous connection between the two sites.

This innovation and coffee can illustrated the essence of the ZA1A training/operating program. Working closely with technical knowledge and realizing its implications for everyday applications assures the practical side of amateur radio of a good standing in society. Measuring the performance of the Nestle Coffee can and really seeing the signal for the first time in a spectrum analyzer made the Albanians a bunch of True Believers.

IOTA DXPEDITION TO ST HELENA BY MARTIN G3ZAY

40M DXCC QSL CARDS ON4UN

Confirming our QSO/ ~~your SWL report~~ detailed below

CALLSIGN	DATE	TIME	FREQ	MODE	RST
ON4UN	28/12/04	1938 z	7 MHz	2x CW	S99
	—	— z	— MHz	—	—

digital QSL by fds www.fds-graphics.com

St Helena was discovered by the Portuguese Admiral Joao da Nova Castella in 1502. Its history is complicated but it has been British since 1659, part of the time under the control of the East India Company. Early inhabitants included refugees from the Great Fire of London of 1666. Its most famous resident was Napoleon Bonaparte who was imprisoned there at Longwood House from 1815 to 1821.

The island is at most 17km long and 10km wide and rises steeply to about 2700 feet at its central ridge. Most of the land below 1000 feet is barren but the higher regions are green and fertile. Old fortifications can be seen around the coast wherever a valley presented a possible landing spot for invaders. Access is currently only possible by sea (on the RMS St Helena) from Capetown, Walvis Bay and Ascension Island but a decision on whether to build an airport is imminent. The picture overleaf is taken from the highest point, Diana's Peak, looking towards Longwood and Deadwood Plain.

Today there are about 3800 St Helenans on the island, and over 1000 working overseas – mainly in the Falklands, Ascension Island, and the UK. I stayed at the Wellington House in Jamestown and Farm Lodge at Rosemary Plain – both are strongly recommended. For more information see <http://www.sthelenatourism.com/>

40M DXCC QSL CARDS ON4UN

At the end of August 2000 Bob Henderson, G3ZEM and XYL Karen boarded the M.V. S.A. Agulhas in Cape Town, South Africa to sail for six days on the high seas to the Island of Tristan da Cunha in the South Atlantic Ocean. As guests of Andy, ZD9BV and Lorraine, ZD9CO Bob operated for a period of 17 days as ZD9ZM, making some 20,537 QSOs of which 83.5% were CW, 10.4% SSB and 6.1% RTTY.

Bob and Karen will forever cherish their time on the volcanic island and will never forget the warmth of the welcome provided by its happy and resourceful people.

Sincere thanks are due to all of the islanders but in particular to Brian Baldwin, Her Majesty's Administrator of the Island and to the Island Council for their formal invitation to visit, also to Jimmy Glass, The Chief Islander for his support in making LF operation possible. Finally, an enormous thank you is due to Andy and Lorraine who were without question simply the best hosts we could have ever had!

Quartz Hill Amateur Radio Station -- managed by Wellington Amateur Radio Club

Location: 41°15' S 174°42' E - Grid: RE78is
CQ 32 - ITU 60 - IOTA OC-036 - Hutt County (58) - NZART Branch 50

Our radio station is on an exposed and isolated farm property 300m ASL overlooking the Cook Strait. We mainly use long wire beam antennas with legs up to 300m in length. The antenna farm covers about a square kilometre of farm land. The operation is from premises originally established for Radio New Zealand's reception of international broadcasts.

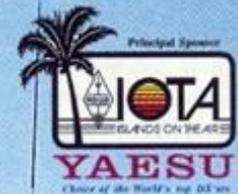

Thank you for the contact. QSL via the bureau or:

40M DXCC QSL CARDS ON4UN

Z S 8 I R

The Island: Marion is one of two islands comprising South Africa's Prince Edward group. The island is roughly 20 km in diameter, rises up to 1230 m elevation, and lies at 46° 53'S 37°52'E, 1600 km off the coast. As could be expected in the Roaring Forties, the island is extremely windy, with gales on around 110 days annually.

The island has a rich variety of bird and mammal life, and killer and humpback whales hunt and breed in the cold waters.

The permanent weather station on Marion is home to 12 weathermen, biologists and support staff. The crew remains on the island for just over a year, with no means of getting supplies onto or off the island.

The Operator: Chris de Beer (ZS5IR, formerly ZS6RI) took a year off from being a paramedic to become the medical officer for the 53rd relief crew on Marion. ZS8IR is the first personal callsign to be issued for use on Marion; previous operations have used the club callsign of ZS2MI or ZS8MI. Antennas consist of an assortment of wire antennas, including rhombics, a 50 MHz Yagi and a low band vertical.

The Supporters: The NCDXF came through with a linear amplifier and QSL support. The Lone Star DX Association, Marc Lurie of LAR, Hal Lund ZS6WB, Jan van Niekerk ZS6NW, Uli von Aswegen ZS6IR and Chris Burger ZS6EZ all contributed equipment. Software was supplied by WF1B (RTTY) and ZS6AJS (Swisslog). The Battle Creek Special low band antenna was provided courtesy of the NCDXF, WØCD, W8UVZ and K8GG.

The Equipment: IC735 FL2100Z (400 W output) PK232-MBX

Bajo Nuevo ...

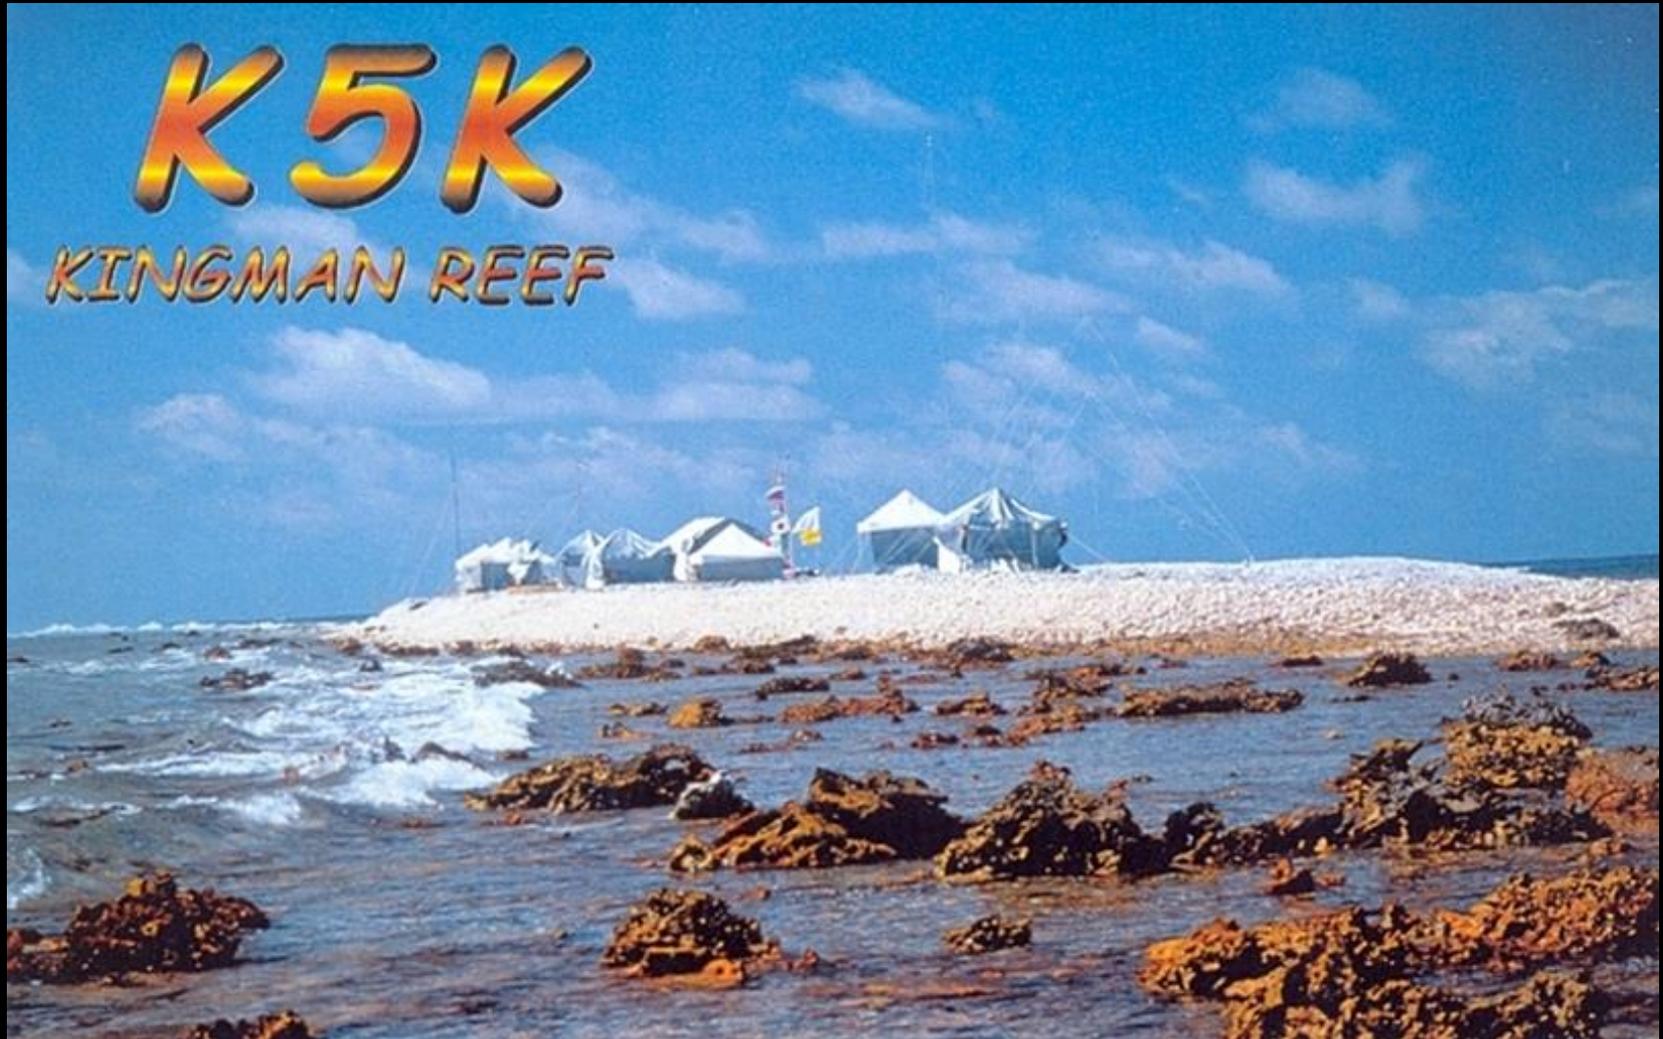

This seldom visited reef is located 300 miles north-east of San Andres Island, south-west of Jamaica in the Caribbean Sea. Landing is only possible at a low sand bank, 200 metres long and 10 metres wide. Our expedition was organized at San Andres Island and we took off from there in a 40 foot diesel boat. SMØAGD tried to find Bajo Nuevo back in 1974 but failed because of navigation problems. This time we used Loran-navigation and managed to locate the low reef which is visible only from within a distance of 3 naut. miles. During the 67 hour operating period, we made 6300 QSO's from Bajo Nuevo.

This expedition was organized by Sundsvall DX Group, Sweden, and sponsored by Northern California DX Foundation, Inc.

Equipment: 2- Yaesu FT 101 E. 1- FL 2100 B.
1- Heath SB 200.

Antennas: 12 AVQ, 18 AVT and dipoles.

The Penguin Islands are a string of 13 guano islands situated along the west coast of Southern Africa, off the Republic of Namibia. They were annexed by the British in the mid 19th century as part of the Cape Province (now part of the RSA). They therefore predate Namibia as an administrative entity. They are currently protected as nature reserves.

We operated from Penquin Island, in Lüderitz Bay (26 37 S 015 09 E). The island is about 1200 X 500 m, and our one tower was mounted at its peak (49 m amsl). The island is inhabited by many thousands of gulls, and a number of cormorants. There is almost no vegetation. A few derelict buildings from an old guano mine still stand on the eastern side.

We erected four rotatable Yagi antennas and three independent stations while on the island. The WARC band signal was radiated by an A3WS beam supplied by Cushcraft. The 10m monobander was supplied by INDEXA for the previous ZS9Z/ZS1 operation. The low band antenna was the same Battle Creek Special used at 3Y5X, and made available courtesy of WØCD, W8UVZ and K8GG through the NCDXF. Cabletronics kindly supplied 200m of RG-213 at cost.

An attempt was made to give extensive coverage to Europe and Japan (where the islands have remained high on wanted lists) as well as both low bands and WARC bands. In spite of indifferent conditions, these goals were met. Over 140 non-African stations were worked on 160 m alone.

NCDXF came through yet again with major financial support. Other contributors include TI2HP, W1JR and ZS5NK. K1MM, WØZV, ZS6WB (FL2100Z, 6 m equipment), ZS6P (2 generators) and ZS6BRZ (TH5DX) assisted with the logistics. The operators supplied 4 transceivers, two HF amplifiers, various towers, and two vehicles with trailers to get to and from Lüderitz harbour. SAPT issued the first ever ZSØ callsign especially for this operation.

The picture shows our first view of Penguin Island across the bows of the yacht "Sagitta". The skipper, Hans Rogge, did an excellent job.

ZSØZ

DECEMBER 1991

Operators:

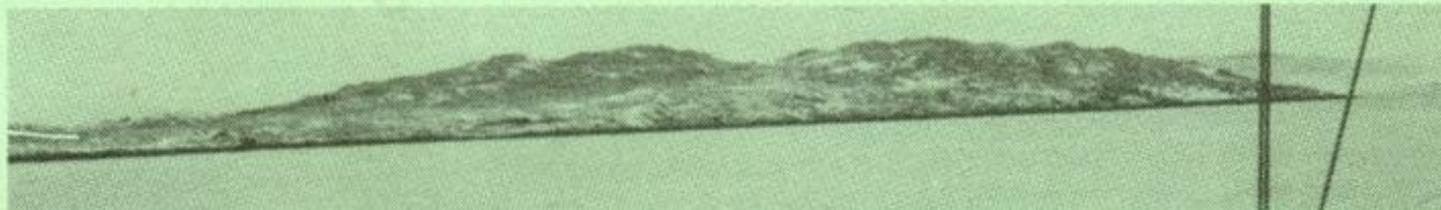

Chris R Burger, ZS6EZ (then ZS6BCR; also ZSØZ, ZS3Z, ZS9Z, V51Z)

Bernie van der Walt ZS4TX (also ZS9X, 7P8EN)

Rad Handfield-Jones ZS6RAD (Ex ZS4AAB until 1990)

Jan van Niekerk ZS6NW (then ZS6BUV)

Iizé van Niekerk (Jan's wife; played cook on the island)
