CCC Points Table

CONTESTANT CLASS	CLASS CODE for Log Sheet	**Normal** Conditions	**RO is unavailable**	
			RO prepares QNC then relayed by Coast Station	Coast Station prepares and sends QNC
Listener	**L**	**10**	**10**	**10**
Radio Operator	**RO**	**12**	Class Code RU **6**	NA
Coast Station 1	**CS1**	NA	**10**	NA
Coast Station 2	**CS2**	NA	NA	**12**

When the CLASS CODE is entered in the CLASS column of the log sheet, points are automatically totalled appropriately. The RU Class code is used only when an RO has prepared the QNC but is unavailable for transmission.

Determining the Final Score

Points are earned based upon two determinants:
1. Amount of work put in; 2. Accuracy of data entered in log sheets.

Full points show on the log sheet initially, then when compared with received data the organizer will deduct one point for each error

While onboard, RO Class puts in significantly more work than Listener Class so can earn up to 20 % more points. RO Class is also less likely to enter incorrect data, therefore more likely to earn full points, however, is treated no differently to Listener Class during his sea-going passage (i.e. 10 points minus errors). RO Class points are used only for determining the overall winner, and winner of RO Class. CS Class holds equivalent rank to RO, with points apportioned according to degree of involvement, i.e. CS1 or CS2.

Persons-On-Board Bonus Points

Regardless of Class, every operator who either sends or receives POB data, and correctly logs that data, is eligible for five (5) bonus points.

To claim those points, when POB data is detected, enter the data received in the appropriate cell of the Leg # column of your log sheet, e.g. 12/6, which means for Leg 12, the vessel has 6 POB.
Five bonus points are automatically added to the respective totals.

Security and Data Validation

Where possible, audio recordings of NZ Net sessions may prove useful for two reasons: 1. Accuracy of data can be checked post-net to be assured of maximum points; 2. Should it be needed, recorded evidence is available for dispute resolution.
