GNARC Minutes of the Meeting 4/12/04

Ned, KA1CVV started the May GNARC meeting at 8:00 pm. Officers then introduced themselves. **President:** "Ned" Bassick, KA1CVV / **Vice President:** Allan Valeo, NN1H / **Secretary & Newsletter:** John Sabini, WB1GRB / **Treasurer:** "Zig" Fekete, N1ICL.

Ned had forgotten to approve the minutes for the last two meetings. Members then approved the minutes.

New Business: Ned reminded members that there will be walkathons and bike marathons coming up soon and we will need volunteers for these events. Check the [GNARC](#) web site for the latest events and dates.

Public Service: Bloomin' 2004 Will Offer Riders Another Great Bike Tour.

Sound Cyclists Bicycle Club's 27th Annual Bloomin' Metric bicycle tour will once again be offering three great scenic rides in the Spring of 2004 - 25 miles, 75 kilometers and 100 kilometers.

As in the past, a portion of the proceeds from the entry fee for Bloomin' Metric 2004 will be donated to help support Fairfield County Safe Kids, a non-profit agency designed to reduce the incidences of unintentional childhood injuries and accidents - the number one killer of children.

May 23, 2004, Rain or Shine. Race Start Time: 7:00 am - 9:30 am (for all routes)

We will need operators. Contact, Toy [KA1WYQ](#). www.soundcyclists.com/Bloomin

Antenna Work Party. Jay NE2Q needs help installing an antenna at Courtland Gardens Nursing Home in Stamford near exit 9 off interstate 95. Contact Jay [NE2Q](#).

Ned announced that [West Mountain Radio](#) is looking for a FT-1000 B. We would like to barrow this radio for some test for a few days. You will be rewarded for your time. Phone, (203) 853-8080.

Allan, [NN1H](#), reminded members to go to the club web site and download the ARES form. Then e-mail it to him. These forms must be filled out every year.

Ned asked members to continue to fill out the **Malicious Interference Report**. This is a form to report malicious interference to either of the [GNARC](#) Repeaters. This information is very important and will be forwarded to the appropriate repeater trustee.
www.gnarc.org/mirf.htm.

Ned reminded everyone to contribute to the club raffle. The money collected helps pay for refreshments.

Zig, N1ICL, gave a complete treasurers report. Report will be at the May club meeting.

Ned reminded everyone that the club newsletter is now on the GNARC web site. We are going to an all electronic newsletter. You will be informed by e-mail of the up and coming GNARC events. Make sure your e-mail information is on the [Member E-Mail Directory](#) and it is correct. Contact, Ed k3ein@arrl.net

We also need articles for the newsletter. Write a article on the equipment you have or a radio that you rebuilt. So, please send your articles to John [WB1GRB](#). Check, [Ham Radio Reviews](#).

Tim, W1GIG, asked members to check the [GNARC](#) Equipment Inventory which has been updated. GNARC equipment that is currently available for purchase from the club.

April Program: Group Project.

Jay explained the 2 Meter Portable Tape Measure Beam designed for Direction Finding and demonstrated the modeling program that he used. Three Element Beam Building Project. E-Mail [N1ICL](#) for more information if you would like to build one. The cost is \$10. 00.

ARES NEWS

Thanks this month go to Frenchy, W1AGU, for running April's ARES Net. We didn't get a huge turnout this month, but it's easily understood owing to the holidays and members busy schedules. We're going to miss the April time frame for revisiting the Call Tree for the Norwalk ARES Group. It's under study and it's taking more time than I originally hoped.

What's up for May?

Well, the "Fox" is loose in Norwalk. On Saturday, May 22nd, "The Fox", will be hiding in plain sight somewhere in Norwalk starting at about 9:00 am until about 11:00 am. The premise is that a volunteer who was helping in a local disaster response is injured, disoriented and in need of your help. Find him before his batteries run down. The "Fox" will be monitoring 147.390R and will be talking and listening on 147.420 Simplex (expect some good natured taunts and comments as well.) This one should be easy because the Fox has 50 watts to a vertical gain antenna and a great location. No prizes will be awarded, however all available channels will announce the operators and the order in which they found the "Fox." NN1H issues this challenge, "Find the Fox and make use of the tools and techniques that you've seen demonstrated and built this year. Bragging rights rule!" And, if this one gets a good turnout, the next ones gonna' be a doozy!

Our next ARES net will be Monday, May 3rd at 8:00 pm and KK2C will be the NCS. I'm hoping to check-in via Echo-Link from Salt Lake City. Thank you all for being aware of your community and for staying involved in Emergency communications.

Allan, NN1H, EC Norwalk Ares Group

Computer Corner

ROGER GILER W1AGU

Microsoft has been under extreme pressure from many sides. The European Community has voted a huge fine for anti-competitive actions. In other countries, including the U.S.,

there is extreme concern about the vulnerability to viruses and data theft of the system compared to other operating systems. In an effort to hold market share, it has mailed out free copies of Microsoft Office to government employees, but at least two federal agencies are warning recipients to return the gifts or risk violating federal ethics policies. This product is worth several hundred dollars, but thousands of copies have been given away to users at some of the larger corporations. It appears that Microsoft is trying to act "nice" as its perception in the computer community is that of a big bully.

We have to be realistic. Microsoft may be the 800-lb gorilla that people love to hate, but unless you are technically inclined, they are the only real game in town. One reason is that some 90% of the people are using their products which represents quite a resource for solutions, or a large group with which to commiserate. I have tried Linux and it will be a great product, but I still consider it a "work in progress." This means that I lack the mental fortitude to play with it in order to bring out its hidden brilliance.

You may also want to share in Microsoft's largesse. A friend just bought locally an educational version of Microsoft Office which normally retails for \$370. Even before any rebates it came to only \$130 with the following restrictions: for "full or part-time students; home schooled students; full or part-time faculty or staff of an accredited educational institution; member of a household meeting any of the above criteria; noncommercial use only. Contains: Word 2003, Excel 2003, Outlook 2003, Power Point 2003. Licensed for noncommercial use on up to 3 home PCs." Enough said.

Icom IC-736 / IC-738

By John Sabini WB1GRB

I would recommend the Icom IC-736 HF plus 6 meters and IC-738 HF only. These radios were a bit pricey \$1800 in 1996. I bought this radio used 3 years ago and never had a problem, excellent trouble free radio.

Money wise this is the rig to buy. They are very good values on the used market today.

[Additional Information](#) & options / [Photo](#)

Simple radio with all you need, without all of the menus. Radio has an internal 12V power supply and uses 24V for the mosfet finals. Good 100W output from 6 to 160 meters and easy to crank down for QRP. RF is very flat from band to band and from one edge of the band to the other. Works really well on PSK31. Modes SSB, AM, FM, CW and RTTY. The radio has a full die-cast aluminum frame/heat sink, with dual (push pull) cooling fans, that

are very quiet, when they do come on. The case dimensions are such as not to take up half my desk top. It is wider than deep. For me, the size is perfect. Radio has a very fast built in antenna tuner that will surprise you what it will match, even works on 6 meters. Dual antenna jacks that remember what antenna to select according to the band selected. The big analog meter is a dream. I love the large LCD display that can be viewed from anywhere in the room and under any light conditions, even direct sun light. The main tuning knob is weighted, with adjustable drag for smooth tuning. Works just fine in TX and very good general coverage RX too! The rig is very stable and receiver is sensitive, even without the pre-amp switched on. The dynamic range is as good as anything out there in a pre DSP rig. The notch filter works very well and helps to pull in weak stations in noisy conditions. All controls are fast and easy. The buttons are large enough and spaced for easy access for band switching, split, memory, tuning, etc. If you're not happy with the tuning rate, it is programmable from the front panel. I like the 2 kHz per knob revolution for easy ssb tuning. There is a tuning speed button for wide frequency movements. It will also select 1 Hz steps along with 1 Hz readout. It works split frequency. Radio has 99 memories or more. Has various scan modes.

I use the Icom SM - 8 Desk Top Microphone, which works great. I've received very good reports on audio. I also have the IC-SP3 External Speaker. The IC-SP3 External Speaker sounds howl and has terrible flat audio. I had to use a small communications speaker which sounds much better. Radio has a internal speaker which sounds descent.

If you see one used and need a HF rig, you should consider it. I'm going to hang onto my IC-736. I am very pleased with the performance, features, and styling of this rig, and highly recommend it.

Some of the options for the IC-736 and IC-736. UT-30 PROGRAMMABLE TONE ENCODER UNIT: Provides 38 programmable sub audible tones. FL-52A/FL-53A/FL-100/FL-101 CW NARROW FILTERS: 455 kHz: FL-52A (500 Hz/-6 dB); FL-53A (250 Hz/-6 dB) 9.0106 MHz: FL-100 (500 Hz/-6 dB); FL-101 (250 Hz/-6 dB) Check your Icom dealer for availability of options.
