**Subject:** Cvs inventory

**Flag Status:** Flagged

I was at CVS for a few hours today  
I got all the voice stations up and running  
Including 220, HF and 6 meters with both radios the Icom ic 726 hf and  
Yaesu ft 8900 quad band radio. Both use the Cushcraft hf antenna. I re  
installed the 2 position switch for both . I was able to copy a ham on  
20m in Denver but he did not hear me  
Kathryn Bassett came by and we upgraded the programming in the icom ic  
2200 district radio I was not able to get on line at ghe station so I  
could not run my computer. Icom IC 2200 is locked on CVS 145.540 simplex  
As far as inventory is concerned there are no changes. I did write down  
the serial number and LASD ID for the Kenwood TK 290 VHF HT w charger and  
2 spare batteries I installed mile holders for all the radios Next Monday  
night I will be At MNN to help and will work towards settling up NBEMS on  
220 using my spare Dell windows 10 laptop I Talked with Sgt Gilbert he  
confirms that the LASD guest internet does not work
