

# SCCARA-GRAM

Santa Clara County Amateur Radio Association

Volume 9, Number 5

May 1993

## President's Prose

The license class is doing very well with twelve people passing the novice written exams and two new novices licensed. We probably will have several more new hams within the next few weeks when many of the students take the technician written or the novice code.

This year the club will be taking advantage of the new Field Day VHF/UHF rule and will have a two meter station with an all-mode transceiver and an 11 element beam. It has been several years since we have made VHF voice contacts on Field Day, although Lou WA6QYS told me that one year the club made a 2 way contact with Hawaii on two meter SSB.

The dinner meeting last month was interesting and well attended. Thanks to Don K6PBQ for making it possible.

73, Don KC6WMM

## Good and Welfare

We were pleased to see Jack Russell, WA6IER and Bill Brothers, N6ZPC at our April 12<sup>th</sup> dinner meeting at the Colonial Inn.

Wally and Barbara Britten announced themselves as new grandparents of Mikel Williams, born 5:04 AM, March 25<sup>th</sup>, weighing in at 9 lbs 14 oz--our congratulations to all concerned!

We ran into George Fuji K6DEZ at Meadowbrook Care Center, where his wife, Hisako, is convalescing after surgery. Her room is

## Calendar

- 5/8 Foothill Flea Market--We sponsor!
- 5/10 SCCARA General Meeting
- 5/17 Field Day Meeting--(San Jose Red Cross, all are welcome)
- 5/24 SCCARA Board Meeting--(San Jose Red Cross, all are welcome)
- 6/12 Foothill Flea Market
- 6/14 SCCARA General Meeting
- 6/26 Field Day

### Next General Meeting

- Day: Monday, May 10, 1993
- Time: 7:30 PM
- Place: United Way Building
- Agenda: Trish WA6UBE will talk about Near Vertical Incident Skywaves (NVIS).

The United Way Building is about one mile South West from the San Jose Air Port. From I-880: take the Alameda turn-off going South for ½ block then turn left on McKendrie. From the South: go North on the Alameda, ½ block past Hedding turn right on McKendrie.

As soon as you turn onto McKendrie (heading East), turn right into the parking lot just behind the small church on the corner. It's best to park at the far end of the parking lot. The entrance is up the steps at the South East corner of the building. There is wheelchair access at another door at the North East corner, but for security reasons, only one door is open at a time--someone will have to notify the guard if you need wheelchair access. Also, try not to be too late--the doors may be closed with nobody around to let you in.

The San Jose Red Cross is located at the East end of McKendrie, across the I-880 freeway (South) from the San Jose Air Port. From I-880, take the Colman turn-off, head South, turn left (East) at the first road--that's McKendrie. From the South, go North on Colman, just past Hedding turn right (East) on McKendrie.

just down the hall from that of my wife, Natalie.

Remember: if you have any news for this column, call me at 264-2988.

de Ed Rawlinson, WD6CHD

---

## Treasurer's Treatise

The dues continue to trickle in. I added five people for the month of April bringing our total to 145. A new roster will be coming out in conjunction with this newsletter. Please let me know of any errors or omissions.

I would like to welcome our new members for this month. They are: Robert Hult KD6PWK and James Santos KD6QVO. We hope to see you at our meetings and events.

I submitted our list of drops for 1992. There were 45 persons who did not rejoin. The board called the bulk of them and the biggest reason (beyond simply not answering their voice mail message) was that they were too busy with other activities. The list of names will be kept on file with the secretary.

I have been in contact with Ed WD6CHD and Dan WM6M who will perform the audit function for us this year. I will publish the results next month.

That's it for official matters.

Here is an overview of our locker rental expenses: SCCARA has been a regular at the Foothill Flea Market for several years. In the beginning, the flea market items were stored at members' homes. As you might guess, that was not an ideal situation. The board made the decision to rent a storage locker. The location is at Storaway which is just behind the San Jose Red Cross. Our initial cost was around \$350 and has escalated to about \$450.

Last year the board opted to rent a second locker to consolidate SCCARA's belongings. There was discussion of simply getting one "bigger" locker but there was a concern about inadvertently

selling off club assets. This locker cost us \$396 last year. The rent is due for this year and Don KC6WMM will be negotiating with Storaway for the best price. It is difficult since many places offer one month free but only for the first year.

Our antenna trailer is stored at Bill N6ZPC's home at no charge. That is a significant savings to the club. Thanks Bill! We are also lucky in the fact that we maintain two fully operational HF stations at the San Jose Red Cross at no cost to us.

That's it for now. See you at the meeting.

73, Mike KB6LJC, Treasurer

---

## Flea Market Follies

Unfortunately, SCCARA made a rather feeble showing at the April electronic flea market. Some of the regulars noticed, too. I was out there by myself this time. My little Honda Civic might hold a lot for its size; but, in the overall scheme of things, it's really not that much. Anyway, despite all odds, I'm happy to report we made over \$61 (after expenses).

Half way through the event, I began to realize that a good showing by the club is important. People are much more willing to buy stuff--and pay a better price--when they see it's for the repeater fund of a local amateur radio club. This time, I was surprised to find that I didn't get the same response when telling people about this. Finally, one person commented how strange it was that a club fund raiser was being manned by only one member with just a hand full of stuff--why the lack of participation? That's when it hit me: A poor showing by the club at an effort like this, really doesn't make us look good.

So, the flea market effort is more than just a way of getting money for the repeater--it's also a public relations event.

Those of you who have been only *thinking* about helping out, but haven't done so--enough thinking, time to act! Do it not just for the

repeater, but for SCCARA's image. The next time SCCARA will have its regular booth at the flea market will be the June 12<sup>th</sup>. If you can help, please let me know.

---

Don't forget: SCCARA sponsors the flea market May 8<sup>th</sup>. We will NOT have our *regular* booth at this one.

If things go as well as last year, this will be one of our biggest fund raisers of the year. So, it's well worth the effort.

Lou says he believes there are enough volunteers signed up to do the job. However, the more people the lighter the load on each person. Even if you did not sign up to help, any extra volunteers are welcome. Remember: many hands make light work.

Lou WA6QYS is the chairman on this effort. If you have any questions, Lou can be reached at 241-7999.

If you were at the last flea market, you may have heard/seen a fire truck snake through the place--with lights and siren! Some sellers were setting up along the way at the edge of the rows of parking places. This makes it very hard for other vehicles to pass by--including the fire truck. Evidently, one person was kneeling down for a better look at something at one of those spots while a vehicle was trying to make its way through. The driver didn't see him and ran over the poor guy's foot!

So, if you plan to sell stuff at the flea market, **please park only in the marked stalls!** That drive way along the end of the rows is the only way for vehicles to move through the area--keep it open!

73, Gary WB6YRU

---

## **A Class Act**

SCCARA's amateur radio class is producing results: I am pleased to announce that we had

twelve people pass the novice test and three pass the code portion. Persons passing the code portion are J. Goldberg KD6PBH, Ruth Smith and Lydie Heidweiller. Passing the Novice Theory are Sean MacKnight, Edward C. Powell, Yvonne Richardez, Andy Wirt, Sandra Buckingham, Mong Chew, Joanne Moses, Ruth Smith, Elizabeth Baker, Bradley Baker, Maryanne Enauld, and Lydie Heidweiller. Congratulations folks!

The class will continue with three more weeks of theory and then the Technician Theory test will be given.

73....Mike KB6LCJ

---

## **Moved and Seconded**

April Board Meeting

The club has acquired a couple more rigs through donations. This, among other reasons, prompted the Board to consider selling one or more of them. It was decided we should keep and use the rigs with some sentimental value (i.e. the ones donated by the estates of deceased SCCARA members).

Stan WA6VJY (repeater chairman) said we will be needing two duplexers for the repeater upgrade--costing up to \$1000 each. There is currently more than enough in the repeater account to cover this; however, there are other items to be purchased (e.g. 440 antenna with hardline coax). The consensus was that we should sell some of our stuff to raise money.

The Board voted (by a narrow margin) to sell our Yaesu FT-101 EE. This will probably be auctioned to the membership by sealed bid. So, keep your eyes open for that later.

Doc W6ZRJ showed up at the Board meeting to point out that the trusteeship of the club station never actually was transferred. So, Doug WN6U has been the Trustee in name only. It was also pointed out that the trusteeship includes

both club licenses--W6UW (club station) and W6UU (repeater). The Board voted unanimously to have Stan WA6VJY (repeater chairman) also be the Trustee and transfer the trusteeship.

If you have any comments or suggestions on this or any other matter, bring them to any Board member or officer.

The World According to Student Bloopers  
Richard Lederer, St. Paul's School

One of the fringe benefits of being an English or History teacher is receiving the occasional jewel of a student blooper in an essay. I have pasted together the following "history" of the world from certifiably genuine student bloopers collected by teachers throughout the United States, from eight grade through college level. Read carefully, and you will learn a lot....

---

The inhabitants of Egypt were called mummies. They lived in the Sarah Dessert and traveled by Camelot. The climate of the Sarah is such that the inhabitants have to live elsewhere, so certain areas of the dessert are cultivated by irritation. The Egyptians built the Pyramids in the shape of a huge triangular cube. The Pramids are a range of mountains between France and Spain.

The Bible is full of interesting caricatures. In the first book of the Bible, Guinesses, Adam and Eve were created from an apple tree. One of their children, Cain, asked "Am I my brother's son?" God asked Abraham to sacrifice Issac on Mount Montezuma. Jacob, son of Issac, stole his brother's birthmark. Jacob was a partiarch who brought up his twelve sons to be partiarchs, but they did not take to it. One of Jacob's sons, Joseph, give refuse to the Israelites.

Pharaoh forced the Hebrew slaves to make bread without straw. Moses led them to the Red Sea, where they made unleavened bread, which is bread made without any ingredients. Afterwards, Moses went up on Mount Cyanide to get the ten commandments. David was a Hebrew king skilled at playing the liar. He foughth with the Philatelists, a race of people who lived in Biblical times. Solomon, one of David's sons, had 500 wives and 500 porcupines.

Without the Greeks, we wouldn't have history. The Greeks invented three kinds of columns - Corinthian, Doric and Ironic. They also had myths. A myth is a female moth. One myth says that the mother of Achilles dipped him in the River Stynx until he became intolerable. Achilles appears in "The Illiad", by Homer. Homer also wrote the

---

## News Letter Notes

In the last issue of the SCCARA-GRAM, I solicited comments as to when people would like the newsletter to be delivered: as is now (during the week preceding the meeting) or one week earlier. So far, there has been only one response: KD6PBH pointed out that those who use a post office box may not check it daily; so, one week earlier would be good.

I hope to hear from more of you on this topic at the next meeting.

### REMINDER:

Please remember to get articles in to me by the date of the Board meeting. When they come trickling in a few days later (as is sometimes the case), it really makes things difficult for me.

73, Gary WB6YRU

---

## Packet Pieces

All sorts of bulletins are posted on the packet network, not just things related to amateur radio. Recently, a very funny sample of student writings on history was posted. The whole thing is a bit long, sorry about that, but it's worth it. I believe everything here is exactly as was originally written by the students. I sure got a kick out of it, I hope you do too...

---

"Oddity", in which Penelope was the last hardship that Ulysses endured on his journey. Actually, Homer was not written by Homer but by another man of that name.

Socrates was a famous Greek teacher who went around giving people advice. They killed him. Socrates died from an overdose of wedlock.

In the Olympic Games, Greeks ran races, jumped, hurled the biscuits, and threw the javs. The reward to the victor was a coral wreath. The government of Athen was democratic because the people took the law into their own hands. There were no wars in Greece, as the mountains were so high that they couldn't climb over to see what their neighbors were doing. When they fought the Parisians, the Greeks were outnumbered because the Persians had more men.

Eventually, the Romans conquered the Greeks. History call people Romans because they never stayed in one place for very long. At Roman banquets, the guests wore garlic in their hair. Julius Caesar extinguished himself on the battlefields of Gaul. The Ides of March killed him because they thought he was going to be made king. Nero was a cruel tyranny who would torture his poor subjects by playing the fiddle to them.

Then came the Middle Ages. King Alfred conquered the Dames, King Arthur lived in the Age of Shivery, King Harlod mustarded his troops before the Battle of Hastings, Joan of Arc was cannonized by George Bernard Shaw, and the victims of the Black Death grew boobs on their necks. Finally, the Magna Carta provided that no free man should be hanged twice for the same offense.

In midevil times most of the people were alliterate. The greatest writer of the time was Chaucer, who wrote many poems and verse and also wrote literature. Another tale tells of William Tell, who shot an arrow through an apple while standing on his son's head.

The Renaissance was an age in which more individuals felt the value of their human being. Martin Luther was nailed to the church door at Wittenberg for selling papal indulgences. He died a horrible death, being excommunicated by a bull. It was the painter Donatello's interest in the female nude that made him the father of the Renaissance. It was an age of great inventions and discoveries. Gutenberg invented the Bible. Sir Walter Raleigh is a historical figure because he invented cigarettes. Another important invention was the circulation of blood. Sir Francis Drake circumcised the world with a 100-foot clipper.

The government of England was a limited mockery. Henry VIII found walking difficult because he had an abness on his knee. Queen Elizabeth was the "Virgin Queen." As a queen she was a success. When Elizabeth

exposed herself before her troops, they all shouted "hurrah." Then her navy went out and defeated the Spanish Armadillo.

The greatest writer of the Renaissance was William Shakespear. Shakespear never made much money and is famous only because of his plays. He lived in Windsor with his merry wives, writing tragedies, comedies and errors. In one of Shakespear's famous plays, Hamlet rations out his situation by relieving himself in a long soliloquy. In another, Lady Macbeth tries to convince Macbeth to kill the King by attacking his manhood. Romeo and Juliet are an example of a heroic couplet. Writing at the same time as Shakespear was Miquel Cervantes. He wrote "Donkey Hote". The next great author was John Milton. Milton wrote "Paradise Lost." Then his wife dies and he wrote "Paradise Regained."

During the Renaissance America began. Christopher Columbus was a great navigator who discovered America while cursing about the Atlantic. His ships were called the Nina, the Pinta, and the Santa Fe. Later the Pilgrims crossed the Ocean, and the was called the Pilgrim's Progress. When they landed at Plymouth Rock, they were greeted by Indians, who came down the hill rolling their was hoops before them. The Indian squabs carried porposies on their back. Many of the Indian heroes were killed, along with their cabooses, which proved very fatal to them. The winter of 1620 was a hard one for the settlers. Many people died and many babies were born. Captain John Smith was responsible for all this.

One of the causes of the Revolutionary Wars was the English put tacks in their tea. Also, the colonists would send their pacels through the post without stamps. During the War, Red Coats and Paul Revere was throwing balls over stone walls. The dogs were barking and the peacocks crowing. Finally, the colonists won the War and no longer had to pay for taxis.

Delegates from the original thirteen states formed the Contented Congress. Thomas Jefferson, a Virgin, and Benjamin Franklin were two singers of the Declaration of Independence. Franklin had gone to Boston carrying all his clothes in his pocket and a loaf of bread under each arm. He invented electricity by rubbing cats backwards and declared "a horse divided against itself cannot stand." Franklin died in 1790 and is still dead. George Washington married Matha Curtis and in due time became the Father of Our Country. Them the Constitution of the United States was adopted to secure domestic hostility. Under the Constitution the people enjoyed the right to keep bare arms.

Abraham Lincoln became America's greatest Precedent. Lincoln's mother died in infancy, and he was born in a log cabin which he built with his own hands. When Lincoln was President, he wore only a tall silk hat. He said, "In

onion there is strength." Abraham Lincoln write the Gettysburg address while traveling from Washington to Gettysburg on the back of an envelope. He also signed the Emasculation Proclamation, and the Fourteenth Amendment gave the ex-Negroes citizenship. But the Clue Clux Clan would torcher and lynch the ex-Negroes and other innocent victims. On the night of April 14, 1865, Lincoln went to the theater and got shot in his seat by one of the actors in a moving picture show. The believed assassin was John Wilkes Booth, a supposedl insane actor. This ruined Booth's career.

Meanwhile in Europe, the enlightenment was a reasonable time. Voltare invented electricity and also wrote a book called "Candy". Gravity was invented by Issac Walton. It is chiefly noticeable in the Autumn, when the apples are flaling off the trees.

Bach was the most famous composer in the world, and so was Handel. Handel was half German, half Italian and half English. He was very large. Bach died from 1750 to the present. Beethoven wrote music even though he was deaf. He was so deaf he wrote loud music. He took long walks in the forest even when everyone was calling for him. Beethoven expired in 1827 and later died for this.

France was in a very serious state. The French Revolution was accomplished before it happened. The Marseillaise was the theme song of the French Revolution, and it catapulted into Napoleon. During the Napoleonic Wars, the crowned heads of Europe were trembling in their shoes. Then the Spanish gorillas came down from the hills and nipped at Napoleon's flanks. Napoleon became ill with bladder problems and was very tense and unrestrained. He wanted an heir to inheret his power, but since Josephine was a baroness, she couldn't bear him any children.

The sun never set on the British Empire because the British Empire is in the East and the sun sets in the West. Queen Victoria was the longest queen. She sat on a thorn for 63 years. He reclining years and finally the end of her life were exemplatory of a great personality. Her death was the final event which ended her reign.

The nineteenth century was a time of many great inventions and thoughts. The invention of the steamboat caused a network of rivers to spring up. Cyrus McCormick invented the McCormick Raper, which did the work of a hundred men. Samuel Morse invented a code for telepathy. Louis Pastuer discovered a cure for rabbis. Charles Darwin was a naturalist who wrote the "Organ of the Species". Madman Curie discovered radium. And Karl Marx became one of the Marx Brothers.

The First World War, cause by the assignation of the Arch-Duck by a surf, ushered in a new error in the anals of human history.

---

Keep smiling! :) 73, Gary WB6YRU

---

## Field Day Fun

Field Day is coming up near the end of June. There will be a Field Day committee meeting on May 17, 7:30 PM, at the San Jose Red Cross. You don't have to be on the committee to participate. The Chairman is Doug WN6U.

We will again participate in Field Day among the groves of oak and redwood up at Mt. Madonna park, located off Hecker Pass (152) in the mountain tops West of Gilroy. This is on the mountain range that separates the Monterey bay from the Morgan Hill-Gilroy area. Look for the sign-up sheet with further information elsewhere in this newsletter.

**Something new:** We have decided to try running QRP this time--that's <sup>low</sup> power, folks! Fortunately, the QRP classification means each contact is worth more points; however, we will only have 5 Watts to do it with. Also, we must use battery power, but we are allowed to use generators for charging them.

It was either this (run QRP) or we would try using "quick & simple" wire/dipole antennas. The thinking there was to better simulate what would likely be the case under actual disaster conditions: antennas thrown up in a hurry.

With only 5 Watts, the battery limitation won't be a problem--some of our stations did that last year while running 100 Watts! We will be trying a "natural power" station as well; that's batteries charged with solar cells (or solar cells alone), which is worth points by itself.

The challenge will be greater, with more dependence on operator skills--but that's part of what it's about any way!. ... So, what d' ya say, gang? Are we up to it?!

If you would like to get more involved, you are invited to help with the setting-up (Friday) and tear-down (Sunday). SCCARA will pay the entire

weekend park-use fee for each person in this team. Setting up the Field Day station is part of the experience--it's more fun than work. This "setup crew" goes up to Mt Madonna Friday afternoon in a caravan, maintaining contact on 2 meters--which is kind of fun itself.

See you there! 73, Gary WB6YRU

---

## **FCC Facts**

### **New amateur 219-220 MHz band**

The FCC issued NPRM, ET Docket 93-40. This would create a new shared band from 219 to 220 MHz, primarily for amateur nationwide packet network "backbone" point-to-point communications. Power would be limited to 50 Watts PEP. Signals in the 219-220 MHz band would be limited to 100 KHz bandwidth and 56 Kbaud; although, the FCC requests comments on relaxing the 56 KB limit.

The FCC proposes that in some cases, amateurs would be required to obtain written permission from nearby Automated Maritime Telecommunications Systems (AMTS) to avoid interference problems. The comment deadline is June 15, 1993. More information appears in the May QST.

### **Station location**

The FCC has dropped the station location from amateur licenses, effective with new license Form 660, introduced in February. The mailing address now becomes the only means for the FCC to communicate with amateur licensees. Until the station location box is removed in future printings, Volunteer Examiner Coordinators are being told to ignore the station location information asked for on current FCC form 610s (Section I, Line 8).

### **Amateur's responsibility for messages**

The FCC issued NPRM, PR Docket 93-85. Essentially, under the current rules, all amateurs are responsible for the content of each message

transmitted or relayed, even though the message may be received and retransmitted automatically as part of a packet network. The petitioners claim that this hampers unnecessarily the operation of high speed message forwarding systems and repeaters. They state that Section 97.103(a) leaves no alternative but for the control operator of every forwarding station in a system to delay the retransmission of each message until after it is review carefully. It is common for the network to pass several hundred messages per day. The FCC concurs with the petitioners.

Subpart C of Part 97 would be amended by adding new Section 97.217 as follows:

97.217 Message forwarding system.

(a) Any amateur station may participate in a message forwarding system, subject to the privileges of the class of operator license held.

(b) The control operator of the station originating a message and the control operator of the first station retransmitting that message are accountable for violative communications that are transmitted in a message forwarding system. The control operators of other stations inadvertently retransmitting violative communications is a message forwarding system are not accountable for the violative communications.

Comment deadline is July 1, 1993.

---

## **Roster Notes**

The club roster for 1993 follows. Please check for any errors. There has been a new data field added, the year in which each person became a member. Since this is new and such statistics were not kept previously, most of them are probably wrong. Please help us out here--if this information is wrong, let Mike KB6LCJ know when you first joined SCCARA.

Thanks, Gary WB6YRU, editor

# FIELD DAY WEEKEND: JUNE 25<sup>th</sup> - 27<sup>th</sup>

Field Day is coming up near the end of June. For those who are new to amateur radio: Field Day is one of the biggest contests of the year. The basic purpose is to give amateurs practice making contacts under disaster conditions. You can operate at home, but it's better (worth more points) to "setup shop" elsewhere; we usually go up to Mt. Madonna park. When operating as a group, we establish our selves under a classification where several transceivers are on the air at one time. The more exotic the power source, the better. Solar cells or generators running on something other than gasoline are worth more points. Once set up, we have 24 hours (starting at a specific time) to make as many contacts as possible. It's a lot of fun and a great way to hone those operating skills! Everyone is encouraged to participate. You can make a weekend of it or just show up for part of it, whatever you like.

The 1993 SCCARA Field Day weekend will again be held at Mt. Madonna county park on the last weekend in June, the 25<sup>th</sup> through the 27<sup>th</sup>. Club members who arrive on Friday and stay through Sunday and help with both setup and tear-down will be able to stay for free. All others will be charged \$8.00 per night per vehicle. Fees for those staying overnight may be paid in advance with this sign up sheet, or will be collected by the Treasurer on Field Day. Those who won't be staying overnight will be responsible for paying the "day use" fee at the Park entrance.

The club will be serving dinner at 2:00 PM on Saturday and breakfast on Sunday morning. The menu for Saturday dinner will be steak or chicken, please indicate your choice on this sign up sheet. The cost of either dinner with Sunday breakfast for one person is \$10.00. You must pay for the meals in advance so that we know how much food to buy. We're expecting a great Field Day this year, so please come join us!

Name \_\_\_\_\_ Call \_\_\_\_\_

Address \_\_\_\_\_

City \_\_\_\_\_ Zip \_\_\_\_\_

Overnight camping fee @ \$8.00 / night / vehicle: \$ \_\_\_\_\_

OR

\_\_\_\_\_ I will join the group going up Friday to help set-up, then tear-down Sunday.

**SCCARA REPEATERS**

SCCARA currently owns and operates two repeaters under the call W6UU:

2 meter:	146.385 +
70 cm:	442.425 + PL 107.2

Phone patch capability is available with a small subscription fee. The two meter repeater is located in the Mt. Hamilton foothills, Alum Rock area. The 70 cm repeater is located at the Alexian Brothers Hospital, North of 280 and 101.

**SCCARA NETS**

Mondays at 1930, on our 2 meter repeater. Net control: Joe WA6DXP.

Thursdays at 2000, on 28.385 MHz USB. Net control: Wally KA6YMD.

Members and visitors alike are encouraged to join in on the SCCARA nets. Wally KA6YMD usually conducts the ten meter net from the SCCARA club station: W6UW, located at the San Jose Red Cross (just South from the San Jose Air Port).
